Notes to Consolidated Financial Statements
(Unaudited)

Note 1. Organization

Sunrun Inc. ("Sunrun" or the "Company") was originally formed in 2007 as a California limited liability company and was converted into a Delaware corporation in 2008. The Company is engaged in the design, development, installation, sale, ownership and maintenance of residential solar energy systems ("Projects") in the United States.

Sunrun acquires customers directly and through relationships with various solar and strategic partners ("Partners"). The Projects are constructed either by Sunrun or by Sunrun's Partners and are owned by the Company. Sunrun's customers enter into an agreement to utilize the solar system ("Customer Agreement") which typically has an initial term of 20 years. Sunrun monitors, maintains and insures the Projects. The Company also sells solar energy systems and products, such as panels and racking and solar leads generated to customers.

The Company has formed various subsidiaries ("Funds") to finance the development of Projects. These Funds, structured as limited liability companies, obtain financing from outside investors and purchase or lease Projects from Sunrun under master purchase or master lease agreements. The Company currently utilizes three legal structures in its investment Funds, which are referred to as: (i) pass-through financing obligations, (ii) partnership-flips and (iii) joint venture ("JV") inverted leases.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and applicable rules and regulations of the Securities and Exchange Commission regarding interim financial reporting. Certain information and note disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. As such, these unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and accompanying notes included in the Company's annual report on Form 10-K for the year ended December 31, 2017. The Company has restated certain prior period amounts to conform to the current period presentation as described in the Recently Issued and Adopted Accounting Standards section below. The results of the three months ended March 31, 2018 are not necessarily indicative of the results to be expected for the fiscal year ending December 31, 2018 or other future periods.

The consolidated financial statements reflect the accounts and operations of the Company and those of its subsidiaries, including Funds, in which the Company has a controlling financial interest. The typical condition for a controlling financial interest ownership is holding a majority of the voting interests of an entity. However, a controlling financial interest may also exist in entities, such as variable interest entities ("VIEs"), through arrangements that do not involve controlling voting interests. In accordance with the provisions of Financial Accounting Standards Board ("FASB"), Accounting Standards Codification Topic 810 ("ASC 810") *Consolidation*, the Company consolidates any VIE of which it is the primary beneficiary. The primary beneficiary, as defined in ASC 810, is the party that has (1) the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and (2) the obligation to absorb the losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. The Company evaluates its relationships with its VIEs on an ongoing basis to determine whether it continues to be the primary beneficiary. The consolidated financial statements reflect the assets and liabilities of VIEs that are consolidated. All intercompany transactions and balances have been eliminated in consolidation.

Reclassifications

Certain prior period amounts have been reclassified to conform to current period presentation.

Use of Estimates

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes.

The Company regularly makes significant estimates and assumptions, including, but not limited to, for revenue recognition, constraints which result in variable consideration, and the discount rate used to adjust the promised amount of consideration for the effects of a significant financing component, the estimates that affect the collectability of accounts receivable, the valuation of inventories, the useful lives of solar energy systems, the useful lives of property and equipment, the valuation and useful lives of intangible assets, the effective interest rate used to amortize pass-through financing obligations, the discount rate used for operating and finance leases, the valuation of stock-based compensation, the determination of valuation allowances associated with deferred tax assets, the fair value of debt instruments disclosed and the redemption value of redeemable noncontrolling interests. The Company bases its estimates on historical experience and on various other assumptions believed to be reasonable. Actual results may differ from such estimates.

Segment Information

The Company has one operating segment with one business activity, providing solar energy services and products to customers. The Company's chief operating decision maker ("CODM") is its Chief Executive Officer, who manages operations on a consolidated basis for purposes of allocating resources. When evaluating performance and allocating resources, the CODM reviews financial information presented on a consolidated basis.

Revenues from external customers (including, but not limited to homeowners) for each group of similar products and services are as follows (in thousands):

	Three Months Ended March 31,	
	2018	2017
Customer agreements	\$ 61,649	\$ 46,325
Incentives	5,341	2,765
Customer agreements and incentives	66,990	49,090

Products	39,490	35,400
Solar energy systems and product sales	77,373	56,019
Total revenue	\$ 144,363	\$ 105,109

Cash and Restricted Cash

The following table provides a reconciliation of cash, and restricted cash reported within the consolidated balance sheets that sum to the total of the same such amounts shown in the consolidated statement of cash flows. Cash and restricted cash consists of the following (in thousands):

	March 31, 2018	December 31, 2017
Cash	\$ 203,189	\$ 202,525
Restricted cash	40,139	39,265
Total	\$ 243,328	\$ 241,790

Restricted cash represents amounts related to replacement of solar energy system components and obligations under certain financing transactions.

Accounts Receivable

Accounts receivable consist of amounts due from customers as well as rebates due from government agencies and utility companies. Under Customer Agreements, the customers typically assign incentive rebates to the Company.

Unbilled receivables typically arise from fixed price escalators in long-term Customer Agreements which are included in the estimated transaction price and recognized as revenue evenly over the term. Such unbillable amounts become billable over time and will increase for an individual Customer Agreement when the billing rate is less than the average rate under the Customer Agreement and then the balance of the unbilled amount will gradually decrease to zero as amounts billed are greater than the amount recognized.

Accounts receivable, net consists of the following (in thousands):

	March 31, 2018	December 31, 2017
Customer receivables	\$ 52,567	\$ 59,263
Unbilled receivables	58,445	52,278
Other receivables	816	751
Rebates receivable	1,638	1,442
Allowance for doubtful accounts	(2,454)	(1,665)
Total	<u>\$ 111,012</u>	<u>\$ 112,069</u>

Deferred Revenue

When the Company receives consideration, or such consideration is unconditionally due, from a customer prior to delivering goods or services to the customer under the terms of a Customer Agreement, the Company records deferred revenue. Such deferred revenue consists of amounts for which the criteria for revenue recognition have not yet been met and includes amounts that are collected or assigned from customers, including upfront deposits and prepayments, and rebates. Deferred revenue relating to financing components represents the cumulative excess of interest expense recorded on financing component elements over the related revenue recognized to date and will eventually net to zero by the end of the initial term. Amounts received related to the sales of solar renewable energy credits ("SRECs") which have not yet been delivered to the counterparty are recorded as deferred revenue.

The opening balance of deferred revenue was \$525.4 million as of December 31, 2016. Deferred revenue consists of the following (in thousands):

	March 31, 2018	December 31, 2017
Under Customer Agreements:		
Payments received	\$ 523,475	\$ 517,544
Financing component balance	32,494	30,736
	<u>555,969</u>	<u>548,280</u>
Under SREC contracts:		
Payments received	14,314	14,805
Financing component balance	1,799	1,767
	<u>16,113</u>	<u>16,572</u>
Total	<u>\$ 572,082</u>	<u>\$ 564,852</u>

In the three months ended March 31, 2018 and 2017, the Company recognized revenue of \$12.8 million and \$11.5 million, respectively, from amounts included in deferred revenue at the beginning of the respective periods. Revenue allocated to remaining performance obligations represents contracted revenue that has not yet been recognized and includes deferred revenue as well as amounts that will be invoiced and recognized as revenue in future periods. Contracted but not yet recognized revenue was approximately \$4.3 billion as of March 31, 2018, of which the Company expects to recognize approximately 6% over the next 12 months and the remainder thereafter through the next 20 years. The annual amount of recognition of the existing deferred revenue balance at March 31, 2018 is not expected to vary significantly over the next 10 years, and then it is expected to gradually decline as the 20 year initial term expires on individual Customer Agreements.

Fair Value of Financial Instruments

The Company defines fair value as the exchange price that would be received for an asset or an exit price that would be paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company uses valuation approaches to measure fair value that maximize the use of observable inputs and minimize the use of unobservable inputs. The FASB establishes a three-tier fair value hierarchy for disclosure of fair value measurements as follows:

- Level 1—Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date;
- Level 2—Inputs are observable, unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities; and
- Level 3—Inputs that are unobservable, significant to the measurement of the fair value of the assets or liabilities and are supported by little or no market data.

Revenue Recognition

The Company recognizes revenue when control of goods or services is transferred to its customers, in an amount that reflects the consideration it expected to be entitled to in exchange for those goods or services.

Customer agreements and incentives

Customer agreements and incentives revenue is primarily comprised of revenue from Customer Agreements in which the Company provides continuous access to a functioning solar system and revenue from the sales of SRECs generated by the Company's solar energy systems to third parties.

The Company begins to recognize revenue on Customer Agreements when permission to operate ("PTO") is given by the local utility company or on the date daily operation commences if utility approval is not required. Revenue recognition does not necessarily follow the receipt of cash. The Company recognizes revenue evenly over the time that it satisfies its performance obligations over the initial term of the Customer Agreements. Customer Agreements typically have an initial term of 20 years and include an option to renewal for up to 10 additional years.

SREC revenue arises from the sale of environmental credits generated by solar energy systems and is generally recognized upon delivery of the SRECs to the counterparty.

In determining the transaction price, the Company adjusts the promised amount of consideration for the effects of the time value of money when the timing of payments provides it with a significant benefit of financing the transfer of goods or services to the customer. In those circumstances, the contract contains a significant financing component. When adjusting the promised amount of consideration for a significant financing component, the Company uses the discount rate that would be reflected in a separate financing transaction between the entity and its customer at contract inception and recognizes the revenue amount on a straight-line basis over the term of the Customer Agreement, and interest expense using the effective interest rate method.

Consideration from customers is considered variable due to the performance guarantee under Customer Agreements, and liquidating provisions under SREC contracts. Performance guarantees provide a credit to the customer if the system's cumulative production, as measured on various PTO anniversary dates, is below the Company's guarantee of a specified minimum. Revenue is recognized to the extent it is probable that a significant reversal of such revenue will not occur.

The Company capitalizes incremental costs incurred to obtain a contract in Other Assets in the consolidated balance sheets. These amounts are amortized on a straight-line basis over the term of the Customer Agreements, and are included in Sales and marketing in the consolidated statements of operations.

Solar energy systems and product sales

For solar energy systems sold to customers, the Company recognizes revenue when the solar energy system passes inspection by the authority having jurisdiction. The Company's installation projects are typically completed in a short period of time.

Product sales consist of solar panels, racking systems, inverters, other solar energy products sold to resellers and customer leads. Product sales revenue is recognized at the time when control is transferred, generally upon shipment. Consideration from customers is considered variable when volume discounts are given to customers, and are recorded as a reduction of revenue. Customer lead revenue, included in product sales, is recognized at the time the lead is delivered.

Taxes assessed by government authorities that are directly imposed on revenue producing transactions are excluded from solar energy systems and product sales.

Cost of Revenue

Customer agreements and incentives

Cost of revenue for customer agreements and incentives is primarily comprised of the (1) depreciation of the cost of the solar energy systems, as reduced by amortization of deferred grants, (2) solar energy system operations, monitoring and maintenance costs including associated personnel costs, and (3) allocated corporate overhead costs. Upon adoption of Accounting Standards Update ("ASU") No. 2014-09 *Revenue from Contracts with Customers* (Topic 606), the Company no longer records initial direct costs from the origination of Customer Agreements. Instead, the Company records costs to obtain a contract as described in Revenue Recognition above.

Cost of revenue for solar energy systems and non-lead generation product sales consist of direct and indirect material and labor costs for solar energy systems installations and product sales. Also included are engineering and design costs specific to an individual customer project, estimated warranty costs, freight costs, allocated corporate overhead costs, vehicle depreciation costs and personnel costs associated with supply chain, logistics, operations management, safety and quality control. Cost of revenue for lead generations consists of costs related to direct-response advertising activities associated with generating customer leads.

Recently Issued and Adopted Accounting Standards

Accounting standards adopted January 1, 2018 causing restatement of prior periods:

In May 2014, the FASB issued ASU No. 2014-09 *Revenue from Contracts with Customers* (Topic 606). The standard establishes a single revenue recognition model for all contracts with customers, eliminates industry specific requirements, and expands disclosure requirements. The Company adopted Topic 606 effective January 1, 2018, using the full retrospective method, which required the Company to restate each prior reporting period presented. The Company has elected to use the practical expedient under Topic 606 and has excluded disclosures of transaction prices allocated to remaining performance obligations and when the Company expects to recognize such revenue for all periods prior to the date of initial application.

In February 2016, the FASB issued ASU No. 2016-02 to replace existing lease guidance with ASC 842. ASC 842 changes how the definition of a lease is applied and judgment may be required in applying the definition of a lease to certain arrangements. The Company elected to early adopt the standard effective January 1, 2018 concurrent with the adoption of Topic 606 related to revenue recognition, using the modified retrospective approach at the beginning of the earliest comparative period presented in the financial statements, which required the Company to restate each prior reporting period presented.

Upon the adoption of ASC 842, the Company's Customer Agreements are accounted for under Topic 606 due to changes in the definition of a lease under ASC 842 when the Company was considered a lessor. For operating leases in which the Company is the lessee, the Company concluded that all existing operating leases under ASC 840 continue to be classified as operating leases under ASC 842, and all existing capital leases under ASC 840 are classified as finance leases under ASC 842. The Company has lease agreements with lease and non-lease components, which are generally accounted for as a single lease component. The Company accounts for short-term leases on a straight-line basis over the lease term.

Under Topic 606, total consideration for Customer Agreements, including price escalators and performance guarantees, is estimated and recognized over the term of the Customer Agreement. This accounting for price escalators creates an unbilled receivable balance for the first half of the Customer Agreement which is then reduced over the second half. Customer Agreements and SRECs with a prepaid element are deemed to include a significant financing component, as defined under Topic 606, which increases both revenue and interest expense. For pass-through financing obligation funds which report investment tax credit ("ITC") revenue, the ITC revenue is now recognized in full at PTO. SREC revenues are estimated net of any variable consideration related to possible liquidated damages, and recognized upon delivery of SRECs to the counterparty. The accounting did not materially differ for revenue currently recognized as "Solar energy systems and product sales." The adoption of Topic 606 also

resulted in an adjustment to the Company's deferred tax liabilities, and impacted the analysis of the realizability of deferred tax assets, resulting in the release of valuation allowance related to state deferred tax assets.

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows* (Topic 230), Restricted Cash, which requires a statement of cash flows to present the change during the period in the total of cash, cash equivalents and amounts generally described as restricted cash and restricted cash equivalents. The Company adopted Topic 230 effective January 1, 2018, using the retrospective transition method, which required the Company to restate each prior reporting period presented. As a result, the Company no longer presents transfers between cash and restricted cash in the consolidated cash flow statements.

Adjustments to Previously Reported Financial Statements from the Adoption of Accounting Standards

The primary impact of adopting Topic 606 and ASC 842 includes the recognition of revenue from Customer Agreements, and certain incentives revenue, namely SRECs and ITCs. Previously, under ASC 840, the Company recognized revenue related to certain Customer Agreements as contingent revenue when earned. Under Topic 606, the Company has a continuous obligation to provide fully functional systems that provide electricity over the term of the Customer Agreement, and recognizes revenue evenly over the term of the Customer Agreements taking into account price escalators and performance guarantees when estimating variable consideration. Previously, the Company recognized revenue related to the sale of SRECs to the extent the cumulative value of delivered SRECs per contract exceeded any possible liquidated damages for non-delivery, if any. Under Topic 606, the Company estimates revenue net of any variable consideration related to possible liquidated damages, and recognizes revenue upon delivery of SRECs to the counterparty. Under Topic 605 and ASC 840, the Company previously reported ITC revenue over five years: following when the related solar system was granted PTO, with one-fifth of the monetized ITCs recognized on each anniversary of the solar energy systems' PTO date. Under Topic 606, the Company recognizes ITC revenue in full at PTO. Previously, under ASC 840, the Company capitalized direct and incremental costs as a component of Solar systems, net on the consolidated balance sheets. Under Topic 606, the Company capitalizes incremental costs incurred to obtain a contract in Other Assets in the consolidated balance sheets. These amounts are amortized on a straight-line basis over the term of the Customer Agreements, and are included in Sales and marketing in the consolidated statements of operations.

In addition to the impact of revenue recognition related to Customer Agreements, the impact of adopting ASC 842 includes a change in accounting for leases when the Company is the lessee, primarily the inclusion of right-of use ("ROU") assets included in Other Assets on the consolidated balance sheets, and operating lease liabilities included in Accrued expenses and other liabilities and Other liabilities on the consolidated balance sheets. The income tax impact as a result of the adoption of ASC 842 was immaterial.

Accounting standards to be adopted:

In June 2016, the FASB issued ASU No. 2016-13, *Measurement of Credit Losses on Financial Instruments*, which replaces the current incurred loss impairment methodology with a current expected credit losses model. The amendment applies to entities which hold financial assets and net investment in leases that are not accounted for at fair value through net income as well as loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables and any other financial assets not excluded from the scope that have the contractual right to receive cash. This ASU is effective for fiscal years beginning after December 15, 2019 and interim periods within those fiscal years. Early adoption is permitted. Adoption of this ASU is applied using a modified retrospective approach, with certain aspects requiring a prospective approach. The Company is currently evaluating this guidance and the impact it may have on the Company's consolidated financial statements.

In August 2017, the FASB issued 2017-12, *Derivatives and Hedging, Targeted Improvements to Accounting for Hedging Activities*, which expands an entity's ability to hedge nonfinancial and financial risk components, eliminates the requirement to separately measure and report hedge ineffectiveness, and aligned the recognition and presentation of the effects of hedging instruments in the financial statements. The ASU is effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted. Adoption of this ASU is applied using a modified retrospective approach. The Company is currently evaluating this guidance and the impact it may have on the Company's consolidated financial statements.

Note 3. Fair Value Measurement

At March 31, 2018 and December 31, 2017, the carrying value of receivables, accounts payable, accrued expenses and distributions payable to noncontrolling interests approximates fair value due to their short-term nature and fall under the Level 2 hierarchy. The carrying values and fair values of debt instruments are as follows (in thousands):

	March 31, 2018		December 31, 2017	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Bank line of credit	\$ 247,000	\$ 247,000	\$ 247,000	\$ 247,000
Senior debt	899,979	899,710	808,455	807,698
Subordinated debt	112,232	111,094	111,488	111,095
Securitization debt	94,546	93,895	95,821	96,999
SREC Loans	30,272	30,272	32,181	32,181
Total	<u>\$ 1,384,029</u>	<u>\$ 1,381,971</u>	<u>\$ 1,294,945</u>	<u>\$ 1,294,973</u>

At March 31, 2018 and December 31, 2017, the fair value of the Company's lines of credit, and certain senior, subordinated, and SREC loans approximate their carrying values because their interest rates are variable rates that approximate rates currently available to the Company. At March 31, 2018 and December 31, 2017, the fair value of the Company's other debt instruments are based on rates currently offered for debt with similar maturities and terms. The Company's fair value of the debt instruments fell under the Level 3 hierarchy. These valuation

approaches involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the instruments or market.

The Company determines the fair value of its interest rate swaps using a discounted cash flow model which incorporates an assessment of the risk of non-performance by the interest rate swap counterparty and an evaluation of the Company's credit risk in valuing derivative instruments. The valuation model uses various inputs including contractual terms, interest rate curves, credit spreads and measures of volatility.

At March 31, 2018 and December 31, 2017, financial instruments measured at fair value on a recurring basis, based upon the fair value hierarchy are as follows (in thousands):

	March 31, 2018

The Company was in compliance with all debt covenants as of March 31, 2018.

SREC Loans

As of March 31, 2018, a subsidiary of the Company has an outstanding balance of \$30.3 million on a secured credit agreement with a weighted average interest rate of 7.41% and 7.28% as of March 31, 2018 and December 31, 2017, respectively. The facility is non-recourse to the Company and is secured by substantially all of the assets of such subsidiary, including its rights in and the net cash flows from the generation of contracted and uncontracted SRECs by certain subsidiaries of the Company. Loans under the facility bear interest at LIBOR +5.50% per annum for contracted SRECs and LIBOR + 9.00% per annum for uncontracted SRECs. The facility contains customary covenants including the requirement to provide lender reporting. The Company guarantees the delivery of SRECs on the subsidiary's underlying contracts in the event of a delivery shortfall pursuant to the SREC contracts with counterparties. The Company does not guarantee payments of principal or interest on the loan. The credit facility also contains certain provisions in the event of default which entitles the lender to take certain actions including acceleration of amounts due under the facilities. The Company was in compliance with all debt covenants as of March 31, 2018.

Note 9. Derivatives

Interest Rate Swaps

The Company uses interest rate swaps to hedge variable interest payments due on certain of its term loans and aggregation facility. These swaps allow the Company to incur fixed interest rates on these loans and receive payments based on variable interest rates with the swap counterparty based on the one or three month LIBOR on the notional amounts over the life of the swaps.

The interest rate swaps have been designated as cash flow hedges. The credit risk adjustment associated with these swaps is the risk of non-performance by the counterparties to the contracts. In the three months ended March 31, 2018, the hedge relationships on the Company's interest rate swaps have been assessed as highly effective as the critical terms of the interest rate swaps match the critical terms of the underlying forecasted hedged transactions. Accordingly, changes in the fair value of these derivatives are recorded as a component of accumulated other comprehensive income, net of income taxes. Changes in the fair value of these derivatives are subsequently reclassified into earnings, and are included in interest expense, net in the Company's statements of operations, in the period that the hedged forecasted transactions affects earnings.

The Company recorded an unrealized gain of \$16.2 million and unrealized loss of \$0.8 million for the three months ended March 31, 2018 and 2017, respectively, net of applicable tax expense of \$5.5 million and tax benefit of \$0.5 million, respectively. The Company recognized into earnings a decrease to interest expense on derivatives of \$1.2 million and interest expense of \$0.6 million for the three months ended March 31, 2018 and 2017, respectively, net of tax benefit of \$0.4 million and tax expense of \$0.4 million for the three months ended March 31, 2018 and 2017. During the next twelve months, the Company expects to reclassify \$0.2 million of net gains on derivative instruments from accumulated other comprehensive income to earnings. There were no undesignated derivative instruments recorded by the Company as of March 31, 2018.

At March 31, 2018, the Company had designated derivative instruments classified as derivative assets as reported in other assets of \$15.9 million and derivative liabilities as reported in other liabilities of \$0.8 million in the Company's balance sheet. At December 31, 2017, the Company had designated derivative instruments classified as hedges of variable interest payments as derivative assets that are reported in other assets of \$1.9 million and derivative liabilities as reported in other liabilities of \$8.6 million in the Company's balance sheet. At March 31, 2018, the Company had the following derivative instruments (in thousands, other than quantity and interest rates):

Note 10. Pass-through Financing Obligations

The Company's pass-through financing obligations ("financing obligations") arise when the Company leases solar energy systems to Fund investors under a master lease agreement, and these investors in turn are assigned the Customer Agreements with customers. The Company receives all of the value attributable to the accelerated tax depreciation and some or all of the value attributable to the other incentives. The Company assigns to the Fund investors the value attributable to the ITC and, for the duration of the master lease term, the long-term recurring customer payments. Given the assignment of the operating cash flows, these arrangements are accounted for as financing obligations.

Under these financing obligation arrangements, wholly owned subsidiaries of the Company finance the cost of solar energy systems with investors for an initial term of 20 – 25 years. The solar energy systems are subject to Customer Agreements with an initial term not exceeding 20 years. These solar energy systems are reported under the line item solar energy systems, net in the consolidated balance sheets. As of March 31, 2018 and December 31, 2017, the cost of the solar energy systems placed in service under the financing obligations was \$463.3 million and \$464.2 million, respectively. The accumulated depreciation related to these assets as of March 31, 2018 and December 31, 2017 was \$67.7 million and \$63.7 million, respectively.

The investors make a series of large up-front payments and, in certain cases, subsequent smaller quarterly payments (lease payments) to the subsidiaries of the Company. The Company accounts for the payments received from the investors under the arrangements as borrowings by recording the proceeds received as financing obligations. These financing obligations are reduced over a period of approximately 20 years by customer payments under the Customer Agreements, U.S. Treasury grants (where applicable), incentive rebates (where applicable), the fair value of the ITCs monetized (where applicable) and proceeds from the contracted resale of SRECs as they are received by the investor. Under this approach, the Company accounts for the Customer Agreements and any related U.S. Treasury grants or incentive rebates as well the resale of SRECs consistent with the Company's revenue recognition accounting policies as described in Note 2, *Summary of Significant Accounting Policies*.

Interest is calculated on the financing obligations using the effective interest rate method. The effective interest rate, which is adjusted on a prospective basis, is the interest rate that equates the present value of the estimated cash amounts, including ITCs, to be received by the investor over the lease term with the present value of the cash amounts paid by the investor to the Company, adjusted for amounts received by the investor. The financing obligations are nonrecourse once the associated assets have been placed in service and all the contractual arrangements have been assigned to the investor.

Under the majority of the financing obligations, the investor has a right to extend its right to receive cash flows from the customers beyond the initial term in certain circumstances. Depending on the arrangement, the Company has the option to settle the outstanding financing obligation on the ninth or eleventh anniversary at a price equal to the higher of (a) the fair value of future remaining cash flows or (b) the amount that would result in the investor earning their targeted return. In several of these financing obligations, the investor has an option to require repayment of the entire outstanding balance on the tenth anniversary at a price equal to the fair value of the future remaining cash flows.

In one arrangement the investor has a right, on June 30, 2019, to purchase all of the systems leased at a price equal to the higher of (a) the sum of the present value of the expected remaining lease payments due by the investor, discounted at 5%, and the fair market value of the Company's residual interest in the systems as determined through independent valuation or (b) a set value per kilowatt applied to the aggregate size of all leased systems.

Under all financing obligations, the Company is responsible for services such as warranty support, accounting, lease servicing and performance reporting to customers. As part of the warranty and performance guarantee with customers, the Company guarantees certain specified minimum annual solar energy production output for the solar energy systems leased to the customers, which the Company accounts for as disclosed in Note 2, *Summary of Significant Accounting Policies*.

Note 11. VIE Arrangements

The Company consolidated various VIEs at March 31, 2018 and December 31, 2017. The carrying amounts and classification of the VIEs' assets and liabilities included in the consolidated balance sheets are as follows (in thousands):

Other liabilities	136	1,848
Total liabilities	\$ 711,213	\$ 677,955

The Company holds a variable interest in an entity that provides the noncontrolling interest with a right to terminate the leasehold interests in all of the leased projects on the tenth anniversary of the effective date of the master lease. In this circumstance, the Company would be required to pay the noncontrolling interest an amount equal to the fair market value, as defined in the governing agreement of all leased projects as of that date.

The Company holds certain variable interests in nonconsolidated VIEs established as a result of five pass-through financing obligation Fund arrangements as further explained in Note 10, *Pass-through Financing Obligations*. The Company does not have material exposure to losses as a result of its involvement with the VIEs in excess of the amount of the pass-through financing obligation recorded in the Company's consolidated financial statements. The Company is not considered the primary beneficiary of these VIEs.

Employee Stock Purchase Plan

Under the Company's amended 2015 Employee Stock Purchase Plan ("ESPP"), eligible employees are offered shares bi-annually through a 24 month offering period which encompasses four six month purchase periods. Each purchase period begins on the first trading day on or after May 15 and November 15 of each year. Employees may purchase a limited number of shares of the Company's common stock via regular payroll deductions at a discount of 15% of the lower of the fair market value of the Company's common stock on the first trading date of each offering period or on the exercise date. Employees may deduct up to 15% of payroll, with a cap of \$25,000 of fair market value of shares in any calendar year and 10,000 shares per employee per purchase period.

Stock-Based Compensation Expense

The Company recognized stock-based compensation expense, including ESPP expenses, in the consolidated statements of operations as follows (in thousands):

	Three Months Ended March 31,	
	2018	2017
Cost of customer agreements and incentives	\$ 611	\$ 751
Cost of solar energy systems and product sales	170	114

Total	<u>\$ 10,694</u>	<u>\$ 5,874</u>

In August 2017, the Company entered into an agreement with an affiliate ("Contractor") of Comcast Corporation ("Comcast") whereby Contractor will receive lead or sales fees for new customers it brings to the Company over a 40-month term. The Company also issued Comcast a warrant to purchase up to 11,793,355 shares of the Company's common stock, at an exercise price of \$0.01 per warrant share. The warrant initially vests 50.05% when both (i) Contractor has earned a lead or sales fee with respect to 30,000 of installed solar energy systems, and (ii) Contractor or its affiliates have spent at least \$10.0 million in marketing and sales in connection with the agreement. Thereafter, the warrant will vest in five additional increments for each additional 6,000 installed solar energy systems.

Note 14. Income Taxes

The income tax expense rate for the three months ended March 31, 2018 and 2017 was (9.9)% and (7.7)%, respectively. The differences between the actual consolidated effective income tax rate and the U.S. federal statutory rate were primarily attributable to the allocation of losses on noncontrolling interests and redeemable noncontrolling interests, which assumes a hypothetical liquidation of these partnerships as of the reporting dates and therefore a deferred tax expense is calculated on the income available to common shareholders.

The Company sells solar energy systems to investment Funds. As the investment Funds are consolidated by the Company, the gain on the sale of the assets has been eliminated in the consolidated financial statements. These transactions are treated as intercompany sales and any tax expense incurred related to these sales prior to fiscal year 2017 was deferred.

Tax Reform

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act makes broad and complex changes to the U.S. tax code that affected 2017, the current year and onwards, including, but not limited to, a reduction of the U.S. federal corporate tax rate from as high as 35% to 21%, net operating loss deduction limitations, interest expense limitations, revenue recognition changes and 100% disallowance of entertainment expense. The Company continues to analyze the Tax Act and implement relevant changes in the accounting for income taxes.

In addition on December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") which provides guidance on accounting for the tax effects of the Tax Act. SAB 118 provides a measurement period that should not extend beyond one year from the Tax Act enactment date for companies to complete the accounting under ASC 740, *Income Taxes*, for the year ended December 31, 2017. In accordance with SAB 118, a company must reflect the income tax effects of those aspects of the Tax Act for which the accounting under ASC 740 is complete. The Company has determined that the deduction related to officers compensation and the new tax statute needs further analysis to make their final assessment. The Company is still within the measurement period as of Q1 2018 and no further conclusions have been made, as the Company reviews the law change and the impact to the Company.

Uncertain Tax Positions

As of March 31, 2018 and December 31, 2017, the Company had \$1.5 million of unrecognized tax benefits related to an acquisition in 2015. In addition, there was \$0.4 million and \$0.4 million of interest and penalties for uncertain tax positions as of March 31, 2018 and December 31, 2017, respectively. Due to expiration of federal and California statute of limitations, the Company expects the total amount of gross unrecognized tax benefits will decrease by \$1.2 million within the next 12 months. The Company has accounted for an indemnification asset that will be written down concurrently and recorded through operating expenses. The Company is subject to taxation and files income tax returns in the United States, and various state and local jurisdictions. Due to the Company's net losses, substantially all of its federal, state and local income tax returns since inception are still subject to audit.

Net Operating Loss Carryforwards

As a result of the Company's net operating loss carryforwards as of March 31, 2018 and December 31, 2017, the Company does not expect to pay income tax, including in connection with its income tax provision for the three months ended March 31, 2018 until the Company's net operating losses are fully utilized. As of December 31, 2017, the Company's federal and state net operating loss carryforwards were \$700.3 million and \$630.7 million,

respectively. If not utilized, the federal net operating loss will begin to expire in the year 2028 and the state net operating losses will begin to expire in the year 2024.

Note 15. Commitments and Contingencies

Letters of Credit

As of March 31, 2018 and December 31, 2017, the Company had \$13.4 million and \$16.4 million, respectively, of unused letters of credit outstanding, which carry fees of 2.50% - 3.25% per annum.

Purchase Commitment

In 2018, the Company entered into purchase commitments with multiple suppliers to purchase \$265.6 million of photovoltaic modules and inverters over the next 24 months with the first modules delivered in January 2018.

Warranty Accrual

The Company accrues warranty costs when revenue is recognized for solar energy systems sales, based on the estimated future costs of meeting its warranty obligations. Warranty costs primarily consist of replacement costs for supplies and labor costs for service personnel since warranties for equipment and materials are covered by the original manufacturer's warranty (other than a small deductible in certain cases). As such, the warranty reserve is immaterial in all periods presented. The Company makes and revises these estimates based on the number of solar energy systems under warranty, the Company's historical experience with warranty claims, assumptions on warranty claims to occur over a systems' warranty period and the Company's estimated replacement costs.

ITC and Cash Grant Indemnification

The Company is contractually committed to compensate certain investors for any losses that they may suffer in certain limited circumstances resulting from reductions in ITCs or U.S. Treasury grants. Generally, such obligations would arise as a result of reductions to the value of the underlying solar energy systems as assessed by the Internal Revenue Service (the "IRS") or U.S. Treasury Department. At each balance sheet date, the Company assesses and recognizes, when applicable, the potential exposure from this obligation based on all the information available at that time, including any audits undertaken by the IRS. The Company believes that this obligation is not probable based on the facts known as of the filing date of this Quarterly Report on Form 10-Q. The maximum potential future payments that the Company could have to make under this obligation would depend on the difference between the fair values of the solar energy systems sold or transferred to the Funds as determined by the Company and the values the IRS would determine as the fair value for the systems for purposes of claiming ITCs. ITCs are claimed based on the statutory regulations from the IRS. The Company uses fair values determined with the assistance of an independent third-party appraisal as the basis for determining the ITCs that are passed-through to and claimed by the Fund investors. Since the Company cannot determine how the IRS will evaluate system values used in claiming ITCs, the Company is unable to reliably estimate the maximum potential future payments that it could have to make under this obligation as of each balance sheet date.

