Statement Regarding Public Dissemination of Form 144 on August 10th

On Friday August 10th, a Form 144 (notice of proposed sale of securities) was made available to the public that was filed by the company's brokerage firm on August 1st. The Form 144 indicates our CEO has registered certain shares for potential sales, as the Form 144 reflects the maximum potential, not actual, sales activity. In addition to the net sale of shares on August 1st, which was disclosed on Form 4 on August 2nd and conducted pursuant to a Rule 10b5-1 Trading Plan ("Plan") established on May 30, 2018 as part of our CEO's personal long-term financial planning, any future sales will be conducted pursuant to the Plan, which terminates on the earlier of (i) July 31, 2019 or (ii) the execution of all included potential trades. The Plan contains limit prices for all remaining sales ranging in price from approximately 13% to 50% higher than the closing stock price on August 10th. Only in the event all limit prices are reached would all shares under the Plan be sold. For information on specific trades, please see the company's Form 4 filings available on this investor relations website.