Litigation

The Company is subject to certain legal proceedings, claims, investigations and administrative proceedings in the ordinary course of its business. The Company records a provision for a liability when it is both probable that the liability has been incurred and the amount of the liability can be reasonably estimated. These provisions, if any, are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Depending on the nature and timing

of any such proceedings that may arise, an unfavorable resolution of a matter could materially affect the Company's future consolidated results of operations, cash flows or financial position in a particular period.

In July 2012, the U.S. Treasury Department and the Department of Justice (together, the "Government") opened a civil investigation into the participation by residential solar developers in the Section 1603 grant program. The Government served subpoenas on several developers, including Sunrun, along with their investors and valuation firms. The focus of the investigation is the claimed fair market value of the solar systems the developers submitted to the Government in their grant applications. The Company has cooperated fully with the Government and plans to continue to do so. No claims have been brought against the Company. The Company is not able to estimate the ultimate outcome or a range of possible loss at this point in time.

On November 20, 2015, a putative class action captioned *Slovin et al. v. Sunrun Inc. and Clean Energy Experts, LLC*, Case No. 4:15-cv-05340, was filed in the United States District Court, Northern District of California. The complaint generally alleged violations of the Telephone Consumer Protection Act (the "TCPA") on behalf of an individual and putative classes of persons alleged to be similarly situated. Plaintiffs filed a First Amended Complaint on December 2, 2015, and a Second Amended Complaint on March 25, 2016, also asserting individual and putative class claims under the TCPA. By Order entered on April 28, 2016, the Court granted the Company's motion to strike the class allegations set forth in the Second Amended Complaint, and granted leave to amend. Plaintiffs filed a Third Amended Complaint on July 12, 2016 asserting individual and putative class claims under the TCPA. On October 12, 2016, the Court denied the Company's motion to again strike the class allegations set forth in the Third Amended Complaint. On October 3, 2017, plaintiffs filed a motion for leave to file a Fourth Amended Complaint, seeking to, among other things, revise the definitions of the classes that plaintiffs seek to represent. The Company has opposed that motion, which remains pending before the Court. In each iteration of their complaint, plaintiffs seek statutory damages, equitable and injunctive relief, and attorneys' fees and costs, on behalf of themselves and the absent classes. On April 12, 2018, the Company and Plaintiffs advised the Court that they reached a settlement in principle, and the Court vacated all deadlines relating to the motion for class certification. Plaintiffs are required to file any motion for preliminary approval by July 10, 2018.

Most, if not all, of the claims asserted in the lawsuit relate to activities allegedly engaged in by third-party vendors, for which the Company denies any responsibility. The vendors are contractually obligated to indemnify the Company for losses related to the conduct alleged. The Company believes that the claims are without merit and intends to defend itself vigorously.

On April 13, 2016, a purported shareholder class action captioned *Pytel v. Sunrun Inc., et al.*, Case No. CIV 538215, was filed in the Superior Court of California, County of San Mateo, against the Company, certain of the Company's directors and officers, the underwriters of the Company's initial public offering and certain other defendants. The complaint generally alleges that the defendants violated Sections 11, 12 and 15 of the Securities Act of 1933 by making false or misleading statements in connection with the Company's August 5, 2015 initial public offering regarding the continuation of net metering programs. The plaintiffs seek to represent a class of persons who acquired the Company's common stock pursuant or traceable to the initial public offering. Plaintiffs seek compensatory damages, including interest, rescission or rescissory damages, an award of reasonable costs and attorneys' fees, and any equitable or injunctive relief deemed appropriate by the court. On April 29, 2016, a purported shareholder class action captioned *Baker et al. v. Sunrun Inc., et al.*, Case No. CIV 538419, was filed in the Superior Court of California, County of San Mateo. On May 10, 2016, a purported shareholder class action captioned *Nunez v. Sunrun Inc., et al.*, Case No. CIV 538593, was filed in the Superior Court of California, County of San Mateo. The *Baker* and *Nunez* complaints are substantially similar to the *Pytel* complaint, and seek similar relief against similar defendants on behalf of the same purported class.

On April 21, 2016, a purported shareholder class action captioned *Cohen, et al. v. Sunrun Inc., et al.*, Case No. CIV 538304, was filed in the Superior Court of California, County of San Mateo, against the Company, certain of the Company's directors and officers, and the underwriters of the Company's initial public offering. The complaint generally alleges that the defendants violated Sections 11, 12 and 15 of the Securities Act of 1933 by making false or misleading statements in connection with an August 5, 2015 initial public offering regarding the Company's business practices and its dependence on complex financial instruments. The *Cohen* plaintiffs seek to represent the same class and seek similar relief as the plaintiffs in the *Pytel*, *Nunez*, and *Baker* actions. On September 26, 2016, the *Baker*, *Cohen*, *Nunez*, and *Pytel* actions were consolidated. On December 27, 2017, the court granted Plaintiffs' motion for class certification. The Company believes that the claims are without merit and intends to defend itself vigorously.

On May 3, 2017, a purported shareholder class action captioned *Fink, et al. v. Sunrun Inc., et al.*, Case No. 3:17-cv-02537, was filed in the United States District Court, Northern District of California, against the Company and certain of the Company's directors and officers. The complaint generally alleges that the defendants violated Sections 10(b) and 20(a) of the Exchange Act of 1934, and Securities and Exchange Commission Rule 10b-5, by making false or misleading statements in connection with public filings made between September 15, 2015 and March 8, 2017 regarding the number of customers who canceled contracts after signing up for the Company's home-solar energy system. The plaintiff seeks compensatory damages, including interest, attorney's fees, and costs, on behalf of all persons other than the defendants who purchased the Company's securities between September 16, 2015 and May 2, 2017. On May 4, 2017, a purported shareholder class action captioned *Hall, et al. v. Sunrun Inc., et al.*, Case No. 3:17-cv-02571, was filed in the United States District Court, Northern District of California. On May 18, 2017, a purported shareholder class action captioned *Sanogo, et al. v. Sunrun Inc., et al.*, Case No. 3:17-cv-02865, was filed in the United States District Court, Northern California District of California. The *Hall* and *Sanogo* complaints are substantially similar to the *Fink* complaint, and seeks similar relief against similar defendants on behalf of a substantially similar class. On August 23, 2017, the *Fink*, *Hall*, and *Sanogo* actions were consolidated, and on September 25, 2017, plaintiffs filed a consolidated amended complaint which alleges the same underlying violations as the original *Fink*, *Hall* and *Sanogo* complaints. On April 5, 2018, the court granted the Company's motion to dismiss without prejudice. Plaintiffs filed a second amended complaint on May 3, 2018. The Company believes that the claims are without merit and intends to defend itself vigorously.

On June 29, 2017, a shareholder derivative complaint captioned *Barbara Sue Sklar Living Trust v. Sunrun Inc. et al.*, was filed in the United States District Court, Northern District of California, against the Company and certain of the Company's directors and officers. The complaint generally alleges that the defendants violated Section 14(a) of the Exchange Act of 1934 by making false or misleading statements in connection with public filings, including proxy statements, made between September 10, 2015 and May 3, 2017 regarding the number of customers who cancelled contracts after signing up for the Company's home solar energy system. The Plaintiff seeks, among other things, damages in favor of the Company, certain corporate actions to purportedly improve the Company's corporate governance, and an award of costs and expenses to the putative plaintiff stockholder, including attorneys' fees. The Company believes that the claims are without merit and intends to defend itself vigorously. The case has been stayed pending the outcome of the *Fink* matter described above.

On April 5, 2018, a stockholder derivative complaint captioned *Leonard Olsen v. Sunrun Inc. et al.*, was filed in the United States District Court, District of Delaware, against the Company and certain of the Company's directors and officers. The complaint generally alleges that the individual defendants breached their fiduciary duties and violated Section 14(a) of the Exchange Act of 1934 by making false or misleading statements in connection with public filings, including proxy statements, made between September 16, 2015 and May 21, 2017 regarding the number of customers who canceled contracts after signing up for the Company's home-solar energy system. The Plaintiff seeks, among other things, damages in favor of the Company, equitable relief, and an award of costs and expenses to the putative plaintiff stockholder, including attorneys' fees. The Company believes that the claims are without merit and intends to defend itself vigorously.

Overview

We provide clean, solar energy to homeowners at savings compared to traditional utility energy. We also offer battery storage along with solar systems to our customers in select markets. Our core solar service offerings are provided through our lease and power purchase agreements which we refer to as our "Customer Agreements" which provide homeowners with simple, predictable pricing for solar energy that is insulated from rising retail electricity prices. While homeowners have the option to purchase a solar energy system outright from us, most of our customers choose to buy solar as a service from us through our solar service offerings without the significant upfront investment of purchasing a solar energy system. With our solar service offerings, we install solar energy systems on our customers' homes and provide them the solar power produced by those systems for a 20-year initial term. In addition, we monitor, maintain and insure the system during the term of the contract. In exchange, we receive 20 years of predictable cash flows from high credit quality customers and qualify for tax and other benefits. We finance portions of these tax benefits and cash flows through tax equity and non-recourse debt structures in order to fund our upfront costs, overhead and growth investments. We develop valuable customer relationships that can extend beyond this initial contract term and provide us an opportunity to offer additional services in the future, such as our home battery storage service. Since our founding, we have continued to invest in a platform of services and tools to enable large scale operations for us and our partner network. The platform includes processes and software, as well as fulfillment and acquisition marketing leads.

We have experienced substantial growth in our business and operations since our inception in 2007. As of March 31, 2018, we operated the second largest fleet of residential solar energy systems in the United States and provided our solar services to approximately 189,000 customers in 22 states, plus the District of Columbia. We have deployed an aggregate of 1,270 megawatts ("MW") as of March 31, 2018, and our Gross Earning Assets as of March 31, 2018 were approximately \$2.4 billion. Please see the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations — Key Operating Metrics" for more details on how we calculate Megawatts Deployed and Gross Earning Assets.

Investment Funds

Our Customer Agreements provide for recurring customer payments, typically over 20 years, and the related solar energy systems are generally eligible for ITCs, accelerated tax depreciation and other government or utility incentives. Our financing strategy is to monetize these benefits at a low weighted average cost of capital. This low cost of capital enables us to offer attractive pricing to our customers for the energy generated by the solar energy system on their homes. Historically, we have monetized a portion of the value created by our Customer Agreements and the related solar energy systems through investment funds. These assets are attractive to fund investors due to the long-term, recurring nature of the cash flows generated by our Customer Agreements, the high credit scores of our customers, the fact that energy is a non-discretionary good and our low loss rates. In addition, fund investors can receive attractive after-tax returns from our investment funds due to their ability to utilize ITCs, accelerated depreciation and certain government or utility incentives associated with the funds' ownership of solar energy systems.

From inception to May 7, 2018, we have formed 35 investment funds. Of these 35 funds, 28 are currently active and are described below. We have established different types of investment funds to implement our asset monetization strategy. Depending on the nature of the investment fund, cash may be contributed to the investment fund by the investor upfront or in stages based on milestones associated with the design, construction or

interconnection status of the solar energy systems. The cash contributed by the fund investor is used by the investment fund to purchase solar energy systems. The investment funds either own or enter into a master lease with a Sunrun subsidiary for the solar energy systems, Customer Agreements and associated incentives. We receive on-going cash distributions from the investment funds representing a portion of the monthly customer payments received. We use the upfront cash, as well as on-going distributions to cover our costs associated with designing, purchasing and installing the solar energy systems. In addition, we also use debt, equity and other financing strategies to fund our operations. The allocation of the economic benefits between us and the fund investor and the corresponding accounting treatment varies depending on the structure of the investment fund.

We currently utilize three legal structures in our investment funds, which we refer to as: (i) pass-through financing obligations, (ii) partnership flips and (iii) joint venture (“JV”) inverted leases. We reflect pass-through financing obligation arrangements on our consolidated balance sheet as a liability. We record the investor’s interest in partnership flips or JV inverted leases (which we define collectively as “consolidated joint ventures”) as noncontrolling interests or redeemable noncontrolling interests. These consolidated joint ventures are usually redeemable at our option and, in certain cases, at the investor’s option. If redemption is at our option or the consolidated joint ventures are not redeemable, we record the investor’s interest as a noncontrolling interest and account for the interest using the hypothetical liquidation at book value (“HLBV”) method. If the investor has the option to put their interest to us, we record the investor’s interest as redeemable noncontrolling interest at the greater of the HLBV and the redemption value.

The table below provides an overview of our current investment funds (in millions, except number of funds and MW Deployed):

For further information regarding our investment funds, including the associated risks, see “Risk Factors—Our ability to provide our solar service offerings to homeowners on an economically viable basis depends in part on our ability to finance these systems with fund investors who seek particular tax and other benefits”, as well as Note 10, *Pass-through Financing Obligations*, Note 11, *VIE Arrangements* and Note 12, *Redeemable Noncontrolling Interests and Equity* to our consolidated financial statements appearing elsewhere in this Quarterly Report on Form 10-Q.

Key Operating Metrics

We regularly review a number of metrics, including the following key operating metrics, to evaluate our business, measure our performance, identify trends affecting our business, formulate financial projections and make strategic decisions. Some of our key operating metrics are estimates that are based on our management's beliefs and assumptions and on information currently available to management. Although we believe that we have a reasonable basis for each of these estimates, we caution you that these estimates are based on a combination of assumptions that may prove to be inaccurate over time. Any inaccuracies could be material to our actual results when compared to our calculations. Please see the section titled "Risk Factors" in this Quarterly Report on Form 10-Q for more information. Furthermore, other companies may calculate these metrics differently than we do now or in the future, which would reduce their usefulness as a comparative measure.

- *Megawatts Deployed* represents the aggregate megawatt production capacity of our solar energy systems, whether sold directly to customers or subject to executed Customer Agreements, for which we have (i) confirmation that the systems are installed on the roof, subject to final inspection or (ii) in the case of certain system installations by our partners, accrued at least 80% of the expected project cost.
- *Gross Earning Assets* represents the remaining net cash flows (discounted at 6%) we expect to receive during the initial 20-year term of our Customer Agreements for systems that have been deployed as of the measurement date, plus a discounted estimate of the value of the Customer Agreement renewal term or solar energy system purchase at the end of the initial term. Consistent with industry standards, we use a discount rate of 6%. We consider a discount rate of 6% to be appropriate and consistent with recent market transactions that demonstrate that a portfolio of residential solar homeowner contracts is an asset class that can be securitized successfully on a long-term basis, with a coupon of less than 5%. We calculate the Gross Earning Assets value of the purchase or renewal amount at the expiration of the initial contract term assuming a 10-year renewal at a contract rate equal to 90% of the customer's contractual rate in effect at the end of the initial contract term. After the initial (typically 20-year) contract term, our Customer Agreements provide customers the option to renew their contracts for the remaining life of the solar energy system typically at a 10% discount to then-prevailing power prices.

Gross Earning Assets is calculated net of estimated cash distributions to investors in consolidated joint ventures and estimated operating, maintenance and administrative expenses for systems deployed as of the measurement date. In calculating Gross Earning Assets, we deduct estimated cash distributions to our project equity financing providers. In calculating Gross Earning Assets, we do not deduct customer payments we are obligated to pass through to investors in pass-through financing obligations as these amounts are reflected on our balance sheet as long-term and short-term pass-through financing obligations, similar to the way that debt obligations are presented. In determining our finance strategy, we use pass-through financing obligations and long-term debt in an equivalent fashion as the schedule of payments of distributions to pass-through financing obligation investors is more similar to the payment of interest to lenders than the internal rates of return (IRRs) paid to investors in other tax equity structures.

- *Gross Earning Assets Under Energy Contract* represents the remaining net cash flows during the initial (typically 20 year) term of our Customer Agreements (less substantially all value from SRECs prior to July 1, 2015), for systems deployed as of the measurement date.
- *Gross Earning Assets Value of Purchase or Renewal* is the forecasted net present value we would receive upon or following the expiration of the initial Customer Agreement term (either in the form of cash payments during any applicable renewal period or a system purchase at the end of the initial term), for systems deployed as of the measurement date.

Gross Earning Assets is forecasted as of a specific date. It is forward-looking, and we use judgment in developing the assumptions used to calculate it. Factors that could impact Gross Earning Assets include, but are not limited to, customer payment defaults, or declines in utility rates or early termination of a contract in certain circumstances, including prior to installation.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with GAAP. GAAP requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could have reasonably used different accounting estimates, and in other instances, changes in the accounting estimates are reasonably likely to occur from period-to-period. Actual results could differ significantly from our estimates. Our future financial statements will be affected to the extent that our actual results materially differ from these estimates. For further information on all of our significant accounting policies, see Note 2, *Summary of Significant Accounting Policies*, to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

We believe that assumptions and estimates associated with our principles of consolidation, revenue recognition, impairment of long-lived assets, goodwill impairment analysis, provision for income taxes and valuation of noncontrolling interests and redeemable noncontrolling interests have the greatest impact on our consolidated financial statements. Therefore, we consider these to be our critical accounting policies and estimates.

Customer Agreements and Incentives. The \$15.3 million increase in revenue was primarily due to both an increase in solar energy systems under Customer Agreements being placed in service in the period from April 1, 2017 through March 31, 2018, plus a full quarter of revenue recognized for systems placed in service in the first quarter of 2017 versus only a partial quarter of such revenue related to the period in which the assets were in service in 2017. Revenue from incentives consists primarily of SRECs which increased by \$2.6 million due to an increase in SREC deliveries from the prior year.

Solar Energy Systems and Product Sales. Revenue from solar energy systems sales increased by \$17.3 million compared to the prior year due to increased demand through retail partners. Product sales increased by \$4.1 million, compared to the prior year period primarily due to an increase in the volume of wholesale products sold.

Cost of Customer Agreements and Incentives. The \$12.0 million increase in cost of customer agreements and incentives was primarily due to the increase in solar energy systems placed in service in the period from April 1, 2017 through March 31, 2018, plus a full quarter of costs recognized for systems placed in service in the first quarter of 2017 versus only a partial quarter of such expenses related to the period in which the assets were in service in 2017.

The cost of customer agreements and incentives decreased to 81% of customer agreements and incentives revenue during the three months ended March 31, 2018, from 87% during the three months ended March 31, 2017.

Cost of Solar Energy Systems and Product Sales. The \$15.1 million increase in cost of solar energy systems and product sales was due to the corresponding increase in the product sales discussed above.

Sales and Marketing Expense. The \$10.9 million increase in sales and marketing expense was primarily attributable to an increase in average headcount driving higher employee compensation. Included in sales and marketing expense is \$1.9 million and \$1.5 million of amortization of costs to obtain a contract for the period ending March 31, 2018 and 2017, respectively.

General and Administrative Expense. The \$8.3 million increase in general and administrative expenses primarily relates to charges for a litigation accrual and a reserve against construction-in-progress relating to certain integrated partners totaling \$7.1 million. The remainder of the increase relates to increased employee compensation.

Non-Operating Expenses

Total interest and other expenses, net	\$ 26,506	\$ 21,033	\$ 5,473	26 %

Interest Expense, net. The increase in net interest expense of \$7.6 million was primarily related to additional borrowings entered into subsequent to March 31, 2017. Included in net interest expense is \$5.6 million and \$5.1 million of non-cash interest recognized on contracts with customers that have a significant financing component for the period ending March 31, 2018 and 2017, respectively.

Income Tax Expense

	2018	2017	\$	%
<i>(in thousands)</i>				
Income tax expense	\$ 8,203	\$ 5,400	\$ 2,803	52%

The increase in income tax expense of \$2.8 million primarily relates to an increase in our deferred tax liabilities related to partnerships, depreciation expense and capitalized costs to acquire customer contracts. Given our net operating loss carryforwards as of December 31, 2017, we do not expect to pay income tax, including in connection with our 2018 income tax provision, until our net operating losses are fully utilized. As of December 31, 2017, our federal and state net operating loss carryforwards were \$700.3 million and \$630.7 million, respectively. If not utilized, the federal net operating loss will begin to expire in the year 2028 and the state net operating losses will begin to expire in the year 2024.

Net Loss Attributable to Noncontrolling Interests and Redeemable Noncontrolling Interests

	Three Months Ended March 31,		Change	
	2018	2017	\$	%
	<i>(in thousands)</i>			
Net loss attributable to noncontrolling interests and redeemable noncontrolling interests	\$ (119,452)	\$ (85,037)	\$ (34,415)	40%

The increase in net loss attributable to noncontrolling interests and redeemable noncontrolling interests was primarily a result of the addition of 5 funds since March 31, 2017, as well as the HLBV method used in determining the amount of net income or loss attributable to noncontrolling interests and redeemable noncontrolling interests, which generally allocates more loss to the noncontrolling interest in the first several years after fund formation.

Liquidity and Capital Resources

As of March 31, 2018, we had cash of \$203.2 million, which consisted of cash held in checking and savings accounts with financial institutions. We finance our operations mainly through a variety of financing fund arrangements that we have formed with fund investors, borrowings, cash generated from our sources of revenue and more recently, proceeds from secured, non-recourse loan arrangements for up to \$705 million. Our principal uses of cash are funding our business, including the costs of acquisition and installation of solar energy systems, satisfaction of our obligations under our debt instruments and other working capital requirements.

Our business model requires substantial outside financing arrangements to grow the business and facilitate the deployment of additional solar energy systems. The solar energy systems that are operational are expected to generate a positive return rate over the term of the Customer Agreement, typically 20 years. However, in order to grow, we will continue to be dependent on financing from outside parties. If financing is not available to us on acceptable terms if and when needed, we may be required to reduce planned spending, which could have a material adverse effect on our operations. While there can be no assurances, we anticipate raising additional required capital from new and existing investors. We believe our cash, investment fund commitments and available borrowings as further described below will be sufficient to meet our anticipated cash needs (other than the repayment of our working capital facility expected to be refinanced) for at least the next 12 months. The following table summarizes our cash flows for the periods indicated:

	Three Months Ended March 31,	
	2018	2017

Consolidated cash flow data:		
Net cash used in operating activities	\$ (45,754)	\$ (37,480)
Net cash used in investing activities	(164,711)	(162,364)
Net cash provided by financing activities	212,003	197,419
Net change in cash	\$ 1,538	\$ (2,425)

Operating Activities

During the three months ended March 31, 2018, we used \$45.8 million in net cash in operating activities. The driver of our operating cash inflow consists of payments received from customers. During the three months ended March 31, 2018, our operating cash outflows were \$32.6 million from our net loss excluding non-cash and non-operating items. Changes in working capital, other than inventory, resulted in a net cash outflow of \$19.6 million. Changes in inventory resulted in a cash inflow of \$6.5 million.

During the three months ended March 31, 2017, we used \$37.5 million in net cash in operating activities. The primary driver of our operating cash outflow consists of payments received from customers. During the three months ended March 31, 2017, our operating cash outflows of \$29.8 million from our net loss excluding non-cash

and non-operating items. Changes in working capital, other than inventory, resulted in an outflow of cash of \$15.4 million. Changes in inventory resulted in a cash inflow of \$7.7 million.

Investing Activities

During the three months ended March 31, 2018, we used \$164.7 million in cash in investing activities. Of this amount, we used \$163.2 million to acquire and install solar energy systems and components under our long-term Customer Agreements, and \$1.5 million for capitalized software projects and the acquisition of office equipment.

During the three months ended March 31, 2017, we used \$162.4 million in cash in investing activities. Of this amount, we used \$159.8 million to acquire and install solar energy systems and components under our long-term Customer Agreements, \$2.6 million for capitalized software projects and the acquisition of office equipment.

Financing Activities

During the three months ended March 31, 2018, we generated \$212.0 million from financing activities. This was primarily driven by \$129.8 million in net proceeds from fund investors, \$84.9 million in proceeds from debt, net of debt issuance costs and repayments, offset by \$2.1 million in payments for finance lease obligations.

During the three months ended March 31, 2017, we generated \$197.4 million from financing activities. This was primarily driven by \$151.1 million in net proceeds from fund investors, \$36.7 million in proceeds from debt, net of debt issuance costs and repayments, and \$13.4 million from state grants, net of recapture.

Debt and Financing Fund Commitments

Debt Instruments

For a discussion of the terms and conditions of debt instruments and changes thereof in the period, refer to Note 8, *Indebtedness*, to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

Equity Instruments

Warrant. In August 2017, we entered into an agreement with an affiliate ("Contractor") of Comcast Corporation ("Comcast") whereby Contractor will receive lead or sales fees for new customers it brings to us over a 40-month term. We also issued Comcast a warrant to purchase up to 11,793,355 shares of our common stock, at an exercise price of \$0.01 per warrant share. The warrant initially vests 50.05% when both (i) Contractor has earned a lead or sales fee with respect to 30,000 of installed solar energy systems, and (ii) Contractor or its affiliates have spent at least \$10 million in marketing and sales in connection with the agreement. Thereafter, the warrant will vest in five additional increments for each additional 6,000 installed solar energy systems.

Investment Fund Commitments

As of March 31, 2018, we had undrawn committed capital of approximately \$231.2 million which may only be used to purchase and install solar energy systems. We intend to establish new investment funds in the future, and we may also use debt, equity or other financing strategies to finance our business.

Contractual Obligations and Other Commitments

The following table summarizes our contractual obligations as of March 31, 2018 (in thousands):

⁽¹⁾ The foregoing table does not include the amounts we could be required to expend under our redemption obligations discussed above.

Off-Balance Sheet Arrangements

We include in our consolidated financial statements all assets and liabilities and results of operations of investment fund arrangements that we have entered into. We do not have any off-balance sheet arrangements.

Recent Accounting Pronouncements

See Note 2, *Summary of Significant Accounting Policies*, to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to certain market risks in the ordinary course of our business. Our primary exposure includes changes in interest rates because certain borrowings bear interest at floating rates based on LIBOR plus a specified margin. We sometimes manage our interest rate exposure on floating-rate debt by entering into derivative instruments to hedge all or a portion of our interest rate exposure in certain debt facilities. We do not enter into any derivative instruments for trading or speculative purposes. Changes in economic conditions could result in higher interest rates, thereby increasing our interest expense and operating expenses and reducing funds available for capital investments, operations and other purposes. For quantitative and qualitative disclosures about market risk, see Item 7A, "Authoritative and Qualitative Disclosures About Market Risk," of our annual report on Form 10-K for the year ended December 31, 2017. Our exposures to market risk have not changed materially since December 31, 2017.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of our "disclosure controls and procedures" as of the end of the period covered by this Quarterly Report on Form 10-Q, pursuant to Rules 13a-15(e) and 15d-15(e) under the Exchange Act.

In connection with that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective and designed to provide reasonable assurance that the information required to be disclosed is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms as of March 31, 2018. The term "disclosure

controls and procedures,” as defined in Rules 13a-15l and 15d-15l under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended March 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. We implemented internal controls to ensure we adequately evaluated our contracts and properly assessed the impact of the new accounting standards related to revenue recognition and leases on our financial statements to facilitate their adoption on January 1, 2018. There were no significant changes to our internal control over financial reporting due to the adoption of the new standards.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

See Note 15, *Commitments and Contingencies*, to our consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

Item 1A. Risk Factors.

Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and related notes, before making a decision to invest in our common stock. The risks and uncertainties described below may not be the only ones we face. If any of the risks actually occur, our business, financial condition, results of operations, cash flows and prospects could be materially and adversely affected. In that event, the market price of our common stock could decline, and you could lose part or all of your investment.

Risks Related to Our Business and Our Industry

We need to raise capital to finance the continued growth of our residential solar service business. If capital is not available to us on acceptable terms, as and when needed, our business and prospects would be materially and adversely impacted. In addition, our business is affected by general economic conditions and related uncertainties affecting markets in which we operate. Volatility in current economic conditions could adversely impact our business, including our ability to raise financing.

Our future success depends on our ability to raise capital from third parties to grow our business. To date, we have funded our business principally through low-cost tax equity investment funds. If we are unable to establish new investment funds when needed, or upon desirable terms, the growth of our solar service business would be impaired. Changes in tax law could affect our ability to establish such tax equity investment funds, impact the terms of existing or future funds, or reduce the pool of capital available for us to grow our business.

The contract terms in certain of our existing investment fund documents contain various conditions with respect to our ability to draw on financing commitments from the fund investors, including conditions that restrict our ability to draw on such commitments if an event occurs that could reasonably be expected to have a material adverse effect on the fund or, in some instances, us. If we were not able to satisfy such conditions due to events related to our business, a specific investment fund, developments in our industry, including tax or regulatory changes, or otherwise, and as a result, we were unable to draw on existing funding commitments, we could experience a material adverse effect on our business, liquidity, financial condition, results of operations and prospects. If any of the investors that currently invest in our investment funds were to decide not to invest in future

investment funds to finance our solar service offerings due to general market conditions, concerns about our business or prospects or any other reason, or materially change the terms under which they were willing to provide future financing, we would need to identify new investors to invest in our investment funds and our cost of capital may increase.

In addition, our business and results of operations are materially affected by conditions in the global capital markets and the economy. A general slowdown or volatility in current economic conditions, stemming from the level of U.S. national debt, currency fluctuations, unemployment rates, the availability and cost of credit, the U.S. housing market, inflation levels, negative interest rates, energy costs and concerns over a slow economic recovery could adversely affect our business, including our ability to raise financing.

There can be no assurance that we will be able to continue to successfully access capital in a manner that supports the growth of our business. Certain sources of capital may not be available in the future, and competition for any available funding may increase. We cannot be sure that we will be able to maintain necessary levels of funding without incurring high funding costs, unfavorable changes in the terms of funding instruments or the liquidation of certain assets. If we are unable to continue to offer a competitive investment profile, we may lose access to these funds or they may only be available on less favorable terms than those provided to our competitors or currently provided to us. If we are unable to arrange new or alternative methods of financing on favorable terms, our business, liquidity, financial condition, results of operations and prospects could be materially and adversely affected.

Rising interest rates will adversely impact our business.

Rising interest rates may increase our cost of capital. Our future success depends on our ability to raise capital from fund investors and obtain secured lending to help finance the deployment of our solar service offerings. Part of our business strategy is to seek to reduce our cost of capital through these arrangements to improve our margins, offset future reductions in government incentives and maintain the price competitiveness of our solar service offerings. Rising interest rates may have an adverse impact on our ability to offer attractive pricing on our solar service offerings to homeowners.

The majority of our cash flows to date have been from solar service offerings under Customer Agreements that have been monetized under various investment fund structures. One of the components of this monetization is the present value of the payment streams from homeowners who enter into these Customer Agreements. If the rate of return required by capital providers, including debt providers, rises as a result of a rise in interest rates, it will reduce the present value of the homeowner payment stream and consequently reduce the total value derived from this monetization. Any measures that we could take to mitigate the impact of rising interest rates on our ability to secure third-party financing could ultimately have an adverse impact on the value proposition that we offer homeowners.

The solar energy industry is an emerging market that is constantly evolving and may not develop to the size or at the rate we expect.

The solar energy industry is an emerging and constantly evolving market opportunity. We believe the solar energy industry will take several years to fully develop and mature, and we cannot be certain that the market will grow at the rate we expect. For example, we have experienced increases in cancellations of our Customer Agreements in certain geographic markets during certain periods throughout our operating history. Any future growth of the solar energy market and the success of our solar service offerings depend on many factors beyond our control, including recognition and acceptance of the solar service market by consumers, the pricing of alternative sources of energy, a favorable regulatory environment, the continuation of expected tax benefits and other incentives and our ability to provide our solar service offerings cost-effectively. If the markets for solar energy do not develop at the rate we expect, our business may be adversely affected.

Solar energy has yet to achieve broad market acceptance and depends in part on continued support in the form of rebates, tax credits and other incentives from federal, state and local governments. If this support diminishes, our ability to obtain external financing on acceptable terms, or at all, could be materially adversely affected. These types of funding limitations could lead to inadequate financing support for the anticipated growth in our business. Furthermore, growth in residential solar energy depends in part on macroeconomic conditions, retail prices of electricity and homeowner preferences, each of which can change quickly. Declining macroeconomic conditions, including in the job markets and residential real estate markets, could contribute to instability and

uncertainty among homeowners and impact their financial wherewithal, credit scores or interest in entering into long-term contracts, even if such contracts would generate immediate and long-term savings.

Market prices of retail electricity generated by utilities or other energy sources could decline for a variety of reasons, as discussed further below. Any such declines in macroeconomic conditions or changes in homeowner preferences would adversely impact our business.

Our ability to provide our solar service offerings to homeowners on an economically viable basis depends in part on our ability to finance these systems with fund investors who seek particular tax and other benefits.

Our solar service offerings have been eligible for federal investment tax credits (“ITCs”), U.S. Treasury grants and other tax benefits. We have relied on, and will continue to rely on, tax equity investment funds, which are financing structures that monetize a substantial portion of those benefits, in order to finance our solar service offerings. If, for any reason, we were unable to continue to monetize those benefits through these arrangements, we may be unable to provide and maintain our solar service offerings for homeowners on an economically viable basis.

The availability of this tax-advantaged financing depends upon many factors, including:

- our ability to compete with other solar energy companies for the limited number of potential fund investors, each of which has limited funds and limited appetite for the tax benefits associated with these financings;
- the state of financial and credit markets;
- changes in the legal or tax risks associated with these financings; and
- non-renewal of these incentives or decreases in the associated benefits.

The federal government currently offers a 30% ITC (the “Commercial ITC”) under Section 48(a) of the Internal Revenue Code of 1986, as amended (the “Code”), for the installation of certain solar power facilities owned for business purposes. The depreciable basis of a solar facility is also reduced by 50% of the tax credit claimed. Similarly, the federal government currently offers a 30% investment tax credit (“Residential ITC”) for the installation of certain solar power facilities owned by residential taxpayers. The Commercial ITC was set to step down to 10% and the Residential ITC was set to expire at the end of 2016. However in December 2015, Congress passed legislation extending both the Commercial and Residential ITC for an additional five years with a ramp down from 30% to 26% for solar property commencing construction in 2020 and then further to 22% for solar property commencing construction in 2021. Current law provides that the Commercial ITC will be 10% for both (i) solar property commencing construction after 2021 and (ii) solar property which commenced construction during or prior to 2021 but which is placed in service after 2023, and the Residential ITC will expire after 2021.

Potential investors must remain satisfied that the funding structures that we offer will make the tax benefits associated with solar energy systems available to these investors, which depends on the investors’ assessment of the tax law, the absence of any unfavorable interpretations of that law and the continued application of existing tax law and interpretations to our funding structures. Adverse changes in existing law or interpretations of existing law by the IRS and the courts could reduce the willingness of investors to invest in funds associated with these solar energy systems. Moreover, corporate tax rate reductions could reduce the appetite for tax benefits overall, which could reduce the pool of available funds. Additionally, certain tax deductions, such as depreciation, will have less value to investors, requiring additional cash to be paid to investors to meet return demands. Accordingly, we cannot assure you that this type of financing will continue to be available to us. New investment fund structures or other financing mechanisms may also become available, and if we are unable to take advantage of these fund structures and financing mechanisms, we may be at a competitive disadvantage. If, for any reason, we were unable to finance our solar service offerings through tax-advantaged structures or if we were unable to realize or monetize Commercial ITCs or other tax benefits, we may no longer be able to provide our solar service offerings to new homeowners on an economically viable basis, which would have a material adverse effect on our business, financial condition and results of operations.

If the Internal Revenue Service or the U.S. Department of the Treasury makes determinations that the fair market value of our solar energy systems is materially lower than what we have claimed, we may have to

pay significant amounts to our fund investors and our business, financial condition and prospects may be materially and adversely affected.

We and our fund investors claim the Commercial ITC or the U.S. Treasury grant in amounts based on the fair market value of our solar energy systems. We have obtained independent appraisals to determine the fair market values we report for claiming Commercial ITCs and U.S. Treasury grants. The IRS and the U.S. Treasury Department review these fair market values. With respect to U.S. Treasury grants, the U.S. Treasury Department reviews the reported fair market value in determining the amount initially awarded, and the IRS and the U.S. Treasury Department may also subsequently audit the fair market value and determine that amounts previously awarded must be repaid to the U.S. Treasury Department or that excess awards constitute taxable income for U.S. federal income tax purposes. With respect to Commercial ITCs, the IRS may review the fair market value on audit and determine that the tax credits previously claimed must be reduced. If the fair market value is determined in these circumstances to be less than what we reported, we may owe our fund investors an amount equal to this difference, plus any costs and expenses associated with a challenge to that valuation. We could also be subject to tax liabilities, including interest and penalties. If the IRS or the U.S. Treasury Department further disagrees now or in the future with the amounts we reported regarding the fair market value of our solar energy systems, or if we receive an adverse outcome with respect to the Department of the Treasury Inspector General investigation discussed elsewhere in this "Risk Factors" section and in the section entitled "Part II, Item 1. Legal Proceedings" elsewhere in this Quarterly Report on Form 10-Q, it could have a material adverse effect on our business, financial condition and prospects. For example, a hypothetical five percent downward adjustment in the fair market value of the solar energy systems related to approximately \$269.0 million in U.S. Treasury grants that we have received since the beginning of the U.S. Treasury grant program through December 31, 2014, would obligate us to repay approximately \$14.0 million to our fund investors. One of our investment funds has recently been selected for audit by the Internal Revenue Service (the "IRS"). In addition, two of our investors are currently being audited by the IRS, and these investor audits involve a review of the fair market value determination of our solar energy systems. If these investor audits result in an adverse finding, we may be subject to an indemnity obligation to these investors. Since we cannot determine how the IRS will evaluate system values used in claiming ITCs, we are unable to reliably estimate the maximum potential future payments that we would have to make under this obligation as of each balance sheet date.

We have historically benefited from declining costs in our industry, and our business and financial results may be harmed not only as a result of any increases in costs associated with our solar service offerings but also any failure of these costs to continue to decline as we currently expect. If we do not reduce our cost structure in the future, our ability to continue to be profitable may be impaired.

Declining costs related to raw materials, manufacturing and the sale and installation of our solar service offerings have been a key driver in the pricing of our solar service offerings and, more broadly, homeowner adoption of solar energy. While historically the prices of solar panels and raw materials have declined, the cost of solar panels and raw materials could increase in the future, and such products' availability could decrease, due to a variety of factors, including trade barriers, export regulations, regulatory or contractual limitations, industry market requirements and changes in technology and industry standards. Any such cost increases or decreases in availability could slow our growth and cause our financial results and operational metrics to suffer.

For example, in the past, we and our solar partners purchased a significant portion of the solar panels used in our solar service offerings from manufacturers based in China or containing components from China. In April 2017, Suniva, Inc., a U.S.-based solar panel manufacturer ("Suniva"), filed a petition for global safeguards with the U.S. International Trade Commission (USITC), which included requests for the imposition of tariffs on crystalline silicon photovoltaic (CSPV) solar cells and the establishment of a minimum price for solar modules imported into the United States. Another solar panel manufacturer, SolarWorld AG, later joined Suniva's petition. On September 22, 2017, the USITC determined that increased imports of solar panels and cells are a substantial cause of injury to the U.S. solar panel manufacturing industry. In January 2018, a 30% tariff was imposed on panels and a 30% tariff was imposed on cells after 2.5 gigawatts (GW) of imports. The tariffs step down 5% annually. This tariff could adversely affect our costs, our supply, or have other material adverse impacts on our business. For example, the tariff could be reflected in the purchase price of the solar panels and components we and our solar partners purchase and could adversely impact our future access to solar panels and components. Furthermore, on April 18, 2018, Sunpower announced plans to acquire SolarWorld, making Sunpower a potential domestic solar panel manufacturer that is not subject to the tariffs. This could give Sunpower, which offers home solar leasing to customers installing Sunpower panels, a cost advantage over home solar leasing competitors like Sunrun that rely on imported solar panels that are currently subject to the 30% tariff.

We may continue to make significant investments to drive growth in the future. Increases in any of these costs could adversely affect our results of operations and financial condition and harm our business and prospects. If we are unable to reduce our cost structure in the future, it could have a material adverse effect on our ability to be profitable and on our business and prospects.

We rely on net metering and related policies to offer competitive pricing to homeowners in all of our current markets, and changes to net metering policies may significantly reduce demand for electricity from our solar service offerings.

As of March 31, 2018, a substantial majority of states have adopted net metering policies. Net metering policies are designed to allow homeowners to serve their own load using on-site energy generation. Electricity that is generated by a solar energy system and consumed on-site avoids a retail energy purchase from the applicable utility, and excess electricity that is exported back to the electric grid generates a retail credit within a homeowner's monthly billing period. At the end of the monthly billing period, if the homeowner has generated excess electricity within that month, the homeowner typically carries forward a credit for any excess electricity to be offset against future utility energy purchases. At the end of an annual billing period or calendar year, utilities either continue to carry forward a credit, or reconcile the homeowner's final annual or calendar year bill using different rates (including zero credit) for the exported electricity.

Utilities, their trade associations, and fossil fuel interests in the country are currently challenging net metering policies, and seeking to either eliminate them, cap them, or impose charges on homeowners that have net metering. For example, in October 2015 the Hawaii Public Utilities Commission (the "Hawaii Commission") issued an order that eliminates net metering for all new customers. Currently, the Hawaii Commission has three options for rooftop solar customers: (i) a program providing customers with a credit when they export power during certain periods of time; (ii) a program that allows customers to install quickly, but they are generally not allowed to export electricity to the electrical grid; and (iii) a program paying customers for exported power at all times but at a lower rate and allowing the utility the ability to shut off customers' solar systems during grid emergencies. All existing net metering customers and customers who submitted net metering applications before October 12, 2015 are grandfathered indefinitely under the old rules. Some interim programs created by the Hawaii Commission are grandfathered for customers who applied in a timely fashion. We continue to build and service these systems.

In addition, in early 2016 we ceased new installations in Nevada in response to the elimination of net metering by the Public Utilities Commission of Nevada ("PUCN"). However, in September 2016, the PUCN issued an order grandfathering in customers under the prior net metering rules who had installed a solar energy system or had submitted a net metering application prior to December 31, 2015. Furthermore, in June 2017, the governor of Nevada signed legislation, AB 405, which restores net metering at a reduced credit - starting at 95% of the retail rate and declining as solar penetration increases - and grandfathers new customers for 20 years at the net metering rate in effect at the time they apply for interconnection. As another example, in December 2016, the Arizona Corporation Commission ("ACC") issued a decision to eliminate net metering and reduce export rates for new solar customers. To carry out this decision, specific rate changes applicable to Arizona solar customers are being determined in utility rate cases. For example, in 2017, Arizona Public Service Company ("APS") filed a rate case seeking reduced credit for solar exports and higher fixed charges. Intervenors agreed upon a settlement, which the ACC accepted in August 2017. The ACC is also considering similar rate changes in the Tuscon Electric Power ("TEP") and UNS Electric ("UNS") rate proceedings. If approved, the decision will eliminate net metering and reduce export rates for new solar customers. The ACC's decision is expected to be released shortly. In addition, New Hampshire issued its net metering ("NEM") order in June 2017, which kept NEM with some minor changes and removed a previously existing 100 MW cap on NEM and grandfathers in customers under existing rates until 2040.

Some states set limits on the total percentage of a utility's customers that can adopt net metering. For example, South Carolina has a net metering cap. New York and New Jersey currently have no net metering cap; however, these states have caps that trigger commission review of net metering policies. In Connecticut, state lawmakers introduced legislation to cap the utility procurement of energy and renewable energy certificates at \$35 million each year. These policies could be subject to change in the future, and other states we serve now or in the future may adopt net metering caps. If the net metering caps in these jurisdictions are reached without an extension of net metering policies, homeowners in the future will not have access to the economic value proposition net metering allows. In addition, if overall solar consumer demand in South Carolina continues to grow as expected and the cap is not increased or otherwise extended, the South Carolina net metering cap will be reached. Our ability to sell our solar service offerings may be adversely impacted by the failure to extend existing limits to net metering or

the elimination of currently existing net metering policies. The failure to adopt a net metering policy where it currently is not in place would pose a barrier to entry in those states. Additionally, the imposition of charges that only or disproportionately impact homeowners that have solar systems, or the introduction of rate designs such as the “unbundled” rates mentioned above, would adversely impact our business.

Electric utility statutes and regulations and changes to statutes or regulations may present technical, regulatory and economic barriers to the purchase and use of our solar service offerings that may significantly reduce demand for such offerings.

Federal, state and local government statutes and regulations concerning electricity heavily influence the market for our solar service offerings. These statutes and regulations relate to electricity pricing, net metering, incentives, taxation, competition with utilities, and the interconnection of homeowner-owned and third party-owned solar energy systems to the electrical grid. These statutes and regulations are constantly evolving. Governments, often acting through state utility or public service commissions, change and adopt different rates for residential customers on a regular basis and these changes can have a negative impact on our ability to deliver savings to homeowners.

Utilities, their trade associations, and fossil fuel interests in the country, each of which has significantly greater economic and political resources than the residential solar industry, are currently challenging solar-related policies to reduce the competitiveness of residential solar energy. Any adverse changes in solar-related policies could have a negative impact on our business and prospects. For example, in early 2016, we ceased new installations in Nevada as a result of the elimination of net metering (which was thereafter amended by the PUCN to grandfather in customers who had installed a solar energy system or submitted a net metering application prior to December 31, 2015). In June 2017, the governor of Nevada signed legislation, AB 405, which restores net metering at a reduced credit - starting at 95% of the retail rate and declining as solar penetration increases - and grandfathered customers for 20 years.

We face competition from traditional energy companies as well as solar energy companies.

The solar energy industry is highly competitive and continually evolving as participants strive to distinguish themselves within their markets and compete with large utilities. We believe that our primary competitors are the established utilities that supply energy to homeowners by traditional means. We compete with these utilities primarily based on price, predictability of price, and the ease by which homeowners can switch to electricity generated by our solar service offerings. If we cannot offer compelling value to homeowners based on these factors, then our business and revenue will not grow. Utilities generally have substantially greater financial, technical, operational and other resources than we do. As a result of their greater size, these competitors may be able to devote more resources to the research, development, promotion and sale of their products or respond more quickly to evolving industry standards and changes in market conditions than we can. Furthermore, these competitors are able to devote substantially more resources and funding to regulatory and lobbying efforts.

Utilities could also offer other value-added products or services that could help them compete with us even if the cost of electricity they offer is higher than ours. In addition, a majority of utilities' sources of electricity are non-solar, which may allow utilities to sell electricity more cheaply than us. Moreover, regulated utilities are increasingly seeking approval to “rate-base” their own residential solar businesses. Rate-basing means that utilities would receive guaranteed rates of return for their solar businesses. This is already commonplace for utility scale solar projects and commercial solar projects. While few utilities to date have received regulatory permission to rate-base residential solar or storage, our competitiveness would be significantly harmed should more utilities receive such permission because we do not receive guaranteed profits for our solar service offerings.

We also face competition from other residential solar service providers. Some of these competitors have a higher degree of brand name recognition, differing business and pricing strategies, and greater capital resources than we have, as well as extensive knowledge of our target markets. If we are unable to establish or maintain a consumer brand that resonates with homeowners, or competes with the pricing offered by our competitors, our sales and market share position may be adversely affected as our growth is dependent on originating new homeowners. We may also face competitive pressure from companies who offer lower priced consumer offerings than us.

We also compete with companies that are not regulated like traditional utilities but that have access to the traditional utility electricity transmission and distribution infrastructure. These energy service companies are able to offer homeowners electricity supply-only solutions that are competitive with our solar service offerings on both price

and usage of solar energy technology while avoiding the long-term agreements and physical installations that our current fund-financed business model requires. This may limit our ability to attract homeowners, particularly those who wish to avoid long-term contracts or have an aesthetic or other objection to putting solar panels on their roofs.

We also face competition from purely finance-driven nonintegrated competitors that subcontract out the installation of solar energy systems, from installation businesses (including solar partners) that seek financing from external parties, from large construction companies and from electrical and roofing companies. In addition, local installers that might otherwise be viewed as potential solar partners may gain market share by being able to be the first providers in new local markets. Some of these competitors may provide energy at lower costs than we do. Finally, as declining prices for solar panels and related equipment has resulted in an increase in consumers purchasing instead of leasing solar energy systems, we face competition from companies that offer consumer loans for these solar panel purchases.

As the solar industry grows and evolves, we will continue to face existing competitors as well as new competitors who are not currently in the market (including those resulting from the consolidation of existing competitors) that achieve significant developments in alternative technologies or new products such as storage solutions, loan products or other programs related to third-party ownership. Our failure to adapt to changing market conditions, to compete successfully with existing or new competitors and to adopt new or enhanced technologies could limit our growth and have a material adverse effect on our business and prospects.

Regulations and policies related to rate design could deter potential homeowners from purchasing our solar service offerings, reduce the value of the electricity we produce, and reduce the savings that our homeowners could realize from our solar service offerings.

All states regulate investor-owned utility retail electricity pricing. In addition, there are numerous publicly owned utilities and electric cooperatives that establish their own retail electricity pricing through some form of regulation or internal process. These regulations and policies could deter potential homeowners from purchasing our solar service offerings. For example, some utilities in states such as Arizona and Utah have sought and secured rate design changes that reduce credit for residential solar exports to below the retail rate and impose new charges for rooftop solar customers. Utilities in additional states may follow suit. Such rate changes can include changing rates to charge lower volume-based rates – the rates charged for kilowatt hours of electricity purchased by a residential customer – raising unavoidable fixed charges that a homeowner is subject to when they purchase solar energy from third parties, and levying charges on homeowners based on their point of maximum demand during a month (referred to as “demand charge”). For example, the Massachusetts Department of Public Utilities recently approved Eversource’s proposed demand charges on net metering customers in the state. The Massachusetts Department of Public Utilities decision is currently being appealed at the Massachusetts Supreme Judicial Court. APS also offers residential demand charge rate plans and if our solar customers have subscribed to those plans, they may not realize typical savings. These forms of rate design would adversely impact our business by reducing the value of the electricity our solar energy systems produce and reducing the savings homeowners receive by purchasing our solar service offerings. These proposals could continue in other states. In addition to changes in general rates charged to all residential customers, utilities are increasingly seeking solar-specific charges (which may be fixed charges, capacity-based charges, or other rate charges). Any of these changes could materially reduce the demand for our products and could limit the number of markets in which our products are competitive with electricity provided by the utilities. As mentioned above, in December 2016, the ACC issued a decision to eliminate net metering and reduce export rates for new solar customers. The specific rate changes applicable to Arizona solar customers will be determined in utility rate cases. As another example, in early 2016, we ceased new installations in Nevada in response to the elimination of net metering by the PUCN, which decision was amended by the PUCN in September 2016 to grandfather in customers who had installed a solar energy system or submitted a net metering application prior to December 31, 2015 under the prior net metering rules. In June 2017, the governor of Nevada signed legislation, AB 405, which restores net metering at a reduced credit - starting at 95% of the retail rate and declining as solar penetration increases - and grandfathered customers for 20 years.

Our business currently depends on the availability of utility rebates, tax credits, exemption and other financial incentives in addition to other tax benefits. The expiration, elimination or reduction of these rebates and incentives could adversely impact our business.

Our business depends on government policies that promote and support solar energy and enhance the economic viability of owning solar energy systems. U.S. federal, state and local governmental bodies provide incentives to owners, distributors, installers and manufacturers of solar energy systems to promote solar energy. These incentives include ITCs, as discussed above, as well as other tax credits, rebates and SRECs associated with solar energy generation. Some markets, such as New Jersey and Massachusetts, currently utilize SRECs. SRECs can be volatile and could decrease over time as the supply of SREC-producing solar energy systems installed in a particular market increases. For example, in New Jersey, because of the substantial supply of solar energy systems installed, the state is about to reach the solar carve-out under the state's Renewable Portfolio Standard. Unless pending legislation to expand New Jersey's solar carve-out is passed in the near term, SREC values will be adversely impacted. We rely on the incentives listed above to lower our cost of capital and to incent investors to invest in our funds, all of which enables us to lower the price we charge homeowners for our solar service offerings. These incentives have had a significant impact on the development of solar energy but they could change at any time, especially in light of the recent change in administration, as further described below. These incentives may also expire on a particular date (as discussed above with respect to the ITC), end when the allocated funding is exhausted, or be reduced, terminated or repealed without notice. The financial value of certain incentives may also decrease over time.

The current administration's proposed environmental policies may create regulatory uncertainty in the solar energy industry and may lead to a reduction or removal of various clean energy programs and initiatives designed to curtail climate change. Such a reduction or removal of incentives could diminish the market for solar energy. Tax reform legislation known as the Tax Cuts and Jobs Act was enacted in December 2017, reducing the corporate tax rate to 21%, and limiting interest deductibility and allowing full and immediate expensing of capital costs. A reduction in the corporate tax rate and the expensing of capital costs could diminish the capacity of potential fund investors to benefit from tax incentives, and could require additional cash to be distributed to such fund investors in lieu of tax benefits. Furthermore, the current administration has made public statements regarding overturning or modifying policies of, or regulations enacted by, the prior administration that placed limitations on coal and gas electric generation, mining and/or exploration. Any effort to overturn federal and state laws, regulations or policies that are supportive of solar energy generation or that remove costs or other limitations on other types of energy generation that compete with solar energy projects could materially and adversely affect our business.

Our business model also relies on multiple tax exemptions offered at the state and local levels. For example, solar energy systems are generally not considered in determining values for calculation of local and state real and personal property taxes as a result of applicable property tax exemptions. If solar energy systems were not excluded, the property taxes payable by homeowners would be higher, which could offset any potential savings our solar service offerings could offer, if the property taxes were to be imposed on third party owners of the solar panels, solar companies like Sunrun would be subject to higher costs. For example, Arizona Department of Revenue has determined that the rule that solar energy systems have no value and add no value does not apply to solar panels that are leased (as opposed to owned) and has subjected our leased solar panels to personal property taxes in that state. While we are challenging that determination, an adverse outcome will subject us and other solar companies to an increase in personal property taxes. If we pass this additional tax on to our customers in the form of higher prices, it could reduce or eliminate entirely the savings that these solar panels would otherwise provide to the homeowner. We are involved in ongoing litigation challenging the Arizona personal property tax determination. In May 2017, the Arizona Court of Appeals upheld the tax court's ruling that the Arizona Department of Revenue had no legal authority to assess rooftop solar energy equipment, reversed the Tax Court's ruling that the statute, Section 42-11054(C)(2) is unconstitutional, and ruled that the counties have no authority to tax rooftop solar equipment. The Arizona Department of Revenue appealed that decision. On March 16, 2018, the Arizona Supreme Court ruled that the Arizona Department of Revenue lacks statutory authority to value the Company's leased solar panels, but remanded to the Tax Court to determine whether Section 42-13054 authorizes county assessors to value the Company's leased solar panels and, if so, whether Section 42-11054(C)(2) nevertheless requires a zero valuation. There can be no assurances that this litigation will be resolved in a manner that is favorable to us or other solar companies. If this litigation is not resolved in a manner that is favorable to us and other solar companies, it will adversely impact our operations in Arizona. If we decide to pass the tax cost on to our customers, such price increase could adversely impact our ability to attract new customers in Arizona, and the savings that our current Arizona customers realize could be reduced or eliminated by the additional tax imposed, which will make our solar service offerings less attractive to those customers and could increase the risk of default from those customers. In

addition, South Carolina counties do not currently assess property tax on residential solar energy systems, although state law does not provide for an explicit exemption. In general, we rely on certain state and local tax exemptions that apply to the sale of equipment, sale of power, or both. These state and local sales tax exemptions can be changed by the state legislature and other regulators, and such a change, for example if South Carolina were to begin assessing property tax on residential solar energy systems, could adversely impact our business.

We are not currently regulated as a utility under applicable laws, but we may be subject to regulation as a utility in the future or become subject to new federal and state regulations for any additional solar service offerings we may introduce in the future.

Most federal, state, and municipal laws do not currently regulate us as a utility. As a result, we are not subject to the various regulatory requirements applicable to U.S. utilities. However, any federal, state, local or otherwise applicable regulations could place significant restrictions on our ability to operate our business and execute our business plan by prohibiting or otherwise restricting our sale of electricity. These regulatory requirements could include restricting our sale of electricity, as well as regulating the price of our solar service offerings. For example, the New York Public Service Commission recently passed an order regulating distributed energy providers as if they were energy service companies, which increases the regulatory compliance burden in that state. If we were subject to the same regulatory authorities as utilities in the United States or if new regulatory bodies were established to oversee our business, then our operating costs could materially increase.

Our business depends in part on the regulatory treatment of third-party owned solar energy systems.

Our Customer Agreements are third-party ownership arrangements. Sales of electricity by third parties face regulatory challenges in some states and jurisdictions. These challenges pertain to issues such as whether third party-owned systems qualify for the same levels of rebates or other non-tax incentives available for homeowner-owned solar energy systems, whether third-party-owned systems are eligible at all for these incentives, and whether third-party-owned systems are eligible for net metering and the associated significant cost savings. Reductions in, or eliminations of, the current treatment of third-party arrangements could reduce demand for our solar service offerings, adversely impact our access to capital and cause us to increase the price we charge homeowners for energy.

Interconnection limits or circuit-level caps imposed by regulators may significantly reduce our ability to sell electricity from our solar service offerings in certain markets or slow interconnections, harming our growth rate and customer satisfaction scores.

Interconnection rules establish the circumstances in which rooftop solar will be connected to the electricity grid. Interconnection limits or circuit-level caps imposed by regulators may curb our growth in key markets. Utilities throughout the country have different rules and regulations regarding interconnection and some utilities cap or limit the amount of solar energy that can be interconnected to the grid. Our systems do not provide power to homeowners until they are interconnected to the grid.

Interconnection regulations are based on claims from utilities regarding the amount of solar electricity that can be connected to the grid without causing grid reliability issues or requiring significant grid upgrades. Although recent rulings from the Hawaii Utilities Commission have helped resolve some problems, historically, interconnection limits or circuit-level caps have slowed the pace of our installations in Hawaii. Similar interconnection limits could slow our future installations in Hawaii or other markets, harming our growth rate and customer satisfaction scores. Similarly, the Hawaii Public Utilities Commission recently required the activation of some advanced inverter functionality that may require more expensive equipment and more oversight of the operation of the solar systems over time.

We may be required to make payments or contribute assets to our investors upon the occurrence of certain events, including one-time reset or true-up payments or upon the exercise of a redemption option by one of our investors.

Our fund investors typically advance capital to us based on production capacity estimates. The models we use to calculate prepayments in connection with certain of our investment funds will be updated for each investment fund at a fixed date occurring after placement in service of all applicable solar energy systems or an agreed upon date (typically within the first year of the applicable term) to reflect certain specified conditions as they exist at such date including the ultimate system size of the equipment that was leased, how much it cost, and when it went into service. In some cases, these true-up models will also incorporate any changes in law, which would include any reduction in rates (and thus any reduction in the benefits of depreciation). As a result of this true-up, applicable payments are resized, and we may be obligated to refund a portion of the investor's prepayments or to contribute additional assets to the investment fund. In addition, certain of our fund investors have the right to require us to purchase their interests in the investment funds after a set period of time, generally at a price equal to the greater of a set purchase price or fair market value of the interests at the time of the repurchase. Any significant refunds, capital contributions or purchases that we may be required to make could adversely affect our liquidity or financial condition.

A material drop in the retail price of utility-generated electricity or electricity from other sources would harm our business, financial condition and results of operations.

We believe that a homeowner's decision to buy solar energy from us is primarily driven by a desire to lower electricity costs. Decreases in the retail prices of electricity from utilities or other energy sources would harm our ability to offer competitive pricing and could harm our business. The price of electricity from utilities could decrease as a result of:

- the construction of a significant number of new power generation plants, including nuclear, coal, natural gas or renewable energy technologies;
- the construction of additional electric transmission and distribution lines;
- a reduction in the price of natural gas or other natural resources as a result of new drilling techniques or other technological developments, a relaxation of associated regulatory standards, or broader economic or policy developments;
- energy conservation technologies and public initiatives to reduce electricity consumption;
- and
- development of new energy technologies that provide less expensive energy.

A reduction in utility electricity prices would make the purchase of our solar service offerings less attractive. If the retail price of energy available from utilities were to decrease due to any of these or other reasons, we would be at a competitive disadvantage. As a result, we may be unable to attract new homeowners and our growth would be limited.

It is difficult to evaluate our business and prospects due to our limited operating history.

Until 2014, we focused our efforts primarily on the sales, financing and monitoring of solar energy systems for residential customers, with installation provided by our solar partners. In February 2014, we acquired the residential sales and installation business of Mainstream Energy Corporation, its fulfillment business AEE Solar and its racking business SnapNrack (collectively, "MEC"). We have limited experience managing the fulfillment and racking lines of the MEC business, and we may not be successful in maintaining or growing the revenue from these businesses. Further, we have limited experience, in comparison to our solar partner model, in our direct-to-consumer business, and as a result, we may fail to grow as quickly or achieve the revenue scale targeted in connection with such a model. We may also be unsuccessful in expanding our customer base through installation of our solar service offerings within our current markets or in new markets we may enter. Additionally, we cannot assure you that we will be successful in generating substantial revenue from our current solar service offerings or from any additional solar service offerings we may introduce in the future. Our limited operating history, combined with the rapidly evolving and competitive nature of our industry, may not provide an adequate basis for you to evaluate our results of operations and business prospects. In addition, we only have limited insight into emerging trends, such as alternative energy sources, commodity prices in the overall energy market, and legal and regulatory changes that impact the solar industry, any of which could adversely impact our business, prospects and results of operations.

We have incurred losses and may be unable to achieve or sustain profitability in the future.

We have incurred net losses in the past and may continue to incur net losses as we increase our spending to finance the expansion of our operations, expand our installation, engineering, administrative, sales and marketing staffs, increase spending on our brand awareness and other sales and marketing initiatives, and implement internal systems and infrastructure to support our growth. We do not know whether our revenue will grow rapidly enough to absorb these costs and our limited operating history makes it difficult to assess the extent of these expenses or their impact on our results of operations. Our ability to achieve profitability depends on a number of factors, including but not limited to:

- growing our customer base;
- finding investors willing to invest in our investment funds on favorable terms;
- maintaining or further lowering our cost of capital;
- reducing the cost of components for our solar service offerings;
- growing and maintaining our channel partner network;
- growing our direct-to-consumer business to scale; and
- reducing our operating costs by lowering our customer acquisition costs and optimizing our design and installation processes and supply chain logistics.

Even if we do achieve profitability, we may be unable to sustain or increase our profitability in the future.

Our results of operations may fluctuate from quarter to quarter, which could make our future performance difficult to predict and could cause our results of operations for a particular period to fall below expectations, resulting in a decline in the price of our common stock.

Our quarterly results of operations are difficult to predict and may fluctuate significantly in the future. We have experienced seasonal and quarterly fluctuations in the past and expect these fluctuations to continue. However, given that we are an early-stage company operating in a rapidly changing industry, those fluctuations may be masked by our recent growth rates and thus may not be readily apparent from our historical results of operations. As such, our past quarterly results of operations may not be good indicators of likely future performance.

In addition to the other risks described in this "Risk Factors" section, as well as the factors discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations" section, the following factors could cause our results of operations and key performance indicators to fluctuate:

- the expiration or initiation of any governmental tax rebates or incentives;
- significant fluctuations in homeowner demand for our solar service offerings or fluctuations in the geographic concentration of installations of solar energy systems;
- changes in financial markets, which could restrict our ability to access available financing sources;
- seasonal or weather conditions that impact sales, energy production and system installations;
- the amount and timing of operating expenses related to the maintenance and expansion of our business, operations and infrastructure;
- announcements by us or our competitors of new products or services, significant acquisitions, strategic partnerships, joint ventures or capital-raising activities or commitments;
- changes in our pricing policies or terms or those of our competitors, including utilities;
- changes in regulatory policy related to solar energy generation;
- the loss of one or more key partners or the failure of key partners to perform as anticipated;
- actual or anticipated developments in our competitors' businesses or the competitive landscape;
- actual or anticipated changes in our growth rate;
- general economic, industry and market conditions; and
- changes to our cancellation rate.

In the past, we have experienced seasonal fluctuations in sales and installations, particularly in the fourth quarter. This has been the result of decreased sales through the holiday season and weather-related installation delays. In addition, energy production is greater in the second and third quarters of the year, causing variability in operating lease revenue throughout the year. Our incentives revenue is also highly variable due to associated revenue recognition rules, as discussed in greater detail in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations." Seasonal and other factors may also contribute to variability in our sales of solar energy systems and product sales. For these or other reasons, the results of any prior quarterly or annual periods should not be relied upon as indications of our future performance. In addition, our actual revenue or key operating metrics in one or more future quarters may fall short of the expectations of investors and financial analysts. If that occurs, the trading price of our common stock could decline and you could lose part or all of your investment.

Our actual financial results may differ materially from any guidance we may publish from time to time.

We have in the past and may, from time to time, provide guidance regarding our future performance that represents our management's estimates as of the date such guidance is provided. Any such guidance is based upon a number of assumptions with respect to future business decisions (some of which may change) and estimates that, while presented with numerical specificity, are inherently subject to significant business, economic and competitive uncertainties and contingencies (many of which are beyond our control). Guidance is necessarily speculative in nature, and it can be expected that some or all of the assumptions that inform such guidance will not materialize or will vary significantly from actual results. Our ability to meet deployment volume, cost, net present value or any other forward-looking guidance is impacted by a number of factors including, but not limited to, the number of our solar energy systems sold versus leased, changes in installation costs, the availability of additional financing on acceptable terms, changes in the retail prices of traditional utility generated electricity, the availability of rebates, tax credits and other incentives, changes in policies and regulations including net metering and interconnection limits or caps, the availability of solar panels and other raw materials, as well as the other risks to our business that are described in this section. Accordingly, our guidance is only an estimate of what management believes is realizable as of the date such guidance is provided. Actual results may vary from such guidance and the variations may be material. Investors should also recognize that the reliability of any forecasted financial data diminishes the farther in the future that the data is forecast. In light of the foregoing, investors should not place undue reliance on our financial guidance, and should carefully consider any guidance we may publish in context.

If we fail to manage our recent and future growth effectively, we may be unable to execute our business plan, maintain high levels of customer service or adequately address competitive challenges.

We have experienced significant growth in recent periods, and we intend to continue to expand our business within existing markets and in a number of new locations in the future. This growth has placed, and any future growth may place, a significant strain on our management, operational and financial infrastructure. In particular, we will be required to expand, train and manage our growing employee base and solar partners. Our management will also be required to maintain and expand our relationships with homeowners, suppliers and other third parties and attract new homeowners and suppliers, as well as to manage multiple geographic locations.

In addition, our current and planned operations, personnel, systems and procedures might be inadequate to support our future growth and may require us to make additional unanticipated investment in our infrastructure, including additional costs for the expansion of our employee base and our solar partners as well as marketing and branding costs. Our success and ability to further scale our business will depend, in part, on our ability to manage these changes in a cost-effective and efficient manner. If we cannot manage our growth, we may be unable to take advantage of market opportunities, execute our business strategies or respond to competitive pressures. This could also result in declines in quality or homeowner satisfaction, increased costs, difficulties in introducing new solar service offerings or other operational difficulties. Any failure to effectively manage growth could adversely impact our business and reputation.

Servicing our debt requires a significant amount of cash to comply with certain covenants and satisfy payment obligations, and we may not have sufficient cash flow from our business to pay our substantial debt and may be forced to take other actions to satisfy our obligations under our indebtedness, which may not be successful.

We have substantial amounts of debt, including the working capital facility and the non-recourse debt facilities entered into by our subsidiaries, as discussed in more detail in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements. Our ability to make scheduled payments of the principal of, to pay interest on or to refinance our indebtedness depends on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not continue to generate cash flow from operations in the future sufficient to service our debt and make necessary capital expenditures to operate our business. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as selling assets, restructuring debt or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to timely repay or otherwise refinance our indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on our debt obligations.

We expect to incur substantially more debt in the future, which could intensify the risks to our business.

We and our subsidiaries expect to incur additional debt in the future, subject to the restrictions contained in our debt instruments. Our existing debt arrangements restrict our ability to incur additional indebtedness, including secured indebtedness, and we may be subject to similar restrictions under the terms of future debt arrangements. These restrictions could inhibit our ability to pursue our business strategies. Increases in our existing debt obligations would further heighten the debt related risk discussed above.

Furthermore, there is no assurance that we will be able to enter into new debt instruments on acceptable terms. If we were unable to satisfy financial covenants and other terms under existing or new instruments, or obtain waivers or forbearance from our lenders, or if we were unable to obtain refinancing or new financings for our working capital, equipment and other needs on acceptable terms if and when needed, our business would be adversely affected.

The production and installation of solar energy systems depends heavily on suitable meteorological conditions. If meteorological conditions are unexpectedly unfavorable, the electricity production from our solar service offerings may be below our expectations, and our ability to timely deploy new systems may be adversely impacted.

The energy produced and revenue and cash flows generated by a solar energy system depend on suitable solar and weather conditions, both of which are beyond our control. Furthermore, components of our systems, such as panels and inverters, could be damaged by severe weather or natural catastrophes, such as hailstorms, tornadoes, fires or earthquakes. In these circumstances, we generally would be obligated to bear the expense of repairing the damaged solar energy systems that we own. Sustained unfavorable weather also could unexpectedly delay the installation of our solar energy systems, leading to increased expenses and decreased revenue and cash flows in the relevant periods. Weather patterns could change, making it harder to predict the average annual amount of sunlight striking each location where our solar energy systems are installed. This could make our solar service offerings less economical overall or make individual systems less economical. Any of these events or conditions could harm our business, financial condition and results of operations.

Our business is concentrated in certain markets, putting us at risk of region specific disruptions.

As of March 31, 2018, approximately half of our customers were in California. Accordingly, our business and results of operations are particularly susceptible to adverse economic, regulatory, political, weather and other conditions in this market and in other markets that may become similarly concentrated, in particular the east coast, where we have seen significant growth recently. In addition, our corporate and sales headquarters are located in San Francisco, California, an area that is at a heightened risk of earthquakes. We may not have adequate insurance, including business interruption insurance, to compensate us for losses that may occur from any such significant events, including damage to our solar energy systems. A significant natural disaster, such as an earthquake, could have a material adverse impact on our business, results of operations and financial condition. In addition, acts of terrorism or malicious computer viruses could cause disruptions in our or our solar partners' businesses or the economy as a whole. To the extent that these disruptions result in delays or cancellations of installations or the deployment of our solar service offerings, our business, results of operations and financial condition would be adversely affected.

Loan financing developments could adversely impact our business.

The third-party ownership structure, which we bring to market through our solar service offerings, continues to be the predominant form of system ownership in the residential solar market in many states. However, with the development of new loan financing products, we have seen a modest shift from leasing to outright purchases of the solar energy system by the homeowner (i.e., a homeowner purchases the solar energy system outright instead of leasing the system from us). Continued increases in third-party loan financing products and outright purchases could result in the demand for long-term Customer Agreements to decline, which would require us to shift our product focus to respond to the market trend and could have an adverse effect on our business. In 2017, 2016 and 2015, the majority of our customers chose our solar service offerings as opposed to buying a solar energy system outright. Our financial model is impacted by the volume of homeowners who choose our solar service offerings, and an increase in the number of customers who choose to purchase solar energy systems (whether for cash or through third-party financing) may harm our business and financial results.

The federal government currently offers a 30% Residential ITC for the installation of certain solar power facilities owned by residential taxpayers. The Residential ITC was set to expire at the end of 2016. In December 2015, Congress passed legislation extending the Residential ITC for an additional five years with a ramp down from 30% to 26% for solar property commencing construction in 2020 and then further to 22% for solar property commencing construction in 2021. The Residential ITC is set to expire after 2021. Reductions in, eliminations of, or expirations of, governmental incentives such as the Residential ITC could reduce the number of customers who choose to purchase our solar energy systems.

Our growth depends in part on the success of our relationships with third parties, including our solar partners.

A key component of our growth strategy is to develop or expand our relationships with third parties. For example, we are investing resources in establishing strategic relationships with market players across a variety of industries, including large retailers, to generate new customers. These programs may not roll out as quickly as planned or produce the results we anticipated. A significant portion of our business depends on attracting and retaining new and existing solar partners. Negotiating relationships with our solar partners, investing in due diligence efforts with potential solar partners, training such third parties and contractors, and monitoring them for compliance with our standards require significant time and resources and may present greater risks and challenges than expanding a direct sales or installation team. If we are unsuccessful in establishing or maintaining our relationships with these third parties, our ability to grow our business and address our market opportunity could be impaired. Even if we are able to establish and maintain these relationships, we may not be able to execute on our goal of leveraging these relationships to meaningfully expand our business, brand recognition and customer base. This would limit our growth potential and our opportunities to generate significant additional revenue or cash flows.

We and our solar partners depend on a limited number of suppliers of solar panels and other system components to adequately meet anticipated demand for our solar service offerings. Any shortage, delay or component price change from these suppliers, or the acquisition of any of these suppliers by a competitor, could result in sales and installation delays, cancellations and loss of market share.

We and our solar partners purchase solar panels, inverters and other system components and batteries from a limited number of suppliers, making us susceptible to quality issues, shortages and price changes. If we or our solar partners fail to develop, maintain and expand our relationships with these or other suppliers, we may be unable to adequately meet anticipated demand for our solar service offerings, or we may only be able to offer our systems at higher costs or after delays. If one or more of the suppliers that we or our solar partners rely upon to meet anticipated demand ceases or reduces production, we may be unable to quickly identify alternate suppliers or to qualify alternative products on commercially reasonable terms, and we may be unable to satisfy this demand. The acquisition of a supplier by one of our competitors could limit our access to such components and require significant redesigns of our solar energy systems or installation procedures and have a material adverse effect on our business.

In particular, there are a limited number of suppliers of inverters, which are components that convert electricity generated by solar panels into electricity that can be used to power the home. For example, once we design a system for use with a particular inverter, if that type of inverter is not readily available at an anticipated price, we may incur delays and additional expenses to redesign the system. Further, the inverters on our solar energy systems generally carry only ten year warranties. If there is an inverter equipment shortage in a year when a substantial number of inverters on our systems need to be replaced, we may not be able to replace the inverters to maintain proper system functioning or may be forced to do so at higher than anticipated prices, either of which would adversely impact our business.

There have also been periods of industry-wide shortage of key components, including solar panels, in times of rapid industry growth. For example, new or unexpected changes in rooftop fire codes or building codes may require new or different system components to satisfy compliance with such newly effective codes or regulations, which may not be readily available for distribution to us or our suppliers. The manufacturing infrastructure for some of these components has a long lead time, requires significant capital investment and relies on the continued availability of key commodity materials, potentially resulting in an inability to meet demand for these components and, as a result, could negatively impact our ability to install systems in a timely manner. Further, any decline in the exchange rate of the U.S. dollar compared to the functional currency of our component suppliers could increase our component prices. Any of these shortages, delays or price changes could limit our growth, cause cancellations or adversely affect our operating margins, and result in loss of market share and damage to our brand.

As the primary entity that contracts with homeowners, we are subject to risks associated with construction, cost overruns, delays, customer cancellations, regulatory compliance and other contingencies, any of which could have a material adverse effect on our business and results of operations.

We are a licensed contractor in certain communities that we service, and we are ultimately responsible as the contracting party for every solar energy system installation. We may be liable, either directly or through our solar partners, to homeowners for any damage we cause to them, their home, belongings or property during the installation of our systems. For example, we either directly or through our solar partners, frequently penetrate homeowners' roofs during the installation process and may incur liability for the failure to adequately weatherproof such penetrations following the completion of construction. In addition, because the solar energy systems we or our solar partners deploy are high voltage energy systems, we may incur liability for any failure to comply with electrical standards and manufacturer recommendations.

Completing the sale and installation of a solar energy system requires many different steps including a site audit, completion of designs, permitting, installation, electrical sign-off and interconnection. Homeowners may cancel their Customer Agreement, subject to certain conditions, during this process until commencement of installation, and we have experienced increased customer cancellations in certain geographic markets during certain periods throughout our operating history. We or our solar partners may face customer cancellations, delays or cost overruns which may adversely affect our or our solar partners' ability to ramp up the volume of sales or installations in accordance with our plans. These cancellations, delays or overruns may be the result of a variety of factors, such as labor shortages or other labor issues, defects in materials and workmanship, adverse weather conditions, transportation constraints, construction change orders, site changes or roof conditions, geographic factors and other unforeseen difficulties, any of which could lead to increased cancellation rates, reputational harm

and other adverse effects. For example, some customer orders are cancelled after a site visit if we determine that a customer needs to make repairs to or install a new roof, or that there is excessive shading on their property. If we continue to experience increased customer cancellations, our financial results will potentially be materially and adversely affected.

In addition, the installation of solar energy systems, energy-storage systems and other energy-related products requiring building modifications are subject to oversight and regulation in accordance with national, state and local laws and ordinances relating to building, fire and electrical codes, safety, environmental protection, utility interconnection and metering, and related matters. We also rely on certain of our employees to maintain professional licenses in many of the jurisdictions in which we operate, and our failure to employ properly licensed personnel could adversely affect our licensing status in those jurisdictions. It is difficult and costly to track the requirements of every individual authority having jurisdiction over our installations and to design solar energy systems to comply with these varying standards. Any new government regulations or utility policies pertaining to our systems may result in significant additional expenses to us and our homeowners and, as a result, could cause a significant reduction in demand for our solar service offerings.

While we have a variety of stringent quality standards that we apply in the selection of our solar partners, we do not control our suppliers and solar partners or their business practices. Accordingly, we cannot guarantee that they follow our standards or ethical business practices, such as fair wage practices and compliance with environmental, safety and other local laws. A lack of demonstrated compliance could lead us to seek alternative suppliers or contractors, which could increase our costs and result in delayed delivery or installation of our products, product shortages or other disruptions of our operations. Violation of labor or other laws by our suppliers and solar partners or the divergence of a supplier's or solar partners' labor or other practices from those generally accepted as ethical in the United States or other markets in which we do business could also attract negative publicity for us and harm our business, brand and reputation in the market.

We typically bear the risk of loss and the cost of maintenance, repair and removal on solar energy systems that are owned or leased by our investment funds.

We typically bear the risk of loss and are generally obligated to cover the cost of maintenance, repair and removal for any solar energy system that we sell or lease to our investment funds. At the time we sell or lease a solar energy system to an investment fund, we enter into a maintenance services agreement where we agree to operate and maintain the system for a fixed fee that is calculated to cover our future expected maintenance costs. If our solar energy systems require an above-average amount of repairs or if the cost of repairing systems were higher than our estimate, we would need to perform such repairs without additional compensation. If our solar energy systems, approximately half of which are located in California, are damaged as the result of a natural disaster beyond our control, losses could exceed or be excluded from, our insurance policy limits, and we could incur unforeseen costs that could harm our business and financial condition. We may also incur significant costs for taking other actions in preparation for, or in reaction to, such events. We purchase property insurance with industry standard coverage and limits approved by an investor's third-party insurance advisors to hedge against such risk, but such coverage may not cover our losses.

Disruptions to our solar production metering solution could negatively impact our revenues and increase our expenses.

Our ability to monitor solar energy production for various purposes depends on the operation of our metering solution. We could incur significant expense and disruption to our operations in connection with failures of our metering solution, including meter hardware failures and failure of the cellular technology that we use to communicate with those meters. Many of our meters operate on either the 2G or 3G cellular data networks, which are expected to sunset before the term of our contract with homeowners. Upgrading our metering solution may cause us to incur a significant expense. Additionally, our meters communicate data through proprietary software, which we license from our metering partners. Should we be unable to continue to license, on agreeable terms, the software necessary to communicate with our meters, it could cause a significant disruption in our business and operations.

Problems with product quality or performance may cause us to incur warranty expenses and performance guarantee expenses, may lower the residual value of our solar energy systems and may damage our market reputation and cause our financial results to decline.

Homeowners who buy energy from us under Customer Agreements are covered by production guarantees and roof penetration warranties. As the owners of the solar energy systems, we or our investment funds receive a warranty from the inverter and solar panel manufacturers, and, for those solar energy systems that we do not install directly, we receive workmanship and material warranties as well as roof penetration warranties from our solar partners. For example, in 2015 and 2014, we had to replace a significant number of defective inverters, the cost of which was borne by the manufacturer. However, our customers were without solar service for a period of time while the work was done, which impacted customer satisfaction. Furthermore, one or more of our third-party manufacturers or solar partners could cease operations and no longer honor these warranties, leaving us to fulfill these potential obligations to homeowners. Further, we provide a performance guarantee with certain solar service offerings pursuant to which we compensate homeowners on an annual basis if their system does not meet the electricity production guarantees set forth in their agreement with us. Homeowners who buy energy from us under Customer Agreements are covered by production guarantees equal to the length of the term of these agreements, typically 20 years.

Because of our limited operating history, we have been required to make assumptions and apply judgments regarding a number of factors, including our anticipated rate of warranty claims and the durability, performance and reliability of our solar energy systems. Our assumptions could prove to be materially different from the actual performance of our systems, causing us to incur substantial expense to repair or replace defective solar energy systems in the future or to compensate homeowners for systems that do not meet their production guarantees. Product failures or operational deficiencies also would reduce our revenue from power purchase or lease agreements because they are dependent on system production. Any widespread product failures or operating deficiencies may damage our market reputation and adversely impact our financial results.

Product liability claims against us could result in adverse publicity and potentially significant monetary damages.

If our solar service offerings, including our racking systems or other products, injured someone, we would be exposed to product liability claims. Because solar energy systems and many of our other current and anticipated products are electricity-producing devices, it is possible that consumers or their property could be injured or damaged by our products, whether by product malfunctions, defects, improper installation or other causes. We rely on third-party manufacturing warranties, warranties provided by our solar partners and our general liability insurance to cover product liability claims and have not obtained separate product liability insurance. Any product liability claim we face could be expensive to defend and divert management's attention. The successful assertion of product liability claims against us could result in potentially significant monetary damages that could require us to make significant payments, as well as subject us to adverse publicity, damage our reputation and competitive position and adversely affect sales of our systems and other products. In addition, product liability claims, injuries, defects or other problems experienced by other companies in the residential solar industry could lead to unfavorable market conditions to the industry as a whole, and may have an adverse effect on our ability to attract homeowners, thus affecting our growth and financial performance.

The value of our solar energy systems at the end of the associated term of the lease or power purchase agreement may be lower than projected, which may adversely affect our financial performance and valuation.

We depreciate the costs of our solar energy systems over their estimated useful life of 35 years. At the end of the initial 20-year term of the Customer Agreement, customers may choose to purchase their solar energy systems, ask to remove the system at our cost or renew their Customer Agreements. Homeowners may choose to not renew or purchase for any reason, such as pricing, decreased energy consumption, relocation of residence or switching to a competitor product.

Furthermore, it is difficult to predict how future environmental regulations may affect the costs associated with the removal, disposal or recycling of our solar energy systems. If the value in trade or renewal revenue is less than we expect, we may be required to recognize all or some of the remaining unamortized costs. This could materially impair our future results of operations.

Damage to our brand and reputation or failure to expand our brand would harm our business and results of operations.

We depend significantly on our brand and reputation for high-quality solar service offerings, engineering and customer service to attract homeowners and grow our business. If we fail to continue to deliver our solar service offerings within the planned timelines, if our solar service offerings do not perform as anticipated or if we damage any homeowners' properties or cancel projects, our brand and reputation could be significantly impaired. We also depend greatly on referrals from homeowners for our growth. Therefore, our inability to meet or exceed homeowners' expectations would harm our reputation and growth through referrals. Further, we have focused particular attention on expeditiously growing our direct sales force and our solar partners, leading us in some instances to hire personnel or partner with third parties who we may later determine do not fit our company culture. In addition, members of our direct sales force and our solar partners may engage in what is perceived as aggressive sales tactics that could be unappealing to customers, which could harm our brand and reputation with potential customers. If we cannot manage our hiring and training processes to avoid potential issues related to expanding our sales team or solar partners and maintain appropriate customer service levels, our business and reputation may be harmed and our ability to attract homeowners would suffer. In addition, if we were unable to achieve a similar level of brand recognition as our competitors, some of which currently have a broader brand footprint as a result of a larger direct sales force, more resources and longer operational history, we could lose recognition in the marketplace among prospective customers, suppliers and partners, which could affect our growth and financial performance. Our growth strategy involves marketing and branding initiatives that will involve incurring significant expenses in advance of corresponding revenues. We cannot assure you that such marketing and branding expenses will result in the successful expansion of our brand recognition or increase our revenues.

A failure to hire and retain a sufficient number of employees and service providers in key functions would constrain our growth and our ability to timely complete homeowners' projects and successfully manage homeowner accounts.

To support our growth, we need to hire, train, deploy, manage and retain a substantial number of skilled employees, engineers, installers, electricians, sales and project finance specialists. Competition for qualified personnel in our industry is increasing, particularly for skilled personnel involved in the installation of solar energy systems. We may be unable to attract or retain qualified and skilled installation personnel or installation companies to be our solar partners, which would have an adverse effect on our business. We and our solar partners also compete with the homebuilding and construction industries for skilled labor. As these industries grow and seek to hire additional workers, our cost of labor may increase. The unionization of the industry's labor force could also increase our labor costs. Shortages of skilled labor could significantly delay a project or otherwise increase our costs. Because our profit on a particular installation is based in part on assumptions as to the cost of such project, cost overruns, delays or other execution issues may cause us to not achieve our expected margins or cover our costs for that project. In addition, because we are headquartered in the San Francisco Bay Area, we compete for a limited pool of technical and engineering resources that requires us to pay wages that are competitive with relatively high regional standards for employees in these fields. Further, we need to continue to expand upon the training of our customer service team to provide high-end account management and service to homeowners before, during and following the point of installation of our solar energy systems. Identifying and recruiting qualified personnel and training them requires significant time, expense and attention. It can take several months before a new customer service person is fully trained and productive at the standards that we have established. If we are unable to hire, develop and retain talented customer service personnel, we may not be able to realize the expected benefits of this investment or grow our business.

In addition, to support the growth and success of our direct-to-consumer channel, we need to recruit, retain and motivate a large number of sales personnel on a continuing basis. We compete with many other companies for qualified sales personnel, and it could take many months before a new salesperson is fully trained on our solar service offerings. If we are unable to hire, develop and retain qualified sales personnel or if they are unable to achieve desired productivity levels, we may not be able to compete effectively.

If we or our solar partners cannot meet our hiring, retention and efficiency goals, we may be unable to complete homeowners' projects on time or manage homeowner accounts in an acceptable manner or at all. Any significant failures in this regard would materially impair our growth, reputation, business and financial results. If we are required to pay higher compensation than we anticipate, these greater expenses may also adversely impact our financial results and the growth of our business.

The loss of one or more members of our senior management or key employees may adversely affect our ability to implement our strategy.

We depend on our experienced management team, and the loss of one or more key executives could have a negative impact on our business. In particular, we are dependent on the services of our chief executive officer and co-founder, Lynn Jurich, and our Chairman and co-founder, Edward Fenster. We also depend on our ability to retain and motivate key employees and attract qualified new employees. Neither our founders nor our key employees are bound by employment agreements for any specific term, and we may be unable to replace key members of our management team and key employees in the event we lose their services. Integrating new employees into our management team could prove disruptive to our operations, require substantial resources and management attention and ultimately prove unsuccessful. An inability to attract and retain sufficient managerial personnel who have critical industry experience and relationships could limit or delay our strategic efforts, which could have a material adverse effect on our business, financial condition and results of operations.

We may not realize the anticipated benefits of past or future acquisitions, and integration of these acquisitions may disrupt our business and management.

We acquired MEC in February 2014 and Clean Energy Experts, LLC (“CEE”) in April 2015. We may in the future acquire additional companies, project pipelines, products, or technologies or enter into joint ventures or other strategic initiatives. We may not realize the anticipated benefits of past or future acquisitions, and any acquisition has numerous risks that are not within our control. These risks include the following, among others:

- difficulty in assimilating the operations and personnel of the acquired company, especially given our unique culture;
- difficulty in effectively integrating the acquired technologies or products with our current products and technologies;
- difficulty in maintaining controls, procedures and policies during the transition and integration;
- disruption of our ongoing business and distraction of our management and employees from other opportunities and challenges due to integration issues;
- difficulty integrating the acquired company’s accounting, management information and other administrative systems;
- inability to retain key technical and managerial personnel of the acquired business;
- inability to retain key customers, vendors and other business partners of the acquired business;
- inability to achieve the financial and strategic goals for the acquired and combined businesses;
- incurring acquisition-related costs or amortization costs for acquired intangible assets that could impact our results of operations;
- significant post-acquisition investments which may lower the actual benefits realized through the acquisition;
- potential failure of the due diligence processes to identify significant issues with product quality, legal and financial liabilities, among other things;
- potential inability to assert that internal controls over financial reporting are effective; and
- potential inability to obtain, or obtain in a timely manner, approvals from governmental authorities, which could delay or prevent such acquisitions.

Our failure to address these risks, or other problems encountered in connection with our past or future acquisitions, could cause us to fail to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally. Future acquisitions could also result in dilutive issuances of our equity securities, the incurrence of debt, contingent liabilities, amortization expenses, incremental expenses or the write-off of goodwill, any of which could harm our financial condition or results of operations.

Mergers and acquisitions of companies are inherently risky, may not produce the anticipated benefits and could adversely affect our business, financial condition or results of operations.

If we are unsuccessful in developing and maintaining our proprietary technology, including our BrightPath software, our ability to attract and retain solar partners could be impaired, our competitive position could be harmed and our revenue could be reduced.

Our future growth depends on our ability to continue to develop and maintain our proprietary technology that supports our solar service offerings, including our design and proposal software, BrightPath. In addition, we rely, and expect to continue to rely, on licensing agreements with certain third parties for aerial images that allow us to efficiently and effectively analyze a homeowner's rooftop for solar energy system specifications. In the event that our current or future products require features that we have not developed or licensed, or we lose the benefit of an existing license, we will be required to develop or obtain such technology through purchase, license or other arrangements. If the required technology is not available on commercially reasonable terms, or at all, we may incur additional expenses in an effort to internally develop the required technology. In addition, our BrightPath software was developed, in part, with U.S. federal government funding. When new technologies are developed with U.S. government funding, the government obtains certain rights in any resulting patents, including a nonexclusive license authorizing the government to use the invention for non-commercial purposes. These rights may permit the government to disclose our confidential information to third parties and to exercise "march-in" rights to use or allow third parties to use our patented technology. We are also subject to certain reporting and other obligations to the U.S. government in connection with funding for BrightPath. If we were unable to maintain our existing proprietary technology, our ability to attract and retain solar partners could be impaired, our competitive position could be harmed and our revenue could be reduced.

Our business may be harmed if we fail to properly protect our intellectual property, and we may also be required to defend against claims or indemnify others against claims that our intellectual property infringes on the intellectual property rights of third parties.

We believe that the success of our business depends in part on our proprietary technology, including our software, information, processes and know-how. We rely on copyright, trade secret and patent protections to secure our intellectual property rights. Although we may incur substantial costs in protecting our technology, we cannot be certain that we have adequately protected or will be able to adequately protect it, that our competitors will not be able to utilize our existing technology or develop similar technology independently, that the claims allowed with respect to any patents held by us will be broad enough to protect our technology or that foreign intellectual property laws will adequately protect our intellectual property rights. Moreover, we cannot be certain that our patents provide us with a competitive advantage. Despite our precautions, it may be possible for third parties to obtain and use our intellectual property without our consent. Unauthorized use of our intellectual property by third parties, and the expenses incurred in protecting our intellectual property rights, may adversely affect our business. In the future, some of our products could be alleged to infringe existing patents or other intellectual property of third parties, and we cannot be certain that we will prevail in any intellectual property dispute. In addition, any future litigation required to enforce our patents, to protect our trade secrets or know-how or to defend us or indemnify others against claimed infringement of the rights of third parties could harm our business, financial condition and results of operations.

The Office of the Inspector General of the U.S. Department of the Treasury has issued subpoenas to a number of significant participants in the rooftop solar energy installation industry, including us. The subpoena we received requires us to deliver certain documents in our possession relating to our participation in the U.S. Treasury grant program. These documents have been delivered to the Office of the Inspector General of the U.S. Department of Treasury, which is investigating the administration and implementation of the U.S. Treasury grant program.

In July 2012, we and other companies that are significant participants in both the solar industry and the cash grant program (under Section 1603 of the American Recovery and Reinvestment Act of 2009) received subpoenas from the U.S. Department of the Treasury's Office of the Inspector General. Our subpoena requested, among other things, documents that relate to our applications for U.S. Treasury grants and communications with certain other solar service companies or certain firms that appraise solar energy property for U.S. Treasury grant application purposes. The Inspector General is working with the Civil Division of the U.S. Department of Justice to investigate the administration and implementation of the U.S. Treasury grant program, including possible misrepresentations concerning the fair market value of the solar power systems submitted for grant under that program made in grant applications by companies in the solar industry, including us. We produced documents and testimony as requested by the Inspector General, and we intend to continue to cooperate fully with the Inspector General and the Department of Justice. We are not able to predict how long this review will be on-going. If, at the conclusion of the investigation, the Inspector General concludes that misrepresentations were made, the Department of Justice could decide to bring a civil action to recover amounts it believes were improperly paid to us. If it were successful in asserting this action, we could be required to pay damages and penalties for any funds received based on such misrepresentations (which, in turn, could require us to make indemnity payments to certain of our fund investors). Additionally, the period of time necessary to resolve the investigation is uncertain, and this matter could require significant management and financial resources that could otherwise be devoted to the operation of our business.

We are subject to legal proceedings, regulatory inquiries and litigation, and we may be named in additional legal proceedings, become involved in regulatory inquiries or be subject to litigation in the future, all of which are costly, distracting to our core business and could result in an unfavorable outcome, or a material adverse effect on our business, financial condition, results of operations, or the trading price for our securities.

We are involved in legal proceedings and receive inquiries from government and regulatory agencies. For example, in addition to the pending U.S. Department of the Treasury investigation discussed above, in connection with its review of the Department of Treasury's Section 1603 program, which allows taxpayers to receive cash grants for certain qualified renewable energy projects, the United States Senate Committee on Finance and the House Committee on Ways and Means sent us an inquiry regarding our use of solar energy incentives, third-party financing, and methods of determining cost basis for solar energy properties, to which we have responded. In the event that we are involved in significant disputes or are the subject of a formal action by a regulatory agency, we could be exposed to costly and time consuming legal proceedings that could result in any number of outcomes. Although outcomes of such actions vary, any current or future claims or regulatory actions initiated by or against us, whether successful or not, could result in significant costs, costly damage awards or settlement amounts, injunctive relief, increased costs of business, fines or orders to change certain business practices, significant dedication of management time, diversion of significant operational resources, or otherwise harm our business.

If we are not successful in our legal proceedings and litigation, we may be required to pay significant monetary damages, which could hurt our results of operations. Lawsuits are time-consuming and expensive to resolve and divert management's time and attention. Although we carry general liability insurance, our insurance may not cover potential claims or may not be adequate to indemnify us for all liability that may be imposed. We cannot predict how the courts will rule in any potential lawsuit against us. Decisions in favor of parties that bring lawsuits against us could subject us to significant liability for damages, adversely affect our results of operations and harm our reputation.

A failure to comply with laws and regulations relating to our interactions with current or prospective residential customers could result in negative publicity, claims, investigations, and litigation, and adversely affect our financial performance.

Our business involves transactions with homeowners. We must comply with numerous federal, state and local laws and regulations that govern matters relating to our interactions with homeowners, including those pertaining to privacy and data security, consumer financial and credit transactions, home improvement contracts,

warranties and direct-to-home solicitation. These laws and regulations are dynamic and subject to potentially differing interpretations, and various federal, state and local legislative and regulatory bodies may expand current laws or regulations, or enact new laws and regulations, regarding these matters. Changes in these laws or regulations or their interpretation could dramatically affect how we do business, acquire customers, and manage and use information we collect from and about current and prospective customers and the costs associated therewith. We strive to comply with all applicable laws and regulations relating to our interactions with residential customers. It is possible, however, that these requirements may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other rules or our practices. Our noncompliance with any such laws or regulations, or the perception that we or our solar partners have violated such laws or regulations or engaged in deceptive practices that could result in a violation, could also expose us to claims, proceedings, litigation and investigations by private parties and regulatory authorities, as well as substantial fines and negative publicity, each of which may materially and adversely affect our business. We have incurred, and will continue to incur, significant expenses to comply with such laws and regulations, and increased regulation of matters relating to our interactions with residential customers could require us to modify our operations and incur significant additional expenses, which could have an adverse effect on our business, financial condition and results of operations.

Compliance with occupational safety and health requirements and best practices can be costly, and noncompliance with such requirements may result in potentially significant penalties, operational delays and adverse publicity.

The installation of solar energy systems requires our employees and employees of our solar partners to work with complicated and potentially dangerous electrical systems. The evaluation and installation of our energy-related products require these employees to work in locations that may contain potentially dangerous levels of asbestos, lead or mold or other substances. We also maintain large fleets of vehicles that these employees use in the course of their work. There is substantial risk of serious injury or death if proper safety procedures are not followed. Our operations are subject to regulation under the U.S. Occupational Safety and Health Act ("OSHA") and equivalent state laws. Changes to OSHA requirements, or stricter interpretation or enforcement of existing laws or regulations, could result in increased costs. If we fail to comply with applicable OSHA regulations, even if no work-related serious injury or death occurs, we may be subject to civil or criminal enforcement and be required to pay substantial penalties, incur significant capital expenditures, or suspend or limit operations. Any accidents, citations, violations, injuries or failure to comply with industry best practices may subject us to adverse publicity, damage our reputation and competitive position and adversely affect our business.

We are exposed to the credit risk of homeowners and payment delinquencies on our accounts receivables.

Our Customer Agreements are typically for 20 years and require the homeowner to make monthly payments to us. Accordingly, we are subject to the credit risk of homeowners. As of March 31, 2018, the average FICO score of our customers under a lease or power purchase agreement with a monthly payment schedule remained at or above 740, which is generally categorized as a "Very Good" credit profile by the Fair Isaac Corporation. However, this may decline to the extent FICO score requirements under future investment funds are relaxed. While to date homeowner defaults have been immaterial, we expect that the risk of homeowner defaults may increase as we grow our business. Due to the immaterial amount of homeowner defaults to date, our reserve for this exposure is minimal, and our future exposure may exceed the amount of such reserves. If we experience increased homeowner credit defaults, our revenues and our ability to raise new investment funds could be adversely affected. If economic conditions worsen, certain of our homeowners may face liquidity concerns and may be unable to satisfy their payment obligations to us on a timely basis or at all, which could have a material adverse effect on our financial condition and results of operations.

Obtaining a sales contract with a potential customer does not guarantee that a potential customer will not decide to cancel or that we will need to cancel due to a failed inspection, which could cause us to generate no revenue from a product and adversely affect our results of operations.

Even after we secure a sales contract with a potential customer, we (either directly or through our solar partners) must perform an inspection to ensure the home, including the rooftop, meets our standards and specifications. If the inspection finds repairs to the rooftop are required in order to satisfy our standards and specifications to install the solar energy system, and a potential customer does not want to make such required repairs, we would lose that anticipated sale. In addition, per the terms of our Customer Agreements, a customer maintains the ability to cancel before commencement of installation, subject to certain conditions. Any delay or

cancellation of an anticipated sale could materially and adversely affect our financial results, as we may have incurred significant expense and generated no revenue.

The requirements of being a public company may strain our resources, divert management's attention and affect our ability to attract and retain qualified board members and officers.

We are subject to the reporting requirements of the Exchange Act, the listing requirements of the NASDAQ Stock Market and other applicable securities rules and regulations. Compliance with these rules and regulations has increased our legal and financial compliance costs, made some activities more difficult, time-consuming or costly and increased demand on our systems and resources. The Exchange Act requires, among other things, that we file annual, quarterly and current reports with respect to our business and results of operations and maintain effective disclosure controls and procedures and internal control over financial reporting. To maintain and improve our disclosure controls and procedures and internal control over financial reporting to meet this standard, significant resources and management oversight may be required. As a result, management's attention may be diverted from other business concerns, which could harm our business and results of operations. Although we have already hired additional employees to comply with these requirements, we may need to hire more employees in the future, which will increase our costs and expenses.

We use "open source" software in our solutions, which may require that we release the source code of certain software subject to open source licenses or subject us to possible litigation or other actions that could adversely affect our business.

We utilize software that is licensed under so-called "open source," "free" or other similar licenses. Open source software is made available to the general public on an "as-is" basis under the terms of a non-negotiable license. We currently combine our proprietary software with open source software but not in a manner that we believe requires the release of the source code of our proprietary software to the public. However, our use of open source software may entail greater risks than use of third-party commercial software. Open source licensors generally do not provide warranties or other contractual protections regarding infringement claims or the quality of the code. In addition, if we combine our proprietary software with open source software in a certain manner, we could, under certain open source licenses, be required to release the source code of our proprietary software to the public. This would allow our competitors to create similar offerings with lower development effort and time.

We may also face claims alleging noncompliance with open source license terms or infringement or misappropriation of proprietary software. These claims could result in litigation, require us to purchase a costly license or require us to devote additional research and development resources to change our software, any of which would have a negative effect on our business and results of operations. In addition, if the license terms for open source software that we use change, we may be forced to re-engineer our solutions, incur additional costs or discontinue the use of these solutions if re-engineering cannot be accomplished on a timely basis. Although we monitor our use of open source software to avoid subjecting our offerings to unintended conditions, few courts have interpreted open source licenses, and there is a risk that these licenses could be construed in a way that could impose unanticipated conditions or restrictions on our ability to use our proprietary software. We cannot guarantee that we have incorporated or will incorporate open source software in our software in a manner that will not subject us to liability or in a manner that is consistent with our current policies and procedures.

Any security breach or unauthorized disclosure or theft of personal information we gather, store and use, or other hacking and phishing attacks on our systems, could harm our reputation and subject us to claims or litigation.

We receive, store and use personal information of homeowners, including names, addresses, e-mail addresses, credit information and other housing and energy use information, as well as the personal information of our employees. Unauthorized disclosure of such personal information, whether through breach of our systems by an unauthorized party, employee theft or misuse, or otherwise, could harm our business. In addition, computer malware, viruses, social engineering (predominantly spear phishing attacks), and general hacking have become more prevalent, have occurred on our systems in the past, and could occur on our systems in the future. Inadvertent disclosure of such personal information, or if a third party were to gain unauthorized access to the personal information in our possession, could result in claims or litigation arising from damages suffered by such individuals. In addition, we could incur significant costs in complying with the multitude of federal, state and local laws regarding the unauthorized disclosure of personal information. Our efforts to protect such personal information may be unsuccessful due to software bugs or other technical malfunctions; employees, contractor, or vendor error

or malfeasance; or other threats that evolve. In addition, third parties may attempt to fraudulently induce employees or users to disclose sensitive information. Although we have developed systems and processes that are designed to protect the personal information we receive, store and use and to prevent or detect security breaches, we cannot assure you that such measures will provide absolute security. Finally, any perceived or actual unauthorized disclosure of such information could harm our reputation, substantially impair our ability to attract and retain homeowners and have an adverse impact on our business.

If our products do not work as well as planned or if we are unsuccessful in developing and selling new products or in penetrating new markets, our business, financial condition and results of operations could be adversely affected.

Our success and ability to compete are dependent on the products which we have developed or may develop in the future. There is a risk that the products that we have developed or may develop may not work as intended, or that the marketing of the products may not be as successful as anticipated. For example, we introduced our Brightbox energy storage system in Hawaii and California and completed the first installation in Hawaii in May 2016. If Brightbox does not work as intended or if Brightbox is not adopted in the future at the rate we expect, our business, financial condition and results of operations could be adversely affected. The development of new products generally requires substantial investment and can require long development and testing periods before they are commercially viable. We intend to continue to make substantial investments in developing new products and it is possible that that we may not develop or acquire new products or product enhancements that compete effectively within our target markets or differentiate our products based on functionality, performance or cost and thus our new technologies and products may not result in meaningful revenue. In addition, any delays in developing and releasing new or enhanced products could cause us to lose revenue opportunities and potential customers. Any technical flaws in product releases could diminish the innovative impact of our products and have a negative effect on customer adoption and our reputation. If we fail to introduce new products that meet the demands of our customers or target markets or do not achieve market acceptance, or if we fail to penetrate new markets, our business, financial conditions and results of operations could be adversely affected.

We are obligated to maintain proper and effective internal controls over financial reporting. We may not complete our analysis of our internal controls over financial reporting in a timely manner, or these internal controls may not be determined to be effective, which may adversely affect investor confidence in our company and, as a result, the value of our common stock.

We are required, pursuant to the Exchange Act, to furnish a report by management on, among other things, the effectiveness of our internal controls over financial reporting. This assessment will need to include disclosure of any material weaknesses identified by our management in our internal controls over financial reporting. When we are no longer an emerging growth company, our management report on internal control over financial reporting will need to be attested to by our independent registered public accounting firm. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud will be detected.

We may fail to establish and maintain effective internal control over financial reporting, in which case we may not detect errors on a timely basis and our consolidated financial statements may be materially misstated. In addition, we cannot guarantee that our internal control over financial reporting will prevent or detect all errors and fraud. The risk of errors is increased in light of the complexity of our business and investment funds. For example, we must deal with significant complexity in accounting for our fund structures and the resulting allocation of net income (loss) between our stockholders and noncontrolling interests under the hypothetical liquidation at book value ("HLBV") method as well as the income tax consequences of these fund structures. As we enter into additional investment funds, which may have contractual provisions different from those of our existing funds, the analysis as to whether we consolidate these funds, the calculation under the HLBV method, and the analysis of the tax impact could become increasingly complicated. This additional complexity could require us to hire additional resources and increase the chance that we experience errors in the future.

Historically, in connection with the audits of our consolidated financial statements for the years ended December 31, 2013 and 2012, we identified material weaknesses in our internal control over financial reporting relating to certain aspects of our financial statement close process and our accounting for income taxes. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company's annual or interim financial statements

will not be prevented or detected on a timely basis. These material weaknesses resulted from an aggregation of deficiencies.

In addition, in the 2013 consolidated financial statements, we incorrectly accounted for our deferred tax liabilities, prepaid tax asset and the related amortization as it related to income taxes incurred on intercompany transactions. The foregoing resulted in the restatement of our 2012 consolidated financial statements. Subsequent to the quarter ended March 31, 2015, we also identified and corrected an immaterial error related to the accounting for taxes on intercompany transactions.

While we were able to determine in our management's report for fiscal years 2016 and 2017 that our internal control over financial reporting is effective, we may not be able to complete our evaluation, testing and any required remediation in a timely fashion in future fiscal years. During the evaluation and testing process, if we identify one or more material weaknesses in our internal control over financial reporting that we are unable to remediate before the end of the same fiscal year in which the material weakness is identified, we will be unable to assert that our internal controls are effective. If we are unable to assert that our internal control over financial reporting is effective, we could lose investor confidence in the accuracy and completeness of our financial reports, which would cause the price of our common stock to decline. In addition, we could become subject to investigations by the NASDAQ Stock Market, the SEC or other regulatory authorities, which could require additional management attention and which could adversely affect our business.

Our reported financial results may be affected, and comparability of our financial results with other companies in our industry may be impacted, by changes in the accounting principles generally accepted in the United States.

Generally accepted accounting principles in the United States are subject to change and interpretation by the Financial Accounting Standards Board, or FASB, the Securities and Exchange Commission, or SEC, and various bodies formed to promulgate and interpret appropriate accounting principles. A change in these principles or interpretations could have a significant effect on our reported financial results and on the financial results of other companies in our industry, and may even affect the reporting of transactions completed before the announcement or effectiveness of a change. For example, in May 2014 the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606), which will affect certain elements of our accounting for revenue and costs incurred to acquire contracts when this standard becomes effective for us in 2018. Other companies in our industry may be affected differently by the adoption of Topic 606 or other new accounting standards, including timing of the adoption of new accounting standards, adversely affecting the comparability of our financial statements. See Note 2—Summary of Significant Accounting Policies for information about Topic 606.

We may be adversely affected by changes in U.S. tax laws.

On December 22, 2017 Congress and the current administration passed significant tax reform legislation including a change to the corporate tax rate. As part of this tax reform, the current corporate income tax rate was reduced, and there were other changes including limiting or eliminating various other deductions, credits and tax preferences. This reduction in the corporate income tax rate could reduce the value of certain benefits, such as depreciation, and reduce capacity for other benefits, such as tax credits. Limitations on, or elimination of, such tax benefits could significantly impact our ability to raise tax equity investment funds or impact the terms thereof, including the amount of cash distributable to third parties. At this time, the Company is estimating the potential impact on our tax equity investment funds, business, prospects and results of operations as a result of enactment, since the impact is dependent upon certain tax treatment elections and the specific timing of taxable income/losses in future years. The new legislation includes significant changes which require additional guidance to be issued by the IRS.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

As of December 31, 2017, we had U.S. federal net operating loss carryforwards of \$699.6 million and state net operating loss carryforwards of \$634.7 million, which begin expiring in varying amounts in 2028 and 2024, respectively, if unused. Under Sections 382 and 383 of the Code if a corporation undergoes an "ownership change," the corporation's ability to use its pre-change net operating loss carryforwards and other pre-change tax attributes, such as research tax credits, to offset its post-change income and taxes may be limited. In general, an "ownership change" occurs if there is a cumulative change in our ownership by "5% shareholders" that exceeds 50 percentage points over a rolling three-year period. Similar rules may apply under state tax laws. Any such limitations on our ability to use our net operating loss carryforwards and other tax assets could adversely impact our business, financial condition and results of operations.

We may be required to record a charge to earnings if our goodwill or intangible assets become impaired.

We are required under generally accepted accounting principles to test goodwill for impairment at least annually or when events or changes in circumstances indicate that the carrying amount may be impaired, and to review our intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Factors that can lead to impairment of goodwill and intangible assets include significant adverse changes in the business climate and actual or projected operating results, declines in the financial condition of our business and sustained decrease in our stock price. As of December 31, 2017, our market capitalization did not exceed our carrying value and we performed a step 1 analysis in accordance with ASU 350 *Intangibles - Goodwill and Other* and determined that our fair value exceeded our carrying value and thus we did not have an impairment related to our goodwill. However, if we identify any factors that could indicate an impairment, including a sustained decrease in our stock price, we may be required to record charges to earnings if our goodwill becomes impaired.

Risks Related to Ownership of Our Common Stock

Our executive officers, directors and principal stockholders continue to have substantial control over us, which will limit your ability to influence the outcome of important matters, including a change in control.

Each of our executive officers, directors and each of our stockholders who beneficially own 5% or more of our outstanding common stock and their affiliates, in the aggregate, beneficially own approximately 55.1% of the outstanding shares of our common stock, based on the number of shares outstanding as of March 31, 2018. As a result, these stockholders, if acting together, will be able to influence or control matters requiring approval by our stockholders, including the election of directors and the approval of mergers, acquisitions or other extraordinary transactions. They may also have interests that differ from yours and may vote in a way with which you disagree and which may be adverse to your interests. This concentrated control may have the effect of delaying or preventing a change in control of our company, could deprive our stockholders of an opportunity to receive a premium for their capital stock and might ultimately affect the market price of our common stock.

The market price of our common stock has been and may continue to be volatile, and you could lose all or part of your investment.

The trading price of our common stock has been volatile since our initial public offering, and is likely to continue to be volatile. Factors that could cause fluctuations in the market price of our common stock include the following:

- price and volume fluctuations in the overall stock market from time to time;
- volatility in the market prices and trading volumes of companies in our industry or companies that investors consider comparable;
- changes in operating performance and stock market valuations of other companies generally, or those in our industry in particular;
- sales of shares of our common stock by us or our stockholders;
- failure of securities analysts to maintain coverage of us, changes in financial estimates by securities analysts who follow us, or our failure to meet these estimates or the expectations of investors;
- the financial projections we may provide to the public, any changes in those projections or our failure to meet those projections;
- announcements by us or our competitors of new products or services;
- the public's reaction to our press releases, other public announcements and filings with the SEC;
- rumors and market speculation involving us or other companies in our industry;
- actual or anticipated changes in our results of operations;
- changes in tax and other incentives that we rely upon in order to raise tax equity investment funds;
- changes in the regulatory environment and utility policies and pricing, including those that could reduce the savings we are able to offer to customers;
- actual or anticipated developments in our business, our competitors' businesses or the competitive landscape generally;
- litigation involving us, our industry or both, or investigations by regulators into our operations or those of our competitors;
- announced or completed acquisitions of businesses or technologies by us or our competitors;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidelines, interpretations or principles;
- any significant change in our management; and
- general economic conditions and slow or negative growth of our markets.

Further, in recent years the stock markets have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. These fluctuations often have been unrelated or disproportionate to the operating performance of those companies. In addition, the stock prices of many renewable energy companies have experienced wide fluctuations that have often been unrelated to the operating performance of those companies. These broad market and industry fluctuations, as well as general economic, political and market conditions such as recessions, government shutdowns, interest rate changes, or international currency fluctuations, may cause the market price of our common stock to decline. In the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. We are party to litigation which could result in substantial costs and a diversion of our management's attention and resources.

Sales of a substantial number of shares of our common stock in the public market, including by our existing stockholders, could cause our stock price to fall.

Sales of a substantial number of shares of our common stock in the public market, or the perception that these sales might occur, could depress the market price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. We are unable to predict the effect that these sales and others may have on the prevailing market price of our common stock.

In addition, certain of our stockholders have registration rights that would require us to register shares of our capital stock owned by them for public sale in the United States. We have also filed a registration statement to register shares of our common stock reserved for future issuance under our equity compensation plans. Subject to the satisfaction of applicable exercise periods and applicable volume and restrictions that apply to affiliates, the shares of our common stock issued upon exercise of outstanding options will become available for immediate resale in the public market upon issuance.

Future sales of our common stock may make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate. These sales also could cause the market price of our common stock to decline and make it more difficult for you to sell shares of our common stock.

Anti-takeover provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

Our amended and restated certificate of incorporation, amended and restated bylaws and Delaware law contain provisions which could have the effect of rendering more difficult, delaying, or preventing an acquisition deemed undesirable by our board of directors and therefore depress the trading price of our common stock. Among other things, our amended and restated certificate of incorporation and amended and restated bylaws include provisions:

- creating a classified board of directors whose members serve staggered three-year terms;
- authorizing "blank check" preferred stock, which could be issued by our board of directors without stockholder approval and may contain voting, liquidation, dividend and other rights superior to our common stock;
- limiting the liability of, and providing indemnification to, our directors and officers;
- limiting the ability of our stockholders to call and bring business before special meetings;
- requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our board of directors; and
- controlling the procedures for the conduct and scheduling of board of directors and stockholder meetings.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation law, which prevents certain stockholders holding more than 15% of our outstanding capital stock from engaging in certain business combinations without approval of the holders of at least two-thirds of our outstanding capital stock not held by such stockholder.

Any provision of our amended and restated certificate of incorporation, amended and restated bylaws or Delaware law that has the effect of delaying or preventing a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our capital stock and could also affect the price that some investors are willing to pay for our common stock.

Provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws limit the ability of our stockholders to call special meetings and prohibit stockholder action by written consent.

Our amended and restated certificate of incorporation provides that our stockholders may not take action by written consent. Instead, any such actions must be taken at an annual or special meeting of our stockholders. As a result, our stockholders are not able to take any action without first holding a meeting of our stockholders called in accordance with the provisions of our amended and restated bylaws, including advance notice procedures set forth in our amended and restated bylaws. Our amended and restated bylaws further provide that special meetings of our stockholders may be called only by a majority of our board of directors, the chairman of our board of directors, our Chief Executive Officer or our President. As a result, our stockholders are not allowed to call a special meeting. These provisions may delay the ability of our stockholders to force consideration of a stockholder proposal, including a proposal to remove directors.

Provisions contained in our amended and restated certificate of incorporation and amended and restated bylaws could preclude our stockholders from bringing matters before meetings of stockholders and delay changes in our board of directors.

Our amended and restated bylaws provide advance notice procedures for stockholders seeking to bring business before, or nominate candidates for election as directors at, our annual or special meetings of stockholders. In addition, our amended and restated certificate of incorporation provides that stockholders may remove directors only for cause. Any amendment of these provisions in our amended and restated bylaws or amended and restated certificate of incorporation would require approval by holders of at least 66 2/3% of our then outstanding capital stock. These provisions could preclude our stockholders from bringing matters before annual or special meetings of stockholders and delay changes in our board of directors.

Our amended and restated bylaws provide that a state or federal court located within the State of Delaware will be the sole and exclusive forum for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or employees.

Our amended and restated bylaws provide that, unless we consent to the selection of an alternative forum, the sole and exclusive forum for (i) any derivative action or proceeding brought on our behalf, (ii) any action asserting a claim of breach of fiduciary duty owed by any of our directors, officers or other employees to us or to our stockholders, (iii) any action asserting a claim arising pursuant to any provision of the Delaware General Corporation Law or (iv) any action asserting a claim governed by the internal affairs doctrine shall be a state or federal court located within the state of Delaware, in all cases subject to the court's having personal jurisdiction over the indispensable parties named as defendants. The choice of forum provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and other employees. Alternatively, if a court were to find the choice of forum provision contained in our amended and restated bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, results of operations and financial condition.

If securities or industry analysts cease publishing research or reports about us, our business, our market or our competitors, or if they adversely change their recommendations regarding our common stock, the market price of our common stock and trading volume could decline.

The market for our common stock is influenced by the research and reports that securities or industry analysts publish about us, our business, our market or our competitors. If any of the analysts who cover us adversely change their recommendations regarding our common stock, or provide more favorable recommendations about our competitors, the market price of our common stock would likely decline. If any of the analysts who cover us cease coverage of our company or fail to regularly publish reports on us, we could lose

visibility in the financial markets, which in turn could cause the market price of our common stock and trading volume to decline.

We do not expect to declare any dividends in the foreseeable future.

We do not anticipate declaring any cash dividends to holders of our common stock in the foreseeable future. Consequently, investors may need to rely on sales of our common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment. Investors seeking cash dividends should not purchase shares of our common stock.

Additional stock issuances could result in significant dilution to our stockholders.

We may issue additional equity securities to raise capital, make acquisitions or for a variety of other purposes. Additional issuances of our stock may be made pursuant to the exercise or conversion of new or existing convertible debt securities, warrants, stock options or other equity incentive awards to new and existing service providers. Any such issuances will result in dilution to existing holders of our stock. We rely on equity-based compensation as an important tool in recruiting and retaining employees. The amount of dilution due to equity-based compensation of our employees and other additional issuances could be substantial.

As an emerging growth company within the meaning of the Securities Act, we will utilize certain modified disclosure requirements, and we cannot be certain if these reduced requirements will make our common stock less attractive to investors.

We are an emerging growth company, and, for as long as we continue to be an emerging growth company, we may choose to take advantage of exemptions from various reporting requirements applicable to other public companies but not to "emerging growth companies." These exemptions include not being required to have our independent registered public accounting firm audit our internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. We are utilizing, and we plan in future filings with the SEC to continue to utilize, the modified disclosure requirements available to emerging growth companies. As a result, our stockholders may not have access to certain information they may deem important. We could remain an "emerging growth company" for up to five years following the anniversary of our initial public offering, or until the earliest of (1) the last day of the first fiscal year in which our annual gross revenue reaches or exceeds \$1.07 billion, (2) the date that we become a "large accelerated filer" as defined in the Exchange Act, which could occur as early as January 1, 2019 or (3) the date on which we have issued more than \$1.0 billion in non-convertible debt securities during the preceding three-year period.

(b) Notwithstanding any provision to the contrary, the terms of any Revolving Loan to be made hereunder on any Advance Date shall be the same as the terms of the Revolving Loans of the same Type outstanding at such time and shall constitute one tranche with, and be the same Class as, the Revolving Loans made on the Closing Date or any other Advance Date that are of the same Type.

(c) The Borrower shall deliver a Borrowing Notice to the Administrative Agent for its approval no later than 10:00 a.m. (New York City time) at least five (5) Business Days in advance of the proposed funding date (which may be the Closing Date) (or such shorter timeframe as may be agreed to by the Administrative Agent in its sole discretion); provided, that the first such Borrowing Notice delivered following the date of this Agreement may be delivered at least three (3) Business Days in advance of the proposed funding date. (g) The Borrower may, from time to time upon at least five (5) Business Days' notice, permanently reduce the Revolving Loan Commitment by the amount specified in such notice.

Credit, for the Borrower's account, at any time during the LC Availability Period solely for the purposes of satisfying the Debt Service Reserve Required Amount (and the Issuing Bank shall refuse to issue a Letter of Credit for any other purpose). Letters of Credit issued hereunder shall constitute utilization of the total aggregate LC Commitment and at any time the LC Exposure of all LC Lenders at such time shall not exceed the total aggregate LC Commitment of all LC Lenders. The Issuing Bank will make available to the beneficiary thereof the original of the Letter of Credit issued by it hereunder and any subsequent modifications or amendments thereto.

(ii) Immediately upon the issuance of a Letter of Credit (or an amendment to a Letter of Credit increasing the amount thereof) by the Issuing Bank and without any further action on the part of the Issuing Bank or the LC Lenders, each LC Lender shall be deemed to have purchased, and hereby agrees to irrevocably purchase, from the Issuing Bank a participation in such Letter of Credit and any drawings honored thereunder in an amount equal to such LC Lender's pro rata share (determined as the percentage which such LC Lender's LC Commitment then constitutes of the aggregate LC Commitments) of the Stated Amount under such Letter of Credit.

(iii) Each Letter of Credit shall (A) be denominated in Dollars, (B) expire no later than the earlier of (x) the 5th anniversary of its date of issuance and (y) the Maturity Date and (C) be issued subject to "Uniform Customs and Practice for Documentary Credits" (2007 Revision), International Chamber of Commerce, Publication No. 600 or "International Standby Practices 1998", International Chamber of Commerce, Publication No. 590, as mutually agreed between the Borrower, the Administrative Agent and the applicable Issuing Bank.

(b) Notice of LC Activity.

(i) Subject to Section 2.02(d), the Borrower may request (A) the issuance or extension of any Letter of Credit and (B) any decrease or increase in the Stated Amount thereof by delivering to the Administrative Agent and the Issuing Bank an irrevocable written notice in the form of Exhibit C-2, appropriately completed (a "Notice of LC Activity"), which shall specify, among other things: the particulars of the Letter of Credit to be issued, extended or amended, including the (1) the proposed issuance, extension or amendment date of the requested Letter of Credit (which shall be a Business Day); (2) the requested Stated Amount of the Letter of Credit or the amount by which such Stated Amount is to be decreased or increased (as applicable), (3) the expiry date thereof; (4) the name and address of the beneficiary thereof; (5) the documents to be presented by such beneficiary in case of any drawing thereunder; (6) the full text of any certificate to be presented by such beneficiary in case of any drawing thereunder; and (7) and, in the case of an amendment, the Letter of Credit to be amended, the nature of the amendment and the written confirmation of the beneficiary of such Letter of Credit confirming a decrease or increase in the Stated Amount of such Letter of Credit; provided, however, that in no instance may any request for a Letter of Credit or the increase in the Stated Amount of a

Letter of Credit cause the LC Exposure of all LC Lenders to exceed the total aggregate LC Commitment. The Borrower shall deliver the Notice of LC Activity to the Administrative Agent (with a copy to the Issuing Bank) by 11:00 a.m. at least five (5) Business Days before the date of issuance, extension, increase or decrease of the Stated Amount of the Letter of Credit. Additionally, the Borrower shall furnish to the applicable Issuing Bank and the Administrative Agent such other documents and information pertaining to such requested Letter of Credit issuance, extension or amendment, including any LC Documents, as such Issuing Bank or the Administrative Agent may reasonably require.

(ii) Promptly after receipt of any LC Application, the applicable Issuing Bank will confirm with the Administrative Agent that the Administrative Agent has received a copy of such LC Application from the Borrower and, if not, such Issuing Bank will provide the Administrative Agent with a copy thereof. Upon receipt by such Issuing Bank of confirmation from the Administrative Agent that the requested issuance or amendment is permitted in accordance with the terms hereof, then, upon (x) the amendment date, in the case of a requested increase or decrease of the Stated Amount under a Letter of Credit, or (y) the date specified as being the date requested for issuance or extension, in the case of the issuance or extension of a Letter of Credit, in each case as the applicable date is specified in such Notice of LC Activity, subject to the terms and conditions set forth in this Agreement (including Section 2.02(d) and the applicable conditions precedent set forth in Section 9.03), the Issuing Bank shall, by amendment to the Letter of Credit, adjust the Stated Amount thereof downward or upward, as applicable, to reflect the decrease or increase, as applicable, or issue or extend the Letter of Credit, in each case as specified in such Notice of LC Activity. Upon the issuance of any Letter of Credit by the Issuing Bank or amendment or modification to a Letter of Credit, (1) the Issuing Bank shall promptly notify the Administrative Agent of such issuance, extension or amendment and (2) the Administrative Agent shall then promptly notify each applicable LC Lender of such issuance, extension or amendment and each such notice shall be accompanied by a copy of such Letter of Credit or amendment or modification to a Letter of Credit and the amount of each applicable LC Lender's respective participation in such Letter of Credit.

(c) Drawing Payment, Funding of Participations, Funding LC Loans and Reimbursement

(i) The Issuing Bank shall, within a reasonable time following its receipt thereof, examine all documents purporting to represent a demand for payment under a Letter of Credit so as to ascertain whether such documents appear on their face to be in accordance with the terms and conditions of such Letter of Credit. Any Drawing Payment with respect to a Letter of Credit shall reduce the Stated Amount thereof dollar for dollar. As between Borrower and Issuing Bank, Borrower assumes all risks of the acts and omissions of, or misuse of the Letters of Credit issued by Issuing Bank, by the respective beneficiaries of such Letters of Credit.

In furtherance and not in limitation of the foregoing, Issuing Bank shall not be responsible for: (i) the form, validity, sufficiency, accuracy, genuineness or legal effect of any document submitted by any party in connection with the application for and issuance of any such Letter of Credit, even if it should in fact prove to be in any or all respects invalid, insufficient, inaccurate, fraudulent or forged; (ii) the validity or sufficiency of any instrument transferring or assigning or purporting to transfer or assign any such Letter of Credit or the rights or benefits thereunder or proceeds thereof, in whole or in part, which may prove to be invalid or ineffective for any reason; (iii) failure of the beneficiary of any such Letter of Credit to comply fully with any conditions required in order to draw upon such Letter of Credit; (iv) errors, omissions, interruptions or delays in transmission or delivery of any messages, by mail, cable, telegraph, telex or otherwise, whether or not they be in cipher; (v) errors in interpretation of technical terms; (vi) any loss or delay in the transmission or otherwise of any document required in order to make a drawing under any such Letter of Credit or of the proceeds thereof; (vii) the misapplication by the beneficiary of any such Letter of Credit of the proceeds of any drawing under such Letter of Credit; or (viii) any consequences arising from causes beyond the control of Issuing Bank, including any acts or omissions by any Governmental Authority; none of the above shall affect or impair, or prevent the vesting of, any of Issuing Bank's rights or powers hereunder. Without limiting the foregoing and in furtherance thereof, any action taken or omitted by Issuing Bank under or in connection with the Letters of Credit or any documents and certificates delivered thereunder, if taken or omitted in good faith, shall not give rise to any liability on the part of Issuing Bank to Borrower. Notwithstanding anything to the contrary contained in this Section 2.02(c)(i), Borrower shall retain any and all rights it may have against Issuing Bank for any liability arising solely out of the gross negligence or willful misconduct of Issuing Bank as determined by a final, non-appealable judgment of a court of competent jurisdiction.

(ii) If the Issuing Bank shall make any Drawing Payment, it shall provide notice thereof to the Borrower and the Administrative Agent by telephone (confirmed telecopy) (provided that the failure to deliver such notice shall not relieve Borrower of its obligation to reimburse the Issuing Bank in accordance with this Agreement), that such Drawing Payment has been made and the Borrower shall reimburse the Issuing Bank in respect of such Drawing Payment by paying to the Administrative Agent an amount equal to such Drawing Payment and any interest accrued pursuant to Section 2.02(g) not later than 11:00 a.m., on the Business Day (the "Reimbursement Date") that is one Business Day following the date on which the Drawing Payment is made; provided, anything contained herein to the contrary notwithstanding, unless Borrower shall have notified Administrative Agent and the Issuing Bank prior to 12:00 p.m. (New York City time) on the date such Drawing Payment is made that Borrower intends to reimburse the Issuing Bank for the amount of such Drawing Payment with funds other than the proceeds of LC Loans, Borrower shall be deemed to have requested on the date that such Drawing

Payment is made that its obligation to reimburse such Drawing Payment be financed by the LC Lenders through a borrowing of LC Loans on the Reimbursement Date in an amount in Dollars equal to the amount of such Drawing Payment and each LC Lender shall, on the Reimbursement Date with respect to such Drawing Payment make loans (“LC Loans”) ratably (based on the percentage which such LC Lender’s LC Commitment then constitutes of the total aggregate LC Commitments) in an aggregate amount equal to such Drawing Payment, the proceeds of which shall be applied directly by Administrative Agent to reimburse the Issuing Bank for the amount of such honored drawing; and provided further, if for any reason proceeds of LC Loans are not received by the Issuing Bank on the date of such Drawing Payment in an amount equal to the amount of such Drawing Payment, Borrower shall reimburse the Issuing Bank, on demand, in an amount in same day funds equal to the excess of the amount of such Drawing Payment over the aggregate amount of such applicable LC Loans, if any, which are so received. All such Loans shall be secured by the Collateral Documents as if made directly to the Borrower and shall initially be Base Rate Loans until converted in accordance with Section 2.03. LC Loans that have been repaid may not be re-borrowed.

(iii) Immediately upon the issuance of each Letter of Credit, each LC Lender shall be deemed to have purchased, and hereby agrees to irrevocably purchase, from Issuing Bank a participation in such Letter of Credit and any drawings honored thereunder in an amount equal to such LC Lender’s pro rata share (determined as the percentage which such LC Lender’s LC Commitment then constitutes of the aggregate LC Commitments) of the maximum amount which is or at any time may become available to be drawn thereunder. In the event that the Borrower shall fail for any reason to reimburse the Issuing Bank as provided in clause (ii) above on the applicable Reimbursement Date, the (A) Issuing Bank shall promptly notify the Administrative Agent of the unreimbursed amount of such Drawing Payment with respect to a Letter of Credit and each LC Lender’s respective participation therein and (B) then the Administrative Agent shall promptly notify each LC Lender of the unreimbursed amount of such Drawing Payment with respect to a Letter of Credit and such LC Lender’s respective participation therein. Each LC Lender hereby absolutely and unconditionally agrees to pay to the Administrative Agent, for the account of the Issuing Bank, such LC Lender’s pro rata share (determined as the percentage which such LC Lender’s LC Commitment then constitutes of the aggregate LC Commitments) of each such Drawing Payment on a Letter of Credit within one Business Day after receiving notice. Each such payment shall be made without any offset, abatement, withholding or reduction whatsoever. In the event that any LC Lender fails to make available to Issuing Bank on such business day the amount of such LC Lender’s participation in such Letter of Credit as provided in this Section 2.02(c)(iii), Issuing Bank shall be entitled to recover such amount on demand from such Lender together with interest thereon for three Business Days at the rate customarily used by Issuing Bank for the correction of errors among banks and thereafter at LIBOR. Nothing in this Section 2.02(c)(iii) shall be deemed to prejudice

the right of any LC Lender to recover from Issuing Bank any amounts made available by such LC Lender to Issuing Bank pursuant to this Section 2.02(c)(iii) in the event that the payment with respect to a Letter of Credit in respect of which payment was made by such LC Lender constituted gross negligence or willful misconduct on the part of Issuing Bank. In the event Issuing Bank shall have been reimbursed by other LC Lenders pursuant to this Section 2.02(c)(iii) for all or any portion of any drawing honored by Issuing Bank under a Letter of Credit, such Issuing Bank shall distribute to each LC Lender which has paid all amounts payable by it under this Section 2.02(c)(iii) with respect to such honored drawing such LC Lender's pro rata share (determined as the percentage which such LC Lender's participation in the reimbursed Drawing Payment then constitutes of the aggregate reimbursed Drawing Payment) of all payments subsequently received by Issuing Bank from Borrower in reimbursement of such honored drawing when such payments are received. Any such distribution shall be made to an LC Lender at its primary address set forth below its name on Appendix B or at such other address as such Lender may request.

In the event the Issuing Bank shall have been reimbursed by the applicable LC Lenders pursuant to this Section 2.02(c)(iii) for all or any portion of any Drawing Payment, the Issuing Bank shall distribute to each applicable LC Lender which has paid all amounts payable by it under this Section 2.02(c)(iii) such LC Lender's pro rata share (determined as the percentage which such LC Lender's participation in the reimbursed Drawing Payment then constitutes of the aggregate reimbursed Drawing Payment) of all payments subsequently received by the Issuing Bank from Borrower in reimbursement of such applicable Drawing Payment when such payments are received.

(d) Other Reductions of Stated Amount; Cancellation or Return.

(i) The Borrower may, from time to time upon five (5) Business Days' notice and the delivery of a Notice of LC Activity pursuant to clause (b) above to the Administrative Agent, the Issuing Bank and the LC Lenders, (1) permanently reduce the total aggregate LC Commitment or (2) permanently or temporarily reduce the Stated Amount of any Letter of Credit, in each case by the amount of \$50,000, or an integral multiple thereof, or, the Borrower may, from time to time upon five (5) Business Days' prior notice to the Administrative Agent, the Issuing Bank and the LC Lenders, cancel any Letter of Credit in its entirety; provided, however, (x) so long as any Obligations remain outstanding, the Administrative Agent shall be satisfied that no reduction or cancellation would result in the amounts available under the Debt Service Reserve Account being less than the Debt Service Reserve Required Amount at such time or cause a violation of any provision of this Agreement or a breach of any provision of any other Loan Document and (y) in respect of a reduction or cancellation of an issued Letter of Credit, the Administrative Agent shall have received written notice from the applicable beneficiary of such Letter of Credit, confirming such reduction or cancellation. Additionally, the LC Commitment shall automatically reduce on each Payment Date occurring after the

expiration of the Availability Period, in each case in an amount such that, the remaining LC Commitment is equal to the largest forecasted amount of scheduled interest and principal payable under the Loan Documents over any consecutive six-month period between such date and the Maturity Date; provided that, the Stated Amount under the issued Letters of Credit shall automatically reduce so that, the aggregate Stated Amount of all issued and outstanding Letters of Credit is equal to the remaining LC Commitments. The total aggregate LC Commitment shall not be reduced if the effect thereof would be to cause the LC Exposure of all LC Lenders to exceed the total aggregate LC Commitment. Upon the expiration or cancelation of a Letter of Credit, the Stated Amount in respect of such Letter of Credit shall be permanently reduced to zero.

(ii) Once reduced or cancelled solely pursuant to clause (i) above, the total aggregate LC Commitment may not be increased.

(iii) Concurrently with the repayment of any Drawing Payment (other than by the LC Lenders with the proceeds of LC Loans) or any LC Loan, the aggregate LC Commitments shall reduce in an amount equal to such repayment ratably to each applicable LC Lender's LC Commitment.

(iv) Any reductions to the total aggregate LC Commitment shall be applied ratably to each applicable LC Lender's LC Commitment.

(v) The Letters of Credit shall expire on their respective Expiration Dates, or on such earlier date if canceled pursuant to the terms of the Agreement or the applicable Letter of Credit.

(e) Commercial Practices; Obligations Absolute. The Borrower assumes all risks of the acts or omissions of beneficiary or transferee of any Letter of Credit with respect to the use of such Letter of Credit. The obligations of the Borrower to reimburse the Issuing Bank for any Drawing Payments and to repay any Loans made by the applicable LC Lenders pursuant to Section 2.02(c) and the obligations of the applicable LC Lenders under Section 2.02(c) shall be unconditional and irrevocable and shall be paid strictly in accordance with the terms hereof under all circumstances regardless of: (i) the use which may be made of the Letters of Credit or for any acts or omissions of any beneficiary or transferee in connection therewith; (ii) any reference which may be made to the Agreement or to the Letters of Credit in any agreements, instruments or other documents; (iii) the validity, sufficiency or genuineness of documents (including the Agreement) other than the Letters of Credit, or of any endorsement(s) thereon, which appear on their face to be valid, sufficient or genuine, as the case may be, even if such documents should in fact prove to be in any or all respects invalid, insufficient, fraudulent or forged or any statement therein prove to be untrue or inaccurate in any respect whatsoever; (iv) payment by the Issuing Bank against presentation of documents which do not strictly comply with the terms of the Letters of Credit, including failure of any documents to bear any reference

or adequate reference to such Letters of Credit so long as such documents substantially comply with the terms of the Letter of Credit; (v) any amendment or waiver of or any consent to departure from all or any terms of any of the Loan Documents; (vi) the existence of any claim, setoff, defense or other right which the Borrower may have at any time against any beneficiary or transferee of any Letter of Credit (or any Persons for whom any such beneficiary or transferee may be acting), the Administrative Agent, the Issuing Bank, any Lender or any other Person, whether in connection with the Agreement, the transactions contemplated herein or in the other Loan Documents, or in any unrelated transaction; (vii) any breach of contract or dispute among or between the Borrower, the Administrative Agent, the Issuing Bank, any Lender, or any other Person; (viii) any demand, statement, certificate, draft or other document presented under the Letters of Credit proving to be forged, fraudulent, invalid or insufficient in any respect or any statement therein being untrue or inaccurate in any respect; (ix) any extension of time for or delay, renewal or compromise of or other indulgence or modification to a Drawing Payment or a Loan granted or agreed to by the Administrative Agent, the Issuing Bank, or any applicable Lender in accordance with the terms of the Agreement; (x) any failure to preserve or protect any Collateral, any failure to perfect or preserve the perfection of any Lien thereon, or the release of any of the Collateral securing the performance or observance of the terms of this the Agreement or any of the other Loan Documents; or (xi) any other circumstances whatsoever in making or failing to make payment under the Letters of Credit, except that, in each case, payment by Issuing Bank under the applicable Letter of Credit shall not have constituted gross negligence or willful misconduct of Issuing Bank under the circumstances in question as determined by a final, non-appealable judgment of a court of competent jurisdiction.

(f) Indemnification. Without duplication of any obligation of Borrower under Section 4.06, in addition to amounts payable as provided herein, Borrower hereby agrees to protect, indemnify, pay and save harmless Issuing Bank from and against any and all claims, demands, liabilities, damages, losses, costs, charges and expenses (including reasonable fees, expenses and disbursements of counsel) which Issuing Bank may incur or be subject to as a consequence, direct or indirect, of (i) the issuance of any Letter of Credit by Issuing Bank, other than as a result of (1) the gross negligence or willful misconduct of Issuing Bank as determined by a final, non-appealable judgment of a court of competent jurisdiction or (2) the wrongful dishonor by Issuing Bank of a proper demand for payment made under any Letter of Credit issued by it, or (ii) the failure of Issuing Bank to honor a drawing under any such Letter of Credit as a result of any act or omission by any Governmental Authority.

(g) Interim Interest. If the Issuing Bank shall make any Drawing Payment, then, unless Borrower shall reimburse such Drawing Payment in full on the date such Drawing Payment is made, the unpaid amount thereof shall bear interest, for each day from and including the date such Drawing Payment is made to but excluding the date that the Borrower reimburses such Drawing Payment in full, at a rate equal to LIBOR, in effect from time to time, *plus* the Applicable Margin. Interest accrued pursuant to this paragraph shall be for the account of the Issuing Bank.

Section 2.03 Computation of Interest and Fees.

(a) Interest Rate. Subject to Section 4.05(b), interest shall accrue on each Loan (including interest accruing after the commencement of an insolvency proceeding under applicable Bankruptcy Law) from the day on which the Loan is made until, but not including the day on which the Loan is paid at the Applicable Interest Rate; provided that any Loan that is repaid on the same day on which it is made shall, subject to Section 4.01(b), bear interest for one day.

(b) Interest Computations. All computations of interest on any LIBO Loan hereunder shall include the first day but exclude the last day of the Interest Period in effect for such Borrowing and shall be based upon a year of 360 days. All computations of interest on any Base Rate Loan hereunder shall be based upon a year of 365/366 days. The Applicable Interest Rate for each Interest Period or day within an Interest Period, as the case may be, shall be determined by the Administrative Agent. Each determination by the Administrative Agent of an interest rate or fee hereunder shall be conclusive and binding for all purposes, absent manifest error.

(c) Interest Account and Interest Computations. The Administrative Agent shall record in an account or accounts maintained by the Administrative Agent on its books (i) the Applicable Interest Rates for the Loans; (ii) the date and amount of each principal and interest payment on each Loan; and (iii) such other information as the Administrative Agent may determine is necessary for the computation of interest payable by the Borrower hereunder consistent with the basis hereof. The Borrower agrees that all computations by the Administrative Agent of interest shall be deemed prima facie to be correct in the absence of manifest error.

(d) After giving effect to the Loans, all conversions of the Loans from one Type to the other, and all continuations of the Loans of the same Type, there shall not be more than five (5) Interest Periods in effect at any one time with respect to the Loans.

(e) Interest Period Elections. The Borrower may elect different options with respect to different portions of the affected Borrowing, in which case each such portion shall be allocated ratably among the Lenders holding the Loans comprising such Borrowing, and the Loans comprising each such portion shall be considered a separate Borrowing.

(f) Notice of Elections. Except as otherwise expressly provided herein, (i) Revolving Loans initially shall be of the Type specified in the applicable Borrowing Notice and (ii) LC Loans initially shall be Base Rate Loans. Thereafter, the Borrower may elect to convert such Borrowing to a Borrowing of a different Type or to continue such Borrowing as a Borrowing of the same Type, in each case in accordance with this Section 2.03(f). To make an election pursuant to this Section 2.03(f), the Borrower shall notify the Administrative Agent of such election by electronic communication no later than 10:00 a.m. (New York City time) at least five (5) Business Days in advance of the proposed election date (or such shorter timeframe as may be agreed to by the Administrative

Agent in its sole discretion). Each such electronic Interest Election Request shall be irrevocable and shall be confirmed promptly by hand delivery or electronic communication to the Administrative Agent of a written Interest Election Request in the form of Exhibit A-3 (to the extent such election was not originally in the Borrowing Notice).

(g) Content of Interest Election Requests. Each electronically communicated Interest Election Request shall specify the following information:

(i) the Borrowing to which such Interest Election Request applies and, if different options are being elected with respect to different portions thereof, the portions thereof to be allocated to each resulting Borrowing (in which case the information to be specified in clause (iii) below shall be specified for each resulting Borrowing);

(ii) the effective date of the election made pursuant to such Interest Election Request, which shall be a Business Day;
and

(iii) whether the resulting Borrowing is to be a Borrowing of Base Rate Loans or a Borrowing of LIBO Loans.

(h) Notice by the Administrative Agent to the Lenders. Promptly following receipt of an Interest Election Request, the Administrative Agent shall advise each applicable Lender of the details thereof and of such Lender's portion of each resulting Borrowing.

(i) Failure to Elect; Events of Default. If the Borrower fails to deliver a timely and complete Interest Election Request with respect to a Borrowing of LIBO Loans prior to the end of the Interest Period therefor, then, unless such Borrowing is repaid as provided herein, at the end of such Interest Period, such Borrowing shall be continued as a Borrowing of LIBO Loans. Notwithstanding any contrary provision hereof, if an Event of Default has occurred and is continuing and the Administrative Agent, at the request of the Required Lenders, so notifies the Borrower, then, so long as an Event of Default is continuing, (A) no outstanding Borrowing may be converted to or continued as a Borrowing of LIBO Loans and (B) unless repaid, each Borrowing of LIBO Loans shall be converted to a Borrowing of Base Rate Loans at the end of the Interest Period therefor.

Section 2.04 Evidence of Debt. The Loans made by each Lender shall be evidenced by one or more accounts or records maintained by such Lender and by the Administrative Agent in the ordinary course of business. The accounts or records maintained by the Administrative Agent and each Lender shall be conclusive absent manifest error of the amount of the Loans made by the Lenders to the Borrower and the interest and payments thereon. Any failure to so record or any error in doing so shall not, however, limit or otherwise affect the obligation of the Borrower hereunder to pay any amount owing with respect to the Obligations. In the event of any conflict between the accounts and records maintained by any Lender and the accounts and records of the Administrative Agent in respect of such matters, the accounts and records of the Administrative Agent shall control in the absence of manifest error. Upon

Each Lender may attach schedules to its Note and endorse thereon the date, amount and maturity of its Loans and payments with respect thereto.

Section 2.05 Addition of Funds.

The Administrative Agent shall use commercially reasonable efforts to provide the confirmation set forth in this Section 2.05(a)(ii) within ten (10) Business Days of receipt of the items described in Section 2.05(a)(i); provided, that, if the Administrative Agent is not able to provide such confirmation within such initial ten (10) Business Day period, it will notify the Borrower in writing on or before such tenth (10th) Business Day (A) that it is not be able to provide such confirmation within such initial ten (10) Business Day period and of the reason that it is not be able to provide such confirmation and (B) if applicable, the number of additional Business Days beyond such initial ten (10) Business Day period that Administrative Agent believes, in good faith, it will require in order to provide such confirmation; provided, further, that the Administrative Agent's failure to deliver any confirmations in accordance with the immediately preceding proviso shall not subject the Administrative Agent to any liability or recourse.

(b) After the Closing Date, the Borrower may directly or indirectly through a Tax Equity Holdco acquire or form a Partnership Flip Fund that does not meet the requirements of Section 2.05(a)(i) or an Inverted Lease Fund subject to the satisfaction of the conditions set forth in Section 2.05(b)(i) and the approval of the Administrative Agent and the Required Lenders in accordance with Section 2.05(b)(iii).

(c) After the Closing Date, the Borrower may directly or indirectly acquire or form a tax equity investment fund that is not a Partnership Flip Fund or an Inverted Lease Fund subject to the satisfaction of the conditions set forth in Section 2.05(c)(i) and the approval of the Administrative Agent and the Required Lenders in accordance with Section 2.05(c)(iii).

(b) The Administrative Agent shall promptly notify such of the Lenders and one or more Eligible Assignees as are identified by the Borrower to receive the invitation to participate in the requested Commitment Increase, which notice shall include (i) the proposed amount of such requested Commitment Increase, (ii) the proposed Commitment Increase Date and (iii) the date by which such Lenders or Eligible Assignees (each such Eligible Assignee, an “Assuming Lender”) wishing to participate in the applicable Commitment Increase must commit to increase the amount of their respective Commitments or to establish their respective Commitments, as the case may be (the “Commitment Date”); provided, however, that with respect to a Revolving Loan Commitment Increase, the Revolving Loan Commitment of each such Eligible Assignee shall be in an amount of \$5,000,000 or more. (ii) a consent of the Guarantors;

(iii) an assumption agreement from each Assuming Lender, if any, in form and substance satisfactory to the Borrower and the Administrative Agent (each an “Assumption Agreement”), duly executed by such Eligible Assignee, the Administrative Agent and the Borrower; and

On each Commitment Increase Date, upon fulfillment of the conditions set forth in Section 2.06(a) and in the immediately preceding sentence of this Section 2.06(c), the Administrative Agent shall notify the Lenders (including, without limitation, each Assuming Lender) and the Borrower of the occurrence of the applicable Commitment Increase to be effected on such Commitment Increase Date and shall record in the Register the relevant information with respect to each Increasing Lender and each Assuming Lender on such date. With respect to a Revolving Loan Commitment Increase, if any Revolving Loans are outstanding on such Commitment Increase Date, the Revolving Lenders immediately after effectiveness of such Revolving Loan Commitment Increase shall purchase and assign at par such amounts of the Revolving Loans outstanding at such time as the Administrative Agent may require such that each Revolving Lender holds its pro rata share of all Revolving Loans outstanding after giving effect to all such assignments.

(d) The Borrower shall cause all amounts in the Collection Account on each Calculation Date to be swept into the Revenue Account on the third Business Day after such Calculation Date (or if such Calculation Date is not a Business Day, on the third Business Day after the Business Day next succeeding such Calculation Date).

Lenders to which such payment is owed, at the Administrative Agent's Office in Dollars and in immediately available funds not later than 12:00 p.m. on the date specified herein. The Administrative Agent will promptly distribute to each Lender its pro rata share of the principal amount paid according to the outstanding principal amounts of the Revolving Loans held by the Lenders (or other applicable share of such payment as expressly provided herein) in like funds as received by wire transfer to such Lender's Lending Office. Upon any Assuming Lender becoming a Lender hereunder as a result of a Commitment Increase pursuant to Section 2.06, and upon the Administrative Agent's receipt of such Lender's Assumption Agreement and recording of the information contained therein in the Register, from and after the applicable Commitment Increase Date, the Administrative Agent shall make all payments hereunder in connection therewith to the Assuming Lender. All payments received by the Administrative Agent after 12:00 p.m. shall be deemed received on the next succeeding Business Day and any applicable interest or fee shall continue to accrue. If any payment to be made by the Borrower shall come due on a day other than a Business Day, payment shall be made on the next following Business Day, and such extension of time shall be reflected in computing interest or fees, as the case may be. Unless and until each of the Administrative Agent and the Borrower receives written notice to the contrary from NY Green Bank, each of the Administrative Agent and the Borrower shall pay all amounts that are due and payable by it to Gaia Portfolio 2016-A as a Lender under this Agreement directly to [***] or to such other account or Person designated by NY Green Bank, as may be notified to each of the Administrative Agent and the Borrower in writing from time to time by NY Green Bank until the date of receipt by the Administrative Agent of the NY Green Bank Termination Notice. All amounts so paid shall be deemed paid to Gaia Portfolio 2016-A as a Lender under this Agreement.

Section 4.02 Optional Prepayments. The Borrower (or Sponsor or Pledgor on Borrower's behalf) may, upon irrevocable written notice to the Administrative Agent at any time or from time to time, voluntarily prepay Loans in whole or in part in minimum amounts of not less than \$1,000,000 (or, in the case of the Revolving Loans, such lesser amount as may be outstanding) without premium or penalty; provided that such notice must be received by the Administrative Agent not later than 11:00 a.m. three (3) Business Days (or such shorter period as is acceptable to the Administrative Agent) prior to any date of prepayment. Each such notice shall specify the date and amount of such prepayment. The Administrative Agent will promptly notify each Lender of its receipt of each such notice, and of the amount of such Lender's pro rata share of such prepayment. Upon giving of the notice, the Borrower shall make such prepayment and the payment amount specified in such notice shall be due and payable on the date specified therein. Any prepayment of a Loan shall be accompanied by all accrued but unpaid interest on the principal amount prepaid. Each prepayment shall be paid to the Lenders in accordance with their respective pro rata share of the outstanding principal amount of such Loan. Revolving Loans prepaid pursuant to this Section 4.02 may be re-borrowed during the Availability Period in accordance with Section 2.01.

Section 4.03 Mandatory Principal Payments. The Borrower shall make the following mandatory prepayments on the Loans:

(a) On (x) in the case of clause (i), on the date of receipt thereof and (y) in the case of clause (ii), on the Payment Date following the date of receipt thereof, the Borrower shall apply towards the mandatory prepayment of the Loans in accordance with Section 4.04, 100% of the Net Available Amount of all proceeds in cash and cash equivalents (including any cash received by way of deferred payment pursuant to, or by monetization of, a note receivable or otherwise, but only as and when so received) to the Borrower or any other Loan Party from:

(i) without limitation to Article X, the issuance or incurrence of any Indebtedness by any Relevant Party (other than as permitted to be incurred pursuant to Section 7.01 of this Agreement); and

(ii) the sale, assignment or other disposition of any Asset of a Relevant Party (other than (A) ordinary course sales of power or the leasing of a photovoltaic system pursuant to the Customer Agreements, (B) PBI Payments, (C) the sale of Excluded Property, (D) a sale or assignment of an Asset that is a Customer Prepayment Event or (E) a sale or assignment that is a Permitted Fund Disposition).

(b) On each Payment Date during the Availability Period, the Borrower shall, to the extent of amounts available pursuant to Section 4.02(b)(iv)(A) of the Depository Agreement, prepay the Revolving Loans in an amount that, when applied in accordance with Section 4.04, causes the aggregate principal amount of the Revolving Loans outstanding on such Payment Date to be not greater than the Available Borrowing Base calculated as of the Calculation Date immediately preceding such Payment Date. If the aggregate principal amount of the Revolving Loans outstanding on the last day of the Availability Period exceeds the Available Borrowing Base calculated as of such last day (such excess, the "Excess Amount"), the Borrower shall on each Payment Date after the Availability Period, to the extent of amounts available pursuant to Section 4.02(b)(iv)(A) of the Depository Agreement, prepay the Revolving Loans in an amount that, when applied in accordance with Section 4.04, causes such excess to be paid.

(c) If the aggregate principal amount of the Revolving Loans as of three consecutive Calculation Dates during the Availability Period has exceeded the Available Borrowing Base for each such Calculation Date, on the Payment Date occurring after the third such Calculation Date, the Borrower shall prepay the Revolving Loans in an amount that, when applied in accordance with Section 4.04, causes the aggregate principal amount of the Revolving Loans outstanding on such date to be not greater than the Available Borrowing Base calculated as of the Calculation Date immediately preceding such Payment Date. If the Borrower has not repaid the Revolving Loans in an amount equal to the Excess Amount in accordance with Section 4.02(b)(iv)(A) of the Depository Agreement as of the third Payment Date following the last day of the Availability Period, the Borrower shall prepay, on such third Payment Date, the Revolving Loans in an amount equal to any portion of the Excess Amount not theretofore paid pursuant to Section 4.02(b)(iv)(A) of the Depository Agreement.

(d) On the date of each Permitted Fund Disposition, the Borrower shall, as a condition to such Permitted Fund Disposition, (1) prepay (i) the Revolving Loans in accordance with Section 4.04 in an amount equal to the excess (if positive) of (x) the aggregate principal amount of the Revolving Loans outstanding as of such date over (y) the Available Borrowing Base calculated after giving effect to such Permitted Fund Disposition and (ii) the LC Loans in full and (2) pay any Swap Termination Payments due in connection with the repayment of Revolving Loans in connection with such Permitted Fund Disposition.

(e) On each Payment Date during an Early Amortization Period, the Borrower shall apply towards the mandatory prepayment of the Loans in accordance with Section 4.04, 100% of the amounts available therefor in the Revenue Account and the Distribution Trap Account after giving effect to all prior withdrawals and transfers pursuant to Sections 4.02(b) and 4.02(e) of the Depository Agreement.

(f) On each Payment Date occurring after the end of the Availability Period, the Borrower shall apply towards the mandatory prepayment of the Loans in accordance with Section 4.04, an amount determined by multiplying 0.68 by the present value of the reduction of future Collections resulting from or attributable to each Customer Prepayment Event occurring during the calendar quarter ending on the immediately prior Calculation Date (disregarding any proceeds received in respect of such Customer Prepayment Event and assuming that no future Collections will be received in respect of any Event of Loss Project, Defaulted Project or a Project in respect of which an Ineligible Customer Reassignment has occurred) discounted at a rate of six percent (6%) per annum; provided that, notwithstanding anything to the contrary herein, the Sponsor or Pledgor may, but shall not be required to, contribute capital to the Borrower to satisfy its prepayment obligations under this Section 4.03(f).

(g) Concurrently with any prepayment of the Loans pursuant to Section 4.03(a), Borrower shall deliver to Administrative Agent a certificate of an Authorized Officer demonstrating the calculation of the amount of the applicable net cash proceeds or other amounts to be prepaid, as the case may be. In the event that Borrower shall subsequently determine that the actual amount received exceeded the amount set forth in such certificate, Borrower shall promptly make an additional prepayment of the Loans in an amount equal to such excess, and Borrower shall concurrently therewith deliver to Administrative Agent a certificate of an Authorized Officer demonstrating the derivation of such excess.

(h) On each Payment Date after the end of the Availability Period, at the same time as a Transfer Date Certificate is provided prior to such Payment Date, Borrower shall provide to Administrative Agent a Customer Prepayment Event Certificate. The Administrative Agent may notify the Borrower in writing of any suggested corrections, changes or adjustments to a Transfer Date Certificate that are not inconsistent with the terms of this Agreement.

Payment or acceptance of the increased rates of interest provided for in this Section 4.05(b) is not a permitted alternative to timely payment and shall not constitute a waiver of any Event of Default or otherwise prejudice or limit any rights or remedies of any Secured Party.

(c) Interest on each Loan shall be due and payable in arrears (i) on each Payment Date, (ii) on the Maturity Date, (iii) upon prepayment of any Loans in accordance with Section 4.03 and (iv) at maturity (whether by acceleration or otherwise), provided, that interest payable pursuant to Section 4.05(b) shall be payable on demand. (b) The Borrower agrees to pay to the Administrative Agent, for the account of each LC Lender pro rata to their LC Commitments, the LC Commitment Fee, payable quarterly in arrears on (i) each Payment Date and (ii) the final day of the LC Availability Period.

(b) The Borrower agrees to timely pay in accordance with applicable Law any and all present or future stamp, transfer, recording, filing, court, documentary and other similar Taxes payable in connection with the execution, delivery, filing, recording of, from the receipt or perfection of a security interest under, or otherwise with respect to, any of the Loan Documents, and agrees to save the Lenders and the Agents harmless from and against any liabilities with respect to or resulting from any delay in paying or any omission to pay such Taxes, in each case, as the same are incurred.

(d) Reimbursement by Lenders. To the extent that the Borrower for any reason fails to indefeasibly pay any amount required under Section 4.07(a) or Section 4.08 to be paid by it to the Agents (or any sub-Agent thereof) or any Related Party, and without limitation of the obligations of the Borrower and such Related Parties to pay such amounts, each Lender severally agrees to pay to each Agent (or any such sub-Agent) or such Related Party, as the case may be, such Lender's pro rata share (determined as of the time that the applicable unreimbursed expense or indemnity payment is sought based on such Lender's percentage of the Commitments, Loans and LC Exposure outstanding) of such unpaid amount (including any such unpaid amount in respect of a claim asserted by such Lender), provided, further, that the unreimbursed expense or indemnified loss, claim, damage, liability or related expense, as the case may be, was incurred by or asserted against such Agent (or any such sub-Agent) in its capacity as such, or against any Related Party, acting for such Agent (or any such sub-Agent) in

connection with such capacity. The obligations of the Lenders hereunder to make payments pursuant to this Section 4.07(d) are several and not joint. The failure of any Lender to make any payment under this Section 4.07(d) on any date required hereunder shall not relieve any other Lender of its corresponding obligation to do so on such date, and no Lender shall be responsible for the failure of any other Lender to so make its payment under this Section 4.07(d). Each Lender's obligation under this Section 4.07(d) shall survive the resignation or replacement or removal of any Agent or any assignment of rights by or replacement of a Lender, the termination of the Commitments and the satisfaction or discharge of all other Obligations.

(e) Waiver of Consequential Damages, Etc. To the fullest extent permitted by applicable Law, neither the Borrower, any Secured Party nor any of their respective Affiliates shall assert, and each of them hereby waives and acknowledges, that no other Person shall have any claim against any Indemnitee, the Borrower or any of the Borrower's Affiliates on any theory of liability, for (i) any special, indirect, consequential or punitive losses or damages (as opposed to direct or actual losses or damages) or (ii) any loss of profit, business, or anticipated savings (such losses and damages set out in the foregoing clauses (i) and (ii), collectively, the "Consequential Losses"), in each case arising out of, in connection with, or as a result of, this Agreement, any other Loan Document or any agreement or instrument contemplated hereby, the transactions contemplated hereby or thereby, any Loan or the use of the proceeds thereof; provided that nothing contained in this Section 4.07(e) shall limit the Borrower's indemnity and reimbursement obligations under Section 4.08 or the obligations of each Lender under Section 4.07(d) in respect of any third party claims made against any Indemnitee with respect to Consequential Losses of such third party, Section 4.09 and Section 4.11. No Indemnitee shall be liable for any damages arising from the use by unintended recipients of any information or other materials distributed to such unintended recipients by such Indemnitee through internet, telecommunications, electronic or other information transmission systems in connection with this Agreement or the other Loan Documents or the transactions contemplated hereby or thereby other than for any such damages resulting from any material breach by such Indemnitee of this Agreement or the other Loan Documents or that otherwise results from the gross negligence or willful misconduct of such Indemnitee as determined by a final judgment of a court of competent jurisdiction which has become non-appealable.

(f) Payments. All amounts due under this Section 4.07 or Section 4.08 shall be payable on the immediately succeeding Payment Date after demand therefor.

(vii) the failure of the Operator and the Manager (to the extent that the Operator or Manager, as applicable, is an Affiliate of the Borrower), as applicable, to operate the Projects in accordance with the applicable standard set forth in each O&M Agreement or the Management Agreement, as applicable, or to perform its duties in a good and workmanlike manner consistent with Prudent Industry Practice;

(viii) any dispute, claim, offset or defense (other than discharge in bankruptcy) of a Relevant Party or a counterparty to a Portfolio Document to any payment under any Portfolio Document based on such Portfolio Document not being a legal, valid and binding obligation of such Relevant Party or counterparty, as applicable, enforceable against it in accordance with its terms;

(b) The Borrower shall not, without the prior written consent of any Indemnitee, effect any settlement of any pending or threatened proceeding in respect of which such Indemnitee is or could have been a party and indemnity could have been sought hereunder by such Indemnitee, unless such settlement (i) seeks only monetary damages and does not seek any injunctive or other relief against an Indemnitee, (ii) includes an unconditional release of such Indemnitee from all liability or claims that are the subject matter of such proceeding and (iii) does not include a statement as to or an admission of fault, culpability, or a failure to act by or on behalf of such Indemnitee.

Section 4.09 Taxes.

(a) Payments Free of Taxes; Obligation to Withhold; Payments on Account of Taxes

(i) Any and all payments by or on account of any obligation of the Borrower under any Loan Document shall be made without deduction or withholding for any Taxes, except as required by applicable Law (which, for purposes of this Section 4.09, shall include FATCA). If any applicable Law (as determined in the good faith discretion of the Administrative Agent or the Borrower, as applicable, taking into account the information and documentation delivered pursuant to Section 4.09(e) below) requires the deduction or withholding of any Tax from any such payment by the Administrative Agent or the Borrower, then the Administrative Agent or the Borrower shall be entitled to make such deduction or withholding.

(ii) If the Administrative Agent or the Borrower are required to deduct or withhold any Tax described in Section 4.09(a)(i) and must timely pay the full amount withheld or deducted to the relevant Governmental Authority in accordance with the applicable Law, and if the Tax is an Indemnified Tax, then, the sum payable by the Borrower shall be increased as necessary so that after the deduction or withholding (including deductions or withholdings applicable to additional sums payable under this Section 4.09) the applicable Recipient receives an amount equal to the sum it would have received had no such withholding or deduction been made.

(b) Payment of Other Taxes by the Borrower. Without limiting the provisions of subsection (a) above, the Borrower shall timely pay to the relevant Governmental Authority in accordance with applicable Law, or at the option of the Administrative Agent timely reimburse it for the payment of, any Other Taxes.

the full amount of any Indemnified Taxes (including Indemnified Taxes imposed or asserted on or attributable to amounts payable under this Section 4.09(c)) payable or paid by such Recipient or required to be withheld or deducted from a payment to such Recipient, and any penalties, interest and reasonable expenses arising therefrom or with respect thereto, whether or not such Indemnified Taxes were correctly or legally imposed or asserted by the relevant Governmental Authority. A certificate as to the amount of such payment or liability delivered to the Borrower by a Lender (which, for the purposes of this Section 4.09, shall include the Issuing Bank) (with a copy to the Administrative Agent), or by the Administrative Agent on its own behalf or on behalf of a Lender, shall be conclusive absent manifest error. The Borrower shall and does hereby indemnify the Administrative Agent, and shall make payment in respect thereof within ten (10) days after demand therefor, for any amount which a Lender for any reason fails to pay indefeasibly to the Administrative Agent as required pursuant to Section 4.09(c)(ii) below.

(i) Each Lender shall and does hereby severally indemnify, and shall make payment in respect thereof within ten (10) days after demand therefor, (x) each Agent against any Indemnified Taxes attributable to such Lender (but only to the extent that the Borrower has not already indemnified such Agent for such Indemnified Taxes and without limiting the obligation of the Borrower to do so), (y) each Agent and the Borrower, as applicable, against any Taxes attributable to such Lender's failure to comply with the provisions of Section 12.05(d) relating to the maintenance of a Participant Register and (z) each Agent and the Borrower, as applicable, against any Excluded Taxes attributable to such Lender, in each case, that are payable or paid by such Agent or the Borrower in connection with any Loan Document, and any reasonable expenses arising therefrom or with respect thereto, whether or not such Taxes were correctly or legally imposed or asserted by the relevant Governmental Authority. A certificate as to the amount of such payment or liability delivered to any Lender by such Agent shall be conclusive absent manifest error. Each Lender hereby authorizes such Agent to set off and apply any and all amounts at any time owing to such Lender, as the case may be, under this Agreement or any other Loan Document against any amount due to the Administrative Agent under this clause (ii).

(d) Evidence of Payments. Upon request by the Borrower or any Agent, as the case may be, after any payment of Taxes by the Borrower or by such Agent to a Governmental Authority as provided in this Section 4.09, the Borrower shall deliver to the Agent or the Agent shall deliver to the Borrower, as the case may be, the original or a certified copy of a receipt issued by such Governmental Authority evidencing such payment, a copy of any return required by Laws to report such payment or other evidence of such payment reasonably satisfactory to the Borrower or the Agent, as the case may be.

(i) Any Lender that is entitled to an exemption from or reduction of withholding Tax with respect to payments made under any Loan Document shall deliver to the Borrower and the Administrative Agent, at the time or times reasonably requested by the Borrower or the Administrative Agent, such properly completed and executed documentation as will permit such payments to be made without withholding or at a reduced rate of withholding. In addition, any Lender, if reasonably requested by the Borrower or the Administrative Agent, shall deliver such other documentation prescribed by applicable Law or reasonably requested by the Borrower or the Administrative Agent as will enable the Borrower or the Administrative Agent to determine whether or not such Lender is subject to backup withholding or information reporting requirements. Notwithstanding anything to the contrary in the preceding two sentences, the completion, execution and submission of such documentation (other than such documentation set forth in Section 4.09(e)(ii)(A), Section 4.09(e)(ii)(B) and Section 4.09(e)(ii)(D) below) shall not be required if in the Lender's reasonable judgment such completion, execution or submission would subject such Lender to any material unreimbursed cost or expense or would materially prejudice the legal or commercial position of such Lender.

(ii) Without limiting the generality of the foregoing, each Lender agrees that on the Closing Date or any other date after the Closing Date such Lender becomes a party to this Agreement, and from time to time thereafter upon reasonable request, it will deliver to each of the Borrower and the Administrative Agent either:

Solely for purposes of this clause (D), "FATCA" shall include any amendments made to FATCA after the Closing Date.

(iii) Each Lender agrees that if any form or certification it previously delivered pursuant to this Section 4.09 expires or becomes obsolete or inaccurate in any respect, it shall update such form or certification or promptly notify the Borrower and the Administrative Agent in writing of its legal inability to do so.

(f) Treatment of Certain Refunds. Unless required by applicable Law, at no time shall the Administrative Agent have any obligation to file for or otherwise pursue on behalf of a Lender, or have any obligation to pay to any Lender, any refund of Taxes withheld or deducted from funds paid for the account of such Lender. If any Recipient determines, in its sole discretion exercised in good faith, that it has received a refund of any Taxes as to which it has been indemnified by the Borrower or with respect to which the Borrower has paid additional amounts pursuant to this Section 4.09, it shall pay to the Borrower an amount equal to such refund (but only to the extent of indemnity payments made, or additional amounts paid, by the Borrower under this Section 4.09 with respect to the Taxes giving rise to such refund), net of all out-of-pocket expenses (including Taxes) incurred by such Recipient, and without interest (other than any interest paid by the relevant Governmental Authority with respect to such refund), provided that the Borrower, upon the request of the Recipient, agrees to repay the amount paid over to the Borrower (plus any penalties, interest or other charges imposed by the relevant Governmental Authority) to the Recipient in the event the Recipient is required to repay such refund to such Governmental Authority. Notwithstanding anything to the contrary in this Section 4.09(f), in no event will the applicable Recipient be required to pay any amount to the Borrower pursuant to this Section 4.09(f) the payment of which would place the Recipient in a less favorable net after-Tax position than such Recipient would have been in if the Tax subject to indemnification and

giving rise to such refund had not been deducted, withheld or otherwise imposed and the indemnification payments or additional amounts with respect to such Tax had never been paid. This Section 4.09(f) shall not be construed to require any Recipient to make available its tax returns (or any other information relating to its Taxes that it deems confidential) to the Borrower or any other Person.

(g) OID. The Borrower and the Lenders agree (i) that the Loans are to be treated as indebtedness of the Borrower for U.S. federal income tax purposes, (ii) to the extent that the Borrower or a Governmental Authority determines that the Loans were made with original issue discount (“OID”) for U.S. federal income tax purposes, to report such OID as interest expense and interest income, respectively, in accordance with sections 163(e)(1) and 1272(a)(1) of the Code, (iii) not to file any tax return, report or declaration inconsistent with the foregoing, and (iv) any OID shall constitute principal for all purposes under this Agreement. The inclusion of this Section 4.09(g) is not an admission by any Lender that it is subject to United States taxation.

(h) Survival. Each party’s obligations under this Section 4.09 shall survive the resignation or replacement of the Administrative Agent or any assignment of rights by, or the replacement of, a Lender, the termination of the Commitments and the repayment, satisfaction or discharge of all other Obligations.

Section 4.10 Mitigation Obligations: Replacement of Lenders.

(a) Designation of a Different Lending Office. If any Lender requests compensation under Section 4.11(d), or requires the Borrower to pay any Indemnified Taxes or additional amounts to any Lender, or any Governmental Authority for the account of any Lender, pursuant to Section 4.09, then at the request of the Borrower such Lender shall, as applicable, use reasonable efforts to designate a different Lending Office for funding or booking its Loans hereunder or to assign its rights and obligations hereunder to another of its offices, branches or affiliates, if, in the reasonable judgment of such Lender, such designation or assignment (i) would eliminate or reduce amounts payable pursuant to Section 4.09 or Section 4.11(d) (as the case may be), in the future, and (ii) in each case, would not subject such Lender to any unreimbursed cost or expense and would not otherwise be disadvantageous to such Lender. The Borrower hereby agrees to pay all reasonable costs and expenses incurred by any Lender in connection with any such designation or assignment.

(b) Replacement of Lenders. If any Lender requests compensation under Section 4.11(d), or requires the Borrower to pay any Indemnified Taxes or additional amounts to any Lender, or any Governmental Authority for the account of any Lender, pursuant to Section 4.09 and, in each case, such Lender has declined or is unable to designate a different lending office in accordance with Section 4.10(a), or if any Lender is a Defaulting Lender or a Non-Consenting Lender, then the Borrower may, at its sole expense and effort, upon notice to such Lender and the Administrative Agent, require such Lender to assign and delegate, without recourse (in accordance with and subject to the restrictions contained in, and consents required by, Section 12.05), all of its interests, rights (other than

its existing rights to payments pursuant to Section 4.11 or Section 4.09) and obligations under this Agreement and the related Loan Documents (other than any Secured Interest Rate Hedging Agreement) to an Eligible Assignee that shall assume such obligations (which assignee may be another Lender, if a Lender accepts such assignment); provided that:

- (i) the Borrower shall have paid to the Administrative Agent the assignment fee (if any) specified in Section 12.05;
- (ii) such Lender shall have received payment of an amount equal to the outstanding Obligations owed (including all principal of its Loans, accrued interest thereon, accrued fees and all other amounts) to it hereunder and under the other Loan Documents (including any amounts under Section 4.11(f)) from the assignee (to the extent of such Obligations) or the Borrower (in the case of all other amounts);
- (iii) in the case of any such assignment resulting from a claim for compensation under Section 4.11(d) or payments required to be made pursuant to Section 4.09, such assignment will result in a reduction in such compensation or payments thereafter;
- (iv) such assignment does not conflict with applicable Law; and
- (v) in the case of any assignment resulting from a Lender becoming a Non-Consenting Lender, the applicable assignee shall have consented to the applicable amendment, waiver or consent.

In the event the replaced Lender (or an Affiliate of such Lender) is party to any Secured Interest Rate Hedging Agreement, then the replaced Lender (or Affiliate of such Lender) (the “Replaced Hedge Provider”) under such Secured Interest Rate Hedging Agreement may elect to (A) terminate such Secured Interest Rate Hedge Agreement in accordance with its terms or (B) require the Borrower to cause the novation of such Secured Interest Rate Hedging Agreement so that the entire notional amount set forth in the original Secured Interest Rate Hedging Agreement is subject to the novated Secured Interest Rate Hedging Agreements with the Eligible Assignee referred to above (or an Affiliate of such Eligible Assignee) (the “Replacement Hedge Provider”); provided, however, that in the event of any novation the Replacement Hedge Provider and transaction documentation must be acceptable to the Replaced Hedge Provider in its sole discretion and the Borrower shall be responsible for all additional costs resulting from any assignment or novation of any Secured Interest Rate Hedging Agreement under this clause (b), including any fees or additional credit or other margins (such costs, fees and margins to be reasonably acceptable to the Administrative Agent) and, to the extent of any mark-to-market payment, the Replaced Hedge Provider shall determine any amounts payable to or by it in respect of the assignment as if an “Additional Termination Event” occurred under the Secured Interest Rate Hedging Agreement with the Borrower as the sole Affected Party (as defined therein).

*** Confidential treatment has been requested for the bracketed portions. The confidential redacted portion has been omitted and filed separately with the Securities and Exchange Commission.

A Lender shall not be required to make any such assignment or delegation if, prior thereto, as a result of a waiver by such Lender or otherwise, the circumstances entitling the Borrower to require such assignment and delegation cease to apply.

Section 4.11 Change of Circumstances.

(a) Market Disruption.

(i) If a Market Disruption Event occurs in relation to a LIBO Loan for any Interest Period, then the rate of interest on each Lender's participation in that Loan for that Interest Period shall be the percentage rate per annum which is the sum of:

(A) the Applicable Margin; and

(B) the percentage rate per annum notified to the Administrative Agent by that Lender, as soon as practicable and in any event not later than five (5) Business Days before interest is due to be paid in respect of that Interest Period (or such later date as may be acceptable to the Administrative Agent), as the cost to that Lender of funding its participation in that Loan from whatever source(s) it may reasonably select.

(ii) In relation to a Market Disruption Event under paragraph (iii)(B) below, if the percentage rate per annum notified by a Lender pursuant to paragraph (i)(B) above shall be less than LIBOR or if a Lender shall fail to notify the Administrative Agent of any such percentage rate per annum, the cost to that Lender of funding its participation in the relevant Loan for the relevant Interest Period shall be deemed, for the purposes of paragraph (i) above, to be LIBOR.

(iii) In this Agreement "Market Disruption Event" means (A) at or about noon (London time) on the Quotation Day for the relevant Interest Period, LIBOR is to be determined by reference to the Reference Banks and none or only one of the Reference Banks supplies a rate to the Administrative Agent to determine LIBOR for dollars for the relevant Interest Period, or (B) at 5 p.m. on the Business Day immediately following the Quotation Day for the relevant Interest Period, the Administrative Agent receives notifications from a Lender or Lenders (whose participations in the relevant Loan exceed thirty-five percent (35%) of that Loan) that the cost to it of obtaining matching deposits in the London interbank market would be in excess of LIBOR.

(iv) If a Market Disruption Event shall occur, the Administrative Agent shall promptly notify the Lenders and the Borrower thereof.

(b) Alternative basis of interest or funding. If a Market Disruption Event occurs and the Administrative Agent or the Borrower so requires, the Administrative Agent and the Borrower shall

enter into negotiations (for a period of not more than thirty days) with a view to agreeing on a substitute basis for determining the rate of interest. Any alternative basis agreed pursuant to the immediately preceding sentence shall, with the prior consent of all the Lenders and the Borrower, be binding on all Parties. In the event that no substitute basis is agreed at the end of the thirty day period, the rate of interest shall continue to be determined in accordance with the terms of this Agreement (including Section 4.11(a)).

(c) Illegality.

(i) Subject to Section 4.11(c)(ii) below, if, at any time, any Lender shall have determined (which determination shall be final and conclusive and binding upon all parties hereto) that the making, maintaining or continuation of its Loans has become unlawful as a result of compliance by such Lender in good faith with any law, treaty, governmental rule, regulation, guideline or order (or would conflict with any such treaty, governmental rule, regulation, guideline or order not having the force of law even though the failure to comply therewith would not be unlawful), (A) that Lender shall promptly notify the Administrative Agent upon becoming aware of that event, (B) upon the Administrative Agent notifying the Borrower, the Commitment of that Lender will be immediately cancelled, and (C) the Borrower shall repay that Lender's participation in the Loan on the last day of the Interest Period occurring after the Administrative Agent has notified the Borrower or, if earlier, the date specified by the Lender in the notice delivered to the Administrative Agent (being no earlier than the last day of any applicable grace period permitted by law).

(ii) Notwithstanding any other provision of this Agreement, if any Change of Law shall make it unlawful for any Lender to make or maintain a LIBO Loan or to give effect to its obligations as contemplated hereby with respect to any LIBO Loan, then, by written notice to the Borrower and to the Administrative Agent:

(A) such Lender may declare that LIBO Loans will not thereafter (for the duration of such unlawfulness) be made by such Lender hereunder (or be continued), whereupon any request for a Borrowing (or any continuation of a Borrowing for an additional Interest Period) shall, as to such Lender only, be deemed a request for a Base Rate Loan (or a continuation of a LIBO Loan as a Base Rate Loan), unless such declaration shall be subsequently withdrawn; and

(B) such Lender may require that all outstanding LIBO Loans made by it be converted to Base Rate Loans, in which event all such LIBO Loans shall be automatically converted to Base Rate Loans as of the effective date of such notice as provided below.

*** Confidential treatment has been requested for the bracketed portions. The confidential redacted portion has been omitted and filed separately with the Securities and Exchange Commission.

(iii) In the event any Lender shall exercise its rights under clauses (A) or (B) above, all payments and prepayments of principal that would otherwise have been applied to repay the LIBO Loans that would have been made by such Lender or the converted LIBO Loans of such Lender shall instead be applied to repay the Base Rate Loans made by such Lender in lieu of, or resulting from the conversion of, such LIBO Loans. For purposes of this clause (iii), a notice to the Borrower by any Lender shall be effective as to each LIBO Loan made by such Lender, if lawful, on the last day of the Interest Period then applicable to such LIBO Loan (which shall be a Payment Date); in all other cases such notice shall be effective on the date of receipt by the Borrower.

(iv) If NY Green Bank exercises its rights under the NY Green Bank Loan Agreement corresponding to the rights of Gaia Portfolio 2016-A pursuant to this Section 4.11(c), the provisions of Sections 4.11(c)(ii) and (iii) shall be deemed to apply to the Revolving Loans held by Gaia Portfolio 2016-A to the same extent as if NY Green Bank had exercised such rights pursuant to such Sections hereunder.

(d) Increased Costs. If any Change of Law shall:

(i) impose, modify or deem applicable any reserve, special deposit, compulsory loan, insurance charge or similar requirement (except any reserve requirement reflected in the LIBO Rate) against assets of, deposits with or for the account of, or credit extended or participated in by, any Lender or any Issuing Bank;

(ii) subject any Recipient to any Taxes (other than Indemnified Taxes and Excluded Taxes) on its loans, loan principal, letters of credit, commitments, or other obligations, or its deposits, reserves, other liabilities or capital attributable thereto; or

(iii) impose on any Lender or any Issuing Bank or the London interbank market any other condition, cost or expense (other than Taxes) affecting this Agreement or Loans made by such Lender or any Letter of Credit or participation therein;

and the result of any of the foregoing shall be to increase the cost to such Lender or such other Recipient of making, converting to, continuing or maintaining any Loan or of maintaining its obligation to make any such Loan, or to increase the cost to such Lender, such Issuing Bank or such other Recipient of participating in, issuing or maintaining any Letter of Credit (or of maintaining its obligation to participate in or to issue any Letter of Credit), or to reduce the amount of any sum received or receivable by such Lender, Issuing Bank or other Recipient hereunder (whether of principal, interest or any other amount) then, upon request of such Lender, Issuing Bank or other Recipient, the Borrower will pay to such Lender, Issuing Bank or other Recipient, as the case may be, such additional amount or amounts as will compensate such Lender, Issuing Bank or other Recipient, as the case may be, for such additional costs incurred or reduction suffered.

["*"] Confidential treatment has been requested for the bracketed portions. The confidential redacted portion has been omitted and filed separately with the Securities and Exchange Commission.

(e) Capital Requirements. If any Lender or Issuing Bank determines that any Change of Law affecting such Lender or Issuing Bank or any lending office of such Lender or such Lender's or Issuing Bank's holding company, if any, regarding capital or liquidity requirements, has or would have the effect of reducing the rate of return on such Lender's or Issuing Bank's capital or on the capital of such Lender's or Issuing Bank's holding company, if any, as a consequence of this Agreement, the Commitments of such Lender or the Loans made by, or participations in Letters of Credit held by, such Lender, or the Letters of Credit issued by any Issuing Bank, to a level below that which such Lender or Issuing Bank or such Lender's or Issuing Bank's holding company could have achieved but for such Change of Law (taking into consideration such Lender's or Issuing Bank's policies and the policies of such Lender's or Issuing Bank's holding company with respect to capital adequacy), then from time to time the Borrower will pay to such Lender or Issuing Bank, as the case may be, such additional amount or amounts as will compensate such Lender or Issuing Bank or such Lender's or Issuing Bank's holding company for any such reduction suffered.

(f) Compensation for Breakage or Non-Commencement of Interest Periods. Borrower shall compensate each Lender, upon written request by such Lender (which request shall set forth the basis for requesting such amounts), for all losses, expenses and liabilities (including any interest paid or payable by such Lender to lenders of funds borrowed by it to make or carry its Loans and any loss, expense or liability sustained by such Lender in connection with the liquidation or re-employment of such funds but excluding loss of anticipated profits) which such Lender may sustain: (i) if for any reason (whether as a result of the failure to satisfy any applicable conditions or otherwise other than a default by such Lender) a borrowing of any Loan (other than a Base Rate Loan) does not occur on a date specified therefor in a Borrowing Notice; (ii) if any prepayment or other principal payment of any of its Loans (other than a Base Rate Loan) occurs on a date prior to the last day of an Interest Period applicable to that Loan; or (iii) if any prepayment of any of its Loans (other than a Base Rate Loan) is not made on any date specified in a notice of prepayment given by Borrower.

ARTICLE V REPRESENTATIONS AND WARRANTIES

The Borrower represents and warrants to each Agent and each Lender Party that the statements set forth in this Article V are true, correct and complete in all respects as of (i) the Closing Date, (ii) the date of each borrowing of Revolving Loans under Section 2.01, (iii) the date of each issuance, extension or increase of the Stated Amount of the Letter of Credit during the Availability Period pursuant to Section 2.02, (iv) the date of each request by the Borrower for a Commitment Increase pursuant to Section 2.06(a) or (v) each Commitment Increase Date.

Section 5.01 Organization, Powers, Capitalization, Good Standing, Business.

(a) Organization and Powers. Each Relevant Party is duly organized, validly existing and in good standing under the Laws of its state of formation. Each Relevant Party has all requisite

power and authority to own and operate its properties, to carry on its businesses as now conducted and proposed to be conducted. Each Relevant Party has all requisite power and authority to enter into each Transaction Document to which it is a party and to perform the terms thereof.

(b) Qualification. Each Relevant Party is duly qualified and in good standing in each state or territory where necessary to carry on its present businesses and operations, except in jurisdictions in which the failure to be qualified and in good standing could not reasonably be expected to have a Material Adverse Effect.

Section 5.02 Authorization of Borrowing, etc.

(a) Authority. The Borrower has the power and authority to incur, and the Loan Parties have the power and authority to guarantee, the Indebtedness represented by the Loans, the Secured Hedging Obligations and the Loan Documents. The execution, delivery and performance by each Loan Party of the Loan Documents to which it is a party and the consummation of the transactions contemplated thereby have been duly authorized by all necessary limited liability company or other action, as the case may be, on behalf of such Loan Party.

(b) No Conflict. The execution, delivery and performance by each Relevant Party of the Transaction Documents to which it is a party and the consummation of the transactions contemplated thereby do not and will not: (1) conflict with or result in a violation or breach of the terms of (x) its certificate of formation, limited liability company agreement, operating agreement or other organizational documents, as the case may be; (y) any provision of material Law applicable to it or (z) any order, judgment or decree of any Governmental Authority binding on it or any of its material properties; (2) result in a material breach of or constitute (with due notice or lapse of time or both) a material default under the Transaction Documents or any other material contractual obligation binding upon a Relevant Party or its material properties; or (3) result in or require the creation or imposition of any Lien upon its assets (other than the Liens created under the Collateral Documents).

(c) Consents. The execution and delivery by each Relevant Party of the Transaction Documents to which it is a party, and the consummation of the transactions contemplated thereby, do not and will not require any registration with, consent or approval of, or notice to, or other action to, with or by, any Governmental Authority or any other Person (including any Tax Equity Class A Member) which has not been obtained or made, and each such consent or approval is in full force and effect, in each case, other than consents, approvals, registrations, notices or other action which, if not obtained or made, could not reasonably be expected to have a Material Adverse Effect.

(d) Binding Obligations. Each of the Transaction Documents to which a Relevant Party is a party has been duly executed and delivered by such Relevant Party thereto and is the legally valid and binding obligation of such Relevant Party, enforceable against it, in accordance with its

respective terms, subject to bankruptcy, insolvency, moratorium, reorganization and other similar Laws affecting creditor's rights.

Section 5.03 Title to Membership Interests.

(a) The Borrower is the sole member of each of the Wholly Owned Holdcos and the Tax Equity Holdcos (or is the sole member of the Delaware limited liability company that owns certain Tax Equity Holdcos, as described on Schedule 5.03(e)) and shall have good and valid legal and beneficial title to all of the Membership Interests issued by such entities (directly or indirectly as described on Schedule 5.03(e)), free and clear of all Liens other than Permitted Liens. All of such issued and outstanding Membership Interests have been duly authorized and validly issued and are owned of record and beneficially by the Borrower and were not issued in violation of any preemptive right. There are no voting agreements or other similar agreements with respect to the Membership Interests.

(b) Each Tax Equity Holdco holding either (i) Tax Equity Class B Membership Interests or (ii) the Membership Interests in another Tax Equity Holdco (in each case as described on Schedule 5.03(e)) has good and valid legal and beneficial title to all such Tax Equity Class B Membership Interests and the Inverted Lease Opco Membership Interests in the applicable Tax Equity Opco, or Membership Interests (as applicable), held by it, free and clear of all Liens other than Permitted Liens. Each Wholly Owned Holdco has good and valid legal and beneficial title to all of the Wholly Owned Opco Membership Interests in the applicable Wholly Owned Opco held by it, free and clear of all Liens other than Permitted Liens. All of the issued and outstanding Tax Equity Class B Membership Interests and Inverted Lease Opco Membership Interests have been duly authorized and validly issued and are owned of record and beneficially by the applicable Tax Equity Holdco and were not issued in violation of any preemptive right. All of the issued and outstanding Wholly Owned Opco Membership Interests have been duly authorized and validly issued and are owned of record and beneficially by the applicable Wholly Owned Holdco and were not issued in violation of any preemptive right. There are no voting agreements or other similar agreements with respect to the Tax Equity Class B Membership Interests, the Inverted Lease Opco Membership Interests or the Wholly Owned Opco Membership Interests.

(c) The Pledgor is the sole member of the Borrower and has good and valid legal and beneficial title to all of the Borrower Membership Interests, free and clear of all Liens other than Permitted Liens. All of the issued and outstanding Borrower Membership Interests have been duly authorized and validly issued and, as of the Closing Date, are owned of record and beneficially by Pledgor and were not issued in violation of any preemptive right. There are no voting agreements or other similar agreements with respect to the Borrower Membership Interests.

(d) There are no outstanding options, warrants or rights for conversion into or acquisition, purchase or transfer of any of the Membership Interests. Except for the call rights of the Tax Equity Holdcos under the Tax Equity Documents, with respect to the membership interests of the

Tax Equity Class A Members in the Tax Equity Opcos, there are no outstanding options, warrants or rights for conversion into or acquisition, purchase or transfer of any of the membership interests in a Partnership Flip Opco. There are no agreements or arrangements for the issuance by any Relevant Party of additional equity interests.

(e) Schedule 5.03(e) accurately sets forth the ownership structure of the Relevant Parties. The Borrower has no subsidiaries other than as shown on Schedule 5.03(e), in each case, as such schedule shall be updated pursuant to Section 2.05(e) or by an Authorized Officer of the Borrower in each Permitted Fund Disposition Certificate.

(f) Schedule 5.03(f) sets forth the name and jurisdiction of incorporation or formation of each Loan Party and the Tax Equity Opcos and the percentage of each class of Capital Stock owned by any Loan Party, as such schedule shall be updated pursuant to Section 2.05(e) or by an Authorized Officer of the Borrower in each Permitted Fund Disposition Certificate.

Section 5.04 Governmental Authorization; Compliance with Laws.

(a) No approval, consent, exemption, authorization, or other action by, or notice to, or filing with, any Governmental Authority or any other Person is necessary or required in connection with (i) the execution, delivery or performance by, or enforcement against, any Relevant Party of this Agreement or any other Transaction Document, (ii) the grant by any Loan Party of the Liens granted by it pursuant to the Collateral Documents, (iii) the perfection or maintenance of the Liens created under the Collateral Documents or (iv) the exercise by the Administrative Agent or any Lender of its rights under the Loan Documents or the remedies in respect of the Collateral pursuant to this Agreement or the Collateral Documents, except for the authorizations, approvals, actions, notices and filings listed on Schedule 5.04, all of which have been duly obtained, taken, given or made and are in full force and effect as of the Closing Date.

(b) Each of the Sponsor and the Relevant Parties is, and the business and operations of each such Person and its development, construction and operation of the Projects are, and always have been, conducted in all respects in compliance with all material Laws (including, without limitation, laws with respect to consumer leasing and protection but not including Environmental Laws which are addressed under Section 5.16), and none of Sponsor or any Relevant Party has received written notice from any Governmental Authority of an actual or potential violation of any such Laws, except as does not constitute or could not reasonably be expected to constitute a Material Adverse Effect.

Section 5.05 Solvency. No Sponsor Party has entered into any Loan Document with the actual intent to hinder, delay, or defraud any creditor. After giving effect to the issuance of the Loans (and the use of proceeds thereof), the fair saleable value of the Loan Parties' assets, taken as a whole, exceeds and will, immediately following the making of any Loans, exceed the Loan Parties' total liabilities, including, without limitation, subordinated, unliquidated, disputed and contingent obligations. The fair

saleable value of the Loan Parties' assets, taken as a whole, is and will, immediately following the making of any Loans (and the use of proceeds thereof), be greater than the Loan Parties' probable liabilities, including the maximum amount of its contingent obligations on its debts as such debts become absolute and matured. The Loan Parties' Assets, taken as a whole, do not and, immediately following the making of any Loans (and the use of proceeds thereof) will not, constitute unreasonably small capital to carry out the business of the Loan Parties as conducted or as proposed to be conducted. The Borrower does not intend for it or any Subsidiary to, and does not believe that any such Person will, incur Indebtedness and liabilities beyond its ability to pay such Indebtedness and liabilities as they mature (taking into account the timing and amounts of cash to be received by the Loan Parties and the amounts to be payable on or in respect of obligations of the Loan Parties).

Section 5.06 Use of Proceeds and Margin Security: Governmental Regulation.

(a) No portion of the proceeds from the making of the Loans will be used by the Borrower, a Loan Party or any other Person in any manner that might cause the borrowing or the application of such proceeds to violate Regulation T, Regulation U or Regulation X or any other regulation of the Board of Governors of the Federal Reserve System. Nor is Borrower engaged principally, or as one of its principal activities in the business of extending credit for the purpose of purchasing or carrying margin stock (as defined or used in Regulation T, U or X of the Federal Reserve Board).

(b) Each of the Projects is a Qualifying Facility.

(c) The Borrower and each of the Subsidiaries are either not subject to, or are exempt from, regulation (i) as a "public utility" or a "holding company" under the FPA, or (ii) under PUHCA.

(d) The Borrower and each of the Subsidiaries are either not subject to, or are exempt from, regulation as a "public utility," an "electric utility," "electric corporation," or a "holding company," or similar terms, under the relevant State's laws or regulations, including state laws and regulations respecting the rates of electric utilities and the financial and organizational regulations of electric utilities.

(e) None of the Borrower or any Subsidiary is an "investment company", or a company "controlled" by an "investment company", within the meaning of the Investment Company Act.

(f) None of the Borrower or any Subsidiary is subject to regulation under any federal or state statute or regulation that limits their ability to incur indebtedness for borrowed money.

(g) Solely as the result of the execution and delivery of the Loan Documents, the consummation of the transactions contemplated by the Loan Documents, or the performance of obligations under the Loan Documents, none of the Lenders will become subject to regulation (i) as a

“public utility” or a “holding company” under the FPA, (ii) under PUHCA, or (iii) as a “public utility,” an “electric utility,” “electric corporation,” or a “holding company,” or similar terms, under the relevant State’s laws or regulations.

Section 5.07 Defaults; No Material Adverse Effect.

(a) No Default or Event of Default has occurred and is continuing.

(b) Since the later of (i) the Closing Date and (ii) the last date any Revolving Loans were advanced pursuant to Section 2.01, no event, condition or circumstance has occurred which has resulted in, or could reasonably be expected to result in, a Material Adverse Effect.

Section 5.08 Financial Statements; Books and Records.

(a) Except as set forth on Schedule 5.08, all Financial Statements which have been furnished by or on behalf of any Relevant Party, the Sponsor or any of their Affiliates to the Administrative Agent in connection with the Loan Documents have been prepared in accordance with GAAP, consistently applied and present fairly in all material respects the financial condition of the Persons covered thereby as of the respective dates thereof, subject, in the case of any such unaudited Financial Statements, to changes resulting from audit and normal year-end adjustments, including the absence of footnotes and subject to validation of individual capital accounts in calculating net loss attributable to noncontrolling interests in conformity with GAAP.

(b) All books, accounts and files of each Relevant Party are accurate and complete in all material respects, and Borrower has access to all such books and records and the authority to grant access to such books and records to the Secured Parties.

Section 5.09 Indebtedness. The Borrower and the Subsidiaries have no outstanding Indebtedness other than the Obligations and other Permitted Indebtedness. The Obligations under the Loan Documents constitute Indebtedness of the Borrower and the Subsidiaries secured by a first ranking priority security interest in the Collateral. As of the Closing Date, no other Indebtedness of the Borrower or the Subsidiaries ranks senior in priority to the Obligations.

Section 5.10 Litigation; Adverse Facts. There are no judgments outstanding against the Sponsor or any Relevant Party, or affecting any of the Projects or any other property of any Relevant Party, nor to the Relevant Parties’ Knowledge is there any action, charge, claim, demand, suit, proceeding, petition, governmental investigation or arbitration now pending or threatened against the Sponsor or any Relevant Party, respectively, or any of the Projects that relates to the legality, validity or enforceability of any of the Transaction Documents, the ability of a Secured Party to exercise any of its rights in respect of the Collateral or the Collateral Documents or, other than as set forth in Schedule 5.10, that could reasonably be expected to result in a Material Adverse Effect.

*** Confidential treatment has been requested for the bracketed portions. The confidential redacted portion has been omitted and filed separately with the Securities and Exchange Commission.

Section 5.11 Taxes. All U.S. federal, state, local tax returns and reports, and all other material tax returns or reports, of the Relevant Parties required to be filed have been timely filed (or any such Person has timely filed for a valid extension and such extension has not expired), and all material taxes, assessments, fees and other governmental charges (including any payments in lieu of taxes) upon such Persons and upon their properties, assets, income, profits, businesses and franchises which are due and payable have been timely paid except to the extent the same are being contested in accordance with Section 6.06, and/or adequate reserves under GAAP are maintained, as listed on Schedule 5.11. There are no Liens for Taxes (other than Liens for Taxes not yet due and payable) on any assets of any Relevant Party, no unresolved written claim has been asserted with respect to any Taxes of any Relevant Party, no waiver or agreement by any Relevant Party is in force for the extension of time for the assessment or payment of any Tax, and no request for any such extension or waiver is currently pending. At any time after the granting of any temporary waiver pursuant to this Section 6.13 but not more than once in any year, the Administrative Agent may request, and the Borrower shall furnish to the Administrative Agent within thirty (30) days after such request, an updated insurance report reasonably acceptable to the Administrative Agent (in consultation with the Insurance Consultant) from the Company's independent insurance broker. The Borrower shall, and shall cause the Subsidiaries to, prudently exercise and enforce their rights, authorities and discretions under the Portfolio Documents to which they are a party.

Any such actions taken by the Administrative Agent shall be cumulative and concurrent and may be pursued independently, singly, successively, together or otherwise, at such time and in such order as the Administrative Agent may determine in its sole discretion, to the fullest extent permitted by Law, without impairing or otherwise affecting the other rights and remedies of the Administrative Agent permitted by Law, equity or contract or as set forth herein or in the other Loan Documents. ARTICLE XI ADMINISTRATIVE AGENT

Section 11.01 Appointment and Authority.

(a) Each of the Lenders hereby appoints Investec to act on its behalf as the Administrative Agent hereunder and under the other Loan Documents and authorizes the Administrative Agent to take such actions on its behalf and to exercise such powers as are delegated to the Administrative Agent by the terms hereof or thereof, together with such actions and powers as are reasonably incidental thereto. The provisions of this Article are solely for the benefit of the Lender Parties and no Relevant Party nor the Sponsor shall have rights of a third party beneficiary of any of such provisions. It is understood and agreed that the use of the term “Administrative Agent” herein or in any other Loan Documents (or any other similar term) with reference to the Administrative Agent is not intended to connote any fiduciary or other implied (or express) obligations arising under agency doctrine of any

applicable Law. Instead such term is used as a matter of market custom, and is intended to create or reflect only an administrative relationship between contracting parties.

Section 11.02 Rights as a Lender. The Person serving as the Administrative Agent hereunder shall have the same rights and powers in its capacity as a Lender as any other Lender and may exercise the same as though it were not the Administrative Agent and the term “Lender” or “Lenders” shall, unless otherwise expressly indicated or unless the context otherwise requires, include the Person serving as the Administrative Agent hereunder in its individual capacity. Such Person and its Affiliates may accept deposits from, lend money to, own securities of, act as the financial advisor or in any other advisory capacity for and generally engage in any kind of business with any Relevant Party or their Affiliates as if such Person were not the Administrative Agent hereunder and without any duty to account therefor to the Lenders.

Section 11.03 Exculpatory Provisions. The Administrative Agent shall not have any duties or obligations except those expressly set forth herein and in the other Loan Documents, and its duties hereunder shall be administrative in nature. Without limiting the generality of the foregoing, the Administrative Agent:

(a) shall not be subject to any fiduciary or other implied duties, regardless of whether a Default has occurred and is continuing;

(b) shall not have any duty to take any discretionary action or exercise any discretionary powers, except discretionary rights and powers expressly contemplated hereby or by the other Loan Documents that the Administrative Agent is required to exercise as directed in writing by the Required Lenders (or such other number or percentage of the Lenders as shall be expressly provided for herein or in the other Loan Documents), provided that the Administrative Agent shall not be required to take any action that, in its opinion or the opinion of its counsel, may expose the Administrative Agent to liability or that is contrary to any Loan Document or applicable Law, including for the avoidance of doubt any action that may be in violation of the automatic stay under any Debtor Relief Law; and

(c) shall not, except as expressly set forth herein and in the other Loan Documents, have any duty to disclose, and shall not be liable for the failure to disclose, any information relating to the Borrower or any of its Affiliates that is communicated to or obtained by the Person serving as the Administrative Agent or any of its Affiliates in any capacity.

The Administrative Agent shall not be liable for any action taken or not taken by it (i) with the consent or at the request of the Required Lenders (or such other number or percentage of the Lenders as shall be necessary, or as the Administrative Agent shall believe in good faith shall be necessary, under the circumstances as provided in Section 12.03 and Section 10.02) or (ii) in the absence of its own gross negligence or willful misconduct as determined by a court of competent jurisdiction by final judgment.

["*"] Confidential treatment has been requested for the bracketed portions. The confidential redacted portion has been omitted and filed separately with the Securities and Exchange Commission.

The Administrative Agent shall be deemed not to have knowledge of any Default unless and until notice describing such Default is given in writing to the Administrative Agent by the Borrower or a Lender.

The Administrative Agent shall not be responsible for or have any duty to ascertain or inquire into (i) any statement, warranty or representation made in or in connection with this Agreement or any other Loan Document, (ii) the contents of any certificate, report or other document delivered hereunder or thereunder or in connection herewith or therewith, (iii) the performance or observance of any of the covenants, agreements or other terms or conditions set forth herein or therein or the occurrence of any Default, (iv) the validity, enforceability, effectiveness or genuineness of this Agreement, any other Loan Document or any other agreement, instrument or document or (v) the satisfaction of any condition set forth in Article IX or elsewhere herein, other than to confirm receipt of items expressly required to be delivered to the Administrative Agent.

Section 11.04 Reliance by Administrative Agent. The Administrative Agent shall be entitled to rely upon, and shall not incur any liability for relying upon, any notice, request, certificate, consent, statement, instrument, document or other writing (including any electronic message, Internet or intranet website posting or other distribution) believed by it to be genuine and to have been signed, sent or otherwise authenticated by the proper Person. The Administrative Agent also may rely upon any statement made to it orally or by telephone and believed by it to have been made by the proper Person, and shall not incur any liability for relying thereon. In determining compliance with any condition hereunder to the making of a Loan, which by its terms must be fulfilled to the satisfaction of a Lender, the Administrative Agent may presume that such condition is satisfactory to such Lender unless the Administrative Agent shall have received notice to the contrary from such Lender prior to the making of such Loan. The Administrative Agent may consult with legal counsel (who may be counsel for the Borrower), independent accountants and other experts selected by it, and shall not be liable for any action taken or not taken by it in accordance with the advice of any such counsel, accountants or experts.

Section 11.05 Delegation of Duties. The Administrative Agent may perform any and all of its duties and exercise its rights and powers hereunder or under any other Loan Document by or through any one or more sub Administrative Agents appointed by the Administrative Agent. The Administrative Agent and any such sub Administrative Agent may perform any and all of its duties and exercise its rights and powers by or through their respective Related Parties. The exculpatory provisions of this Article XI shall apply to any such sub Administrative Agent and to the Related Parties of the Administrative Agent and any such sub Administrative Agent, and shall apply to their respective activities in connection with the syndication of the credit facilities provided for herein as well as activities as Administrative Agent. The Administrative Agent shall not be responsible for the negligence or misconduct of any sub-Administrative Agents selected with due care except to the extent that a court of competent jurisdiction determines in a final and non-appealable judgment that the Administrative Agent acted with gross negligence or willful misconduct in the selection of such sub-Administrative Agents.

Section 11.06 Resignation and Removal of Administrative Agent.

(a) The Administrative Agent may at any time give notice of its resignation to the Lenders, the Depository Bank, and the Borrower. The Administrative Agent may be removed at any time by the Required Lenders for the Administrative Agent's gross negligence or willful misconduct. Upon receipt of any such notice of resignation or removal, the Required Lenders shall have the right, with the consent of the Borrower (not to be unreasonably withheld or delayed), unless a Default or an Event of Default shall have occurred and is continuing, in which case the consent of the Borrower shall not be required, to appoint a successor, which shall be a bank with an office in the United States, or an Affiliate of any such bank with an office in the United States. In the case of a removal, if no such successor shall have been so appointed by the Required Lenders and shall have accepted such appointment within 30 days after the retiring Administrative Agent gives notice of its resignation (or such earlier day as shall be agreed by the Required Lenders) (the "Resignation Effective Date"), then the retiring Administrative Agent may (but shall not be obligated to) on behalf of the Lenders, appoint a successor Administrative Agent meeting the qualifications set forth above. Such resignation shall become effective in accordance with such notice on the Resignation Effective Date and upon acceptance by the successor Administrative Agent.

(b) With effect from the Resignation Effective Date or the date on which the Administrative Agent has been removed by the Required Lenders, as applicable, (1) the retiring or removed Administrative Agent shall be discharged from its duties and obligations hereunder and under the other Loan Documents and (2) except for any indemnity payments or other amounts then owed to the retiring or removed Administrative Agent, all payments, communications and determinations provided to be made by, to or through the Administrative Agent shall instead be made by or to each Lender directly, until such time, if any, as the Required Lenders appoint a successor Administrative Agent as provided for above. Upon the acceptance of a successor's appointment as Administrative Agent hereunder, such successor shall succeed to and become vested with all of the rights, powers, privileges and duties of the retiring or removed Administrative Agent (other than as provided in Section 4.09(h) and other than any rights to indemnity payments or other amounts owed to the retiring or removed Administrative Agent as of the Resignation Effective Date or the date on which the Administrative Agent has been removed by the Required Lenders, as applicable), and the retiring or removed Administrative Agent shall be discharged from all of its duties and obligations hereunder or under the other Loan Documents (if not already discharged therefrom as provided above in this Section 11.06). The fees payable by the Borrower to a successor Administrative Agent shall be the same as those payable to its predecessor unless otherwise agreed between the Borrower and such successor. After the retiring or removed Administrative Agent's resignation hereunder and under the other Loan Documents, the provisions of this ARTICLE XI and Section 4.07 and Section 4.08 shall continue in effect for the benefit of such retiring or removed Administrative Agent, its sub Administrative Agents and their respective Related Parties in respect of any actions taken or omitted to be taken by any of them while the retiring or removed Administrative Agent was acting as Administrative Agent.

Section 11.07 Non-Reliance on Administrative Agent and Other Lenders. Each Lender acknowledges that it has, independently and without reliance upon the Administrative Agent or any other Lender or any of their Related Parties and based on such documents and information as it has deemed appropriate, made its own credit analysis and decision to enter into this Agreement. Each Lender also acknowledges that it will, independently and without reliance upon the Administrative Agent or any other Lender or any of their Related Parties and based on such documents and information as it shall from time to time deem appropriate, continue to make its own decisions in taking or not taking action under or based upon this Agreement, any other Loan Document or any related agreement or any document furnished hereunder or thereunder.

Section 11.08 Administrative Agent May File Proofs of Claim. In case of the pendency of any proceeding under any Debtor Relief Law or any other judicial proceeding relative to the Borrower, the Administrative Agent (irrespective of whether the principal of any Loan shall then be due and payable as herein expressed or by declaration or otherwise and irrespective of whether the Administrative Agent shall have made any demand on the Borrower) shall be entitled and empowered, by intervention in such proceeding or otherwise:

(a) to file and prove a claim for the whole amount of the principal and interest owing and unpaid in respect of the Loans and all other Obligations that are owing and unpaid and to file such other documents as may be necessary or advisable in order to have the claims of the Lenders and the Administrative Agent (including any claim for the reasonable compensation, expenses, disbursements and advances of the Lenders and the Administrative Agent and their respective Administrative Agents and counsel and all other amounts due the Lenders and the Administrative Agent under Section 4.06, Section 4.07 and Section 4.08) allowed in such judicial proceeding; and

(b) to collect and receive any monies or other property payable or deliverable on any such claims and to distribute the same;

and any custodian, receiver, assignee, trustee, liquidator, sequestrator or other similar official in any such judicial proceeding is hereby authorized by each Lender to make such payments to the Administrative Agent and, in the event that the Administrative Agent shall consent to the making of such payments directly to the Lenders, to pay to the Administrative Agent any amount due for the reasonable compensation, expenses, disbursements and advances of the Administrative Agent and its Administrative Agents and counsel, and any other amounts due the Administrative Agent under Section 4.06, Section 4.07 and Section 4.08.

Nothing contained herein shall be deemed to authorize the Administrative Agent to authorize or consent to or accept or adopt on behalf of any Lender any plan of reorganization, arrangement, adjustment or composition affecting the Obligations or the rights of any Lender to authorize the Administrative Agent to vote in respect of the claim of any Lender in any such proceeding.

Section 11.09 Appointment of Collateral Agent and Depository Bank. The Issuing Bank and each Lender hereby consents and agrees to the appointment of the Collateral Agent and the Depository Bank respectively in accordance with the Collateral Agency Agreement and the Depository Agreement and authorize each such Agent in such capacity to take such action on its behalf under the provisions of the Collateral Documents and to exercise such powers and perform such duties as are expressly delegated to it by the terms of the Collateral Documents, together with such other powers as are reasonably incidental thereto. The Collateral Agent and Depository Bank shall each be an express third party beneficiary of Article V, Article VIII, Section 9.01(e), Section 9.02(k), Section 12.01(b)(viii), Section 4.07, Section 4.08 and Section 4.09.

Section 11.10 Joint Lead Arrangers. The Joint Lead Arrangers shall not have any duties or responsibilities hereunder in their capacities as such.

ARTICLE XII MISCELLANEOUS

Section 12.01 Waivers; Amendments.

(a) No Deemed Waivers; Remedies Cumulative. No failure or delay by the Administrative Agent or any Lender in exercising any right or power hereunder shall operate as a waiver thereof, nor shall any single or partial exercise of any such right or power, or any abandonment or discontinuance of steps to enforce such a right or power, preclude any other or further exercise thereof or the exercise of any other right or power. The rights and remedies of the Administrative Agent and the Lenders hereunder are cumulative and are not exclusive of any rights or remedies that they would otherwise have. No waiver of any provision of this Agreement or consent to any departure by the Borrower therefrom shall in any event be effective unless the same shall be permitted by Section 12.01(b), and then such waiver or consent shall be effective only in the specific instance and for the purpose for which given. Without limiting the generality of the foregoing, the making of a Loan shall not be construed as a waiver of any Default, regardless of whether the Administrative Agent or any Lender may have had notice or knowledge of such Default at the time.

(b) Amendments. No amendment, supplement, modification or waiver of any provision of this Agreement or any other Loan Document, and no consent to any departure by the Borrower therefrom, shall be effective unless in writing signed by the Required Lenders and the Borrower, as the case may be, and acknowledged by the Administrative Agent, and each such waiver or consent shall be effective only in the specific instance and for the specific purpose for which given; provided, however, that no such waiver and no such amendment, supplement or modification shall:

(i) increase the amount or extend the expiration date of any Commitment, in each case, without the written consent of the Issuing Bank and each Lender adversely affected thereby;

(iii) reduce or forgive the principal amount or extend the final scheduled date of maturity of any Loan, extend the scheduled date of any amortization payment in respect of any Loan, reduce the stated rate of any interest or fee payable under this Agreement (except in connection with the waiver of applicability of any post-default increase in interest rates (which waiver shall be effective with the consent of the Required Facility Lenders of each adversely affected Facility)) or extend the scheduled date of any payment thereof, in each case, without the written consent of the Issuing Bank and each Lender adversely affected thereby;

(iv) amend, modify or waive any provision of Article IV in a manner that would alter the pro rata sharing of payments required thereunder, without the written consent of each Lender or amend Section 12.17 without the written consent of each Lender Party adversely affected thereby;

(v) change the voting rights of the Issuing Bank or the Lenders under this Section 12.01(b) or the definition of the term “Required Lenders” or “Required Facility Lenders” or any other provision hereof specifying the number or percentage of Lenders or other Secured Parties required to waive, amend or modify any rights hereunder or make any determination or grant any consent hereunder, without the written consent of each Lender and the Issuing Bank; or

(vi) release all or a material portion of the Collateral, or any Loan Party from their obligations under the Collateral Documents or any Membership Interests without the written consent of the Issuing Bank and each Lender, in each case, other than in connection with a disposition permitted hereunder; and provided that no such agreement shall amend, modify or otherwise affect the rights or duties of any Lender Party hereunder without the prior written consent of such Lender Party;

(vii) amend, modify or waive any provision of Article XI or any other provision of any Loan Document that would adversely affects the Administrative Agent without the written consent of the Administrative Agent;

(viii) amend, modify or waive any provision of the Collateral Agency Agreement or the Depository Agreement or any other provision of any Loan Document that would adversely affect the Collateral Agent or Depository Bank without the written consent of such affected Agent;

(ix) amend, modify or waive any provision of Section 2.02 (or any other provision of this Agreement or any other Loan Document that specifically provides for rights and obligations of the Issuing Bank) without the written consent of the Issuing Bank;

(x) change the order of priority of payments set forth in Section 4.02(b) of the Depository Agreement or Section 2.03(a) of the Collateral Agency Agreement without the written consent of each Lender Party directly affected thereby; and

(xi) amend, modify or waive any provision of this Agreement in a manner that would adversely affect the Lenders or the LC Lenders disproportionately to any Lenders in respect of any other Class of Loan without the consent of all the Required Facility Lenders of the adversely affected Facility.

(b) Electronic Communications. Notices and other communications to the Administrative Agent or the Lenders hereunder may be delivered or furnished by electronic communication (including e mail and Internet or intranet websites) pursuant to procedures approved by the Administrative Agent; provided that the foregoing shall not apply to notices to any Lender pursuant to Article II if such Lender has notified the Administrative Agent that it is incapable of receiving notices under such Article by electronic communication. The Administrative Agent or the Borrower may each, in its discretion, agree to accept notices and other communications to it hereunder by electronic communications pursuant to procedures approved by it, provided that approval of such procedures may be limited to particular notices or communications.

Unless the Administrative Agent otherwise prescribes, (i) notices and other communications sent to an e-mail address shall be deemed received upon the sender's receipt of an acknowledgement from the intended recipient (such as by the "return receipt requested" function, as available, return e-mail or other written acknowledgement) and (ii) notices or communications posted to an Internet or intranet website shall be deemed received upon the deemed receipt by the intended recipient at its e-mail address as described in the foregoing clause (i) of notification that such notice or communication is available and identifying the website address therefor; provided that, for both clauses (i) and (ii), if such notice, email or other communication is not sent during the normal business hours of the recipient, such notice, email or communication shall be deemed to have been sent at the opening of business on the next Business Day for the recipient.

(c) Change of Address, Etc. Each of the Borrower and the Administrative Agent may change its address, facsimile or telephone number for notices and other communications hereunder by notice to the other parties hereto. Each other Lender may change its address, facsimile or telephone number for notices and other communications hereunder by notice to the Borrower and the Administrative Agent. In addition, each Lender agrees to notify the Administrative Agent from time to time to ensure that the Administrative Agent has on record (i) an effective address, contact name, telephone number, facsimile number and electronic mail address to which notices and other communications may be sent and (ii) accurate wire instructions for such Lender.

(d) Reliance by Administrative Agent and Lenders. The Administrative Agent and the Lenders shall be entitled to rely and act upon any notices (including telephonic or electronic Borrowing Notices) purportedly given by or on behalf of the Borrower even if (i) such notices were not made in a manner specified herein, were incomplete or were not preceded or followed by any other form of notice specified herein, or (ii) the terms thereof, as understood by the recipient, varied from any confirmation thereof. The Borrower shall indemnify each Indemnitee from all losses, costs, expenses and liabilities resulting from the reliance by such Person on each notice purportedly given by or on behalf of the Borrower, other than those resulting from the gross negligence or willful misconduct

Nothing in this Agreement, expressed or implied, shall be construed to confer upon any Person (other than the parties hereto, their respective successors and assigns permitted hereby, Participants to the extent provided in Section 12.05(d) and, to the extent expressly contemplated hereby, the Related Parties of each of the Administrative Agent and the Lenders) any legal or equitable right, remedy or claim under or by reason of this Agreement.

(b) Assignments by Lenders. Any Lender may at any time assign to one or more assignees all or a portion of its rights and obligations under this Agreement upon prior notice to the Administrative Agent and the Borrower; provided that any such assignment shall be subject to the following conditions:

(i) Minimum Amounts.

(A) in the case of an assignment of the entire remaining amount of the assigning Lender's Commitments and/or the Loans at the time owing to it or contemporaneous assignments to related Approved Funds that equal at least the amount specified in clause (b)(i)(B) below in the aggregate, or in the case of an assignment to a Lender, an Affiliate of a Lender or an Approved Fund, no minimum amount need be assigned; and

(B) in any case not described in clause (b)(i)(A) above, the aggregate amount of the Commitments (which for this purpose includes Loans outstanding thereunder) or, if the applicable Commitments are not then in effect, the principal outstanding balance of the Loans of the assigning Lender subject to each such assignment (determined as of the date the Assignment and Assumption with respect to such

assignment is delivered to the Administrative Agent or, if “Trade Date” is specified in the Assignment and Assumption, as of the Trade Date) shall not be less than \$1,000,000, unless each of the Administrative Agent and, so long as no Event of Default has occurred and is continuing, the Borrower otherwise consents (each such consent not to be unreasonably withheld or delayed).

(ii) Proportionate Amounts. Each partial assignment shall be made as an assignment of a proportionate part of all the assigning Lender’s rights and obligations under this Agreement with respect to the Loans or the Commitment assigned;

(iii) Required Consents. The consent of the Administrative Agent, the Borrower (such consent in each case not to be unreasonably withheld or delayed) and, with respect to the assignment of any LC Exposure, the Issuing Bank shall be required for any assignment pursuant to this Section 12.05(b) other than (A) at any time prior to the end of the Availability Period, assignments to a Lender or an Eligible Assignee and (B) at any time after the Availability Period, assignments to a Lender, an Affiliate of a Lender, an Eligible Assignee or an Approved Fund; provided that, in each case, no consent of the Borrower shall be required if a Default or Event of Default has occurred and is continuing and the Borrower’s consent shall be deemed to have been given if the Borrower has not responded within ten (10) Business Days of an assignment request. No other consent shall be required for any such assignment except to the extent required by clause (b)(i)(B) above.

(iv) Assignment and Assumption. The parties to each assignment shall execute and deliver to the Administrative Agent an Assignment and Assumption, together with a processing fee in the amount of \$3,500; provided, however, that the Administrative Agent may, in its sole discretion, elect to waive such processing fee in the case of any assignment. The assignee, if it is not a Lender, shall deliver to the Administrative Agent an Administrative Questionnaire.

(v) Prohibited Assignments. No assignment of any Loans or Commitments shall be made to (A) a Competitor, (B) any Defaulting Lender or any of its Affiliates in this Section 12.05(b)(v), (C) to a natural Person or (D) to any Affiliated Lender if, in the case of this subclause (D), after giving effect to such assignment, the Affiliated Lenders would, in the aggregate, own or hold in excess of 25% of the Commitments, Loans and LC Exposure outstanding under the Facilities (calculated as of the date of such purchase).

(vi) Certain Additional Payments. In connection with any assignment of rights and obligations of any Defaulting Lender hereunder, no such assignment shall be effective unless and until, in addition to the other conditions thereto set forth herein, the parties to the assignment shall make such additional payments to the Administrative Agent in an aggregate amount sufficient, upon distribution thereof as appropriate (which may be outright payment,

purchases by the assignee of participations or subparticipations, or other compensating actions, including funding, with the consent of the Borrower and the Administrative Agent, the applicable pro rata share of Loans previously requested but not funded by the Defaulting Lender, to each of which the applicable assignee and assignor hereby irrevocably consent), to (x) pay and satisfy in full all payment liabilities then owed by such Defaulting Lender to the Administrative Agent and each other Lender hereunder (and interest accrued thereon), and (y) acquire (and fund as appropriate) its full pro rata share of all Loans. Notwithstanding the foregoing, in the event that any assignment of rights and obligations of any Defaulting Lender hereunder shall become effective under applicable Law without compliance with the provisions of this clause (vii), then the assignee of such interest shall be deemed to be a Defaulting Lender for all purposes of this Agreement until such compliance occurs.

(vii) Assignment to an Affiliated Lender. In the event that the Borrower or any Affiliate thereof (including the Sponsor) is an assignee under this Section 12.05(b) (an “Affiliated Lender”), (A) such Affiliated Lender shall be a Non-Voting Lender (as defined in the Collateral Agency Agreement) and its Commitments shall not be included in any calculation for purposes of determining whether a requisite number or percentage of Lenders, as applicable, have voted to take an action hereunder and (B) the Affiliated Lender, in its capacity as a Lender, shall not have any right (1) to consent to any amendment, modification, waiver, consent or other such action with respect to any of the terms of this Agreement or any other Loan Document, (2) to require the Administrative Agent or any Lender to undertake any action (or refrain from taking any action) with respect to this Agreement or any other Loan Document, (3) to otherwise vote on any matter related to this Agreement or any other Loan Document, (4) to attend any meeting or conference call with the Administrative Agent or any Lender or receive any information from the Administrative Agent or any Lender or (5) to make or bring any claim, in its capacity as a Lender, against the Administrative Agent or any Lender or with respect to the duties and obligations of such Person under the Loan Documents; provided, that no amendment, modification or waiver shall (I) deprive the Affiliated Lender, in its capacity as a Lender, of its share of any payments which Lenders are entitled to share on a pro rata basis hereunder or (II) affect the Affiliated Lender, or any of them, in its capacity as Lender, in a manner that is materially disproportionate to the effect of such amendment or other modification on other Lenders; provided, further, no amendment, modification or waiver expressly requiring the consent of all Lenders pursuant to Section 12.01(b) shall be effective without the consent of the Affiliated Lender, in its capacity as a Lender. Notwithstanding anything to the contrary in this Agreement, for all purposes of this Agreement and the other Loan Documents, including, without limitation, for purposes of the Collateral Agency Agreement, Gaia Portfolio 2016-A shall not be an Affiliated Lender prior to receipt by the Administrative Agent of the NY Green Bank Termination Notice; provided, that for purposes of determining the voting percentage of Gaia Portfolio 2016-A hereunder, Gaia Portfolio 2016-A shall be deemed to hold an aggregate amount

of outstanding Revolving Loans and Revolving Loan Commitments equal to the aggregate amount of outstanding loans and commitments to make loans under the NY Green Bank Loan Agreement, as such amounts may be certified to the Administrative Agent from time to time by NY Green Bank

Subject to acceptance and recording thereof by the Administrative Agent pursuant to Section 12.05(c), from and after the effective date specified in each Assignment and Assumption, the assignee thereunder shall be a party to this Agreement and, to the extent of the interest assigned by such Assignment and Assumption, have the rights and obligations of a Lender under this Agreement, and the assigning Lender thereunder shall, to the extent of the interest assigned by such Assignment and Assumption, be released from its obligations under this Agreement (and, in the case of an Assignment and Assumption covering all of the assigning Lender's rights and obligations under this Agreement, such Lender shall cease to be a party hereto) but shall continue to be entitled to the benefits of Section 4.06, Section 4.07, Section 4.08, Section 4.09 and Section 4.11 with respect to facts and circumstances occurring prior to the effective date of such assignment; provided that except to the extent otherwise expressly agreed by the affected parties, no assignment by a Defaulting Lender will constitute a waiver or release of any claim of any party hereunder arising from that Lender's having been a Defaulting Lender. Any assignment or transfer by a Lender of rights or obligations under this Agreement that does not comply with this paragraph shall be treated for purposes of this Agreement as a sale by such Lender of a participation in such rights and obligations in accordance with Section 12.05(d).

(c) Register. The Administrative Agent, acting solely for this purpose as an Administrative Agent of the Borrower, shall maintain at one of its offices a copy of each Assignment and Assumption delivered to it and a register for the recordation of the names and addresses of the Lenders, and the Commitments of, and principal amounts of the Loans owing to, each Lender pursuant to the terms hereof from time to time (the "Register"). Upon its receipt of, and consent to, a duly completed Assignment and Assumption executed by an assigning Lender and an assignee lender, administrative details information with respect to such assignee lender (unless the assignee lender shall already be a Lender hereunder), the processing and recordation fee referred to in clause (b)(iv) above, if applicable, and the written consent of the Administrative Agent to such assignment and any applicable tax forms, the Administrative Agent shall promptly record each assignment made in accordance with this Section 12.05(c) in the Register. No assignment shall be effective unless it has been recorded in the Register as provided in this Section 12.05(c). The entries in the Register shall be conclusive absent manifest error, and the Borrower, the Administrative Agent and the Lenders shall treat each Person whose name is recorded in the Register pursuant to the terms hereof as a Lender hereunder for all purposes of this Agreement. The Register shall be available for inspection by the Borrower and any Lender, at any reasonable time and from time to time upon reasonable prior notice.

(d) Participations. (%4) Any Lender may at any time, without the consent of, or notice to, the Borrower or the Administrative Agent, sell participations to any Person (other than a

natural Person or the Borrower or any of the Borrower's Affiliates) (each, a "Participant") in all or a portion of such Lender's rights and/or obligations under this Agreement (including all or a portion of its Commitments and/or the Loans owing to it); provided that (i) such Lender's obligations under this Agreement shall remain unchanged, (ii) such Lender shall remain solely responsible to the other parties hereto for the performance of such obligations, and (iii) the Borrower, the Administrative Agent and the Lenders shall continue to deal solely and directly with such Lender in connection with such Lender's rights and obligations under this Agreement.

(i) Any agreement or instrument pursuant to which a Lender sells such a participation shall provide that such Lender shall retain the sole right to enforce this Agreement and to approve any amendment, modification or waiver of any provision of this Agreement; provided that such agreement or instrument may provide that such Lender will not, without the consent of the Participant, agree to any amendment, modification or waiver requiring the consent of all Lenders, as set forth in first proviso in Section 12.01 that affects such Participant. The Borrower agree that each Participant shall be entitled to the benefits of Section 4.08, Section 4.09 and Section 4.10 to the same extent as if it were a Lender and had acquired its interest by assignment pursuant to Section 12.05(b); provided that such Participant agrees to be subject to the provisions of Section 4.09 as if it were an assignee under Section 12.05(b). To the extent permitted by Law, each Participant also shall be entitled to the benefits of Section 4.11 as though it were a Lender; provided that such Participant agrees to be subject to Section 4.10 as though it were a Lender. Each Lender that sells a participation shall, acting solely for this purpose as an agent of the Borrower, maintain a register on which it enters the name and address of each Participant and the principal amounts (and stated interest) of each Participant's interest in the Loans, Commitments or other rights or obligations under the Loan Documents (each such register, a "Participant Register"); provided that no Lender shall have any obligation to disclose all or any portion of any Participant Register to any Person (including the identity of any Participant or any information relating to a Participant's interest in any Commitments, Loans or other rights or obligations under any Loan Document) except to the extent that such disclosure is necessary to establish that such Commitment, Loan or other right or obligation is in registered form under section 5f.103-1(c) of the U.S. Treasury Regulations. The entries in a Participant Register shall be conclusive absent manifest error, and such Lender shall treat each Person whose name is recorded in the Participant Register as the owner of such participation for all purposes of this Agreement notwithstanding any notice to the contrary.

(e) Limitations upon Participant Rights. A Participant shall not be entitled to receive any greater payment under Section 4.09 that the applicable Lender would have been entitled to receive with respect to the participation sold to such Participant, unless the sale of the participation to such Participant is made with the Borrower's prior written consent. A Participant that would be a Foreign Lender if it were a Lender shall not be entitled to the benefits of Section 4.09 unless the Borrower is

notified of the participation sold to such Participant and such Participant agrees, for the benefit of the Borrower, to comply with Section 4.09 and Section 4.10 as though it were a Lender.

(f) Certain Pledges. Any Lender or the Administrative Agent may at any time pledge or assign a security interest in all or any portion of its rights under the Loan Documents to secure obligations of such Lender or the Administrative Agent, including any pledge or assignment to secure obligations to a Federal Reserve Bank; provided that no such pledge or assignment shall release such Lender or the Administrative Agent from any of its obligations hereunder or substitute any such pledgee or assignee for such Lender or the Administrative Agent as a party hereto.

Section 12.06 Severability. In case any provision in this Agreement shall be invalid, illegal or unenforceable, the validity, legality, and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

Section 12.07 Benefits of Agreement. Nothing in this Agreement, express or implied, shall give to any Person, other than the parties hereto, the Administrative Agent and their successors hereunder, the Lender Parties, each Indemnitee and any other Person with an ownership interest in any part of the Collateral, any benefit or any legal or equitable right, remedy or claim under this Agreement.

pursuant to the requirements of the USA PATRIOT Act (Title III of Pub. L. 107-56 (signed into law October 26, 2001)) (the “PATRIOT Act”), it is required to obtain, verify and record information that identifies the Borrower, which information includes the name and address of the Borrower and other information that will allow such Lender or the Administrative Agent, as applicable, to identify the Borrower in accordance with the PATRIOT Act. The Borrower shall, promptly following a request by the Administrative Agent or any Lender, provide all documentation and other information that the Administrative Agent or such Lender reasonably requests in order to comply with its ongoing obligations under applicable “know your customer” and Anti-Money Laundering Laws, including the PATRIOT Act.

Section 12.13 Corporate Obligation. No recourse may be taken, directly or indirectly, with respect to the obligations of the Borrower or the Administrative Agent, in each of their capacities hereunder, under this Agreement or any certificate or other writing delivered in connection herewith, against (i) the Administrative Agent in its individual capacity, or (ii) any partner, member, owner, beneficiary, Administrative Agent, officer, director, employee or Administrative Agent of the Administrative Agent in its individual capacity, any holder of equity in the Borrower or the Administrative Agent or in any successor or assign of the Administrative Agent in its individual capacity, except as any such Person may have expressly agreed (it being understood that the Administrative Agent has no such obligations in its individual capacity), and except that any such partner, owner or equity holder shall be fully liable, to the extent provided by applicable Law, for any unpaid consideration for stock, unpaid capital contribution or failure to pay any installment or call owing to such entity.

Section 12.15 Administrative Agent’s Duties and Obligations Limited. The duties and obligations of the Administrative Agent, in its various capacities hereunder, shall be limited to those expressly provided for in their entirety in this Agreement (including any exhibits to this Agreement). Any references in this Agreement (and in the exhibits to this Agreement) to duties or obligations of the Administrative Agent in its various capacities hereunder, that purport to arise pursuant to the provisions of any of the Loan Documents shall only be duties and obligations of the Administrative Agent if the Administrative Agent is a signatory to any such Loan Documents.

Section 12.16 Entire Agreement. THIS AGREEMENT AND THE OTHER LOAN DOCUMENTS REPRESENT THE FINAL AGREEMENT AMONG THE PARTIES AND MAY NOT BE CONTRADICTED BY EVIDENCE OF PRIOR, CONTEMPORANEOUS, OR SUBSEQUENT ORAL AGREEMENTS OF THE PARTIES. THERE ARE NO UNWRITTEN ORAL AGREEMENTS AMONG THE PARTIES.

Section 12.17 Right of Setoff. Subject to Article III of the Collateral Agency Agreement, if an Event of Default shall have occurred and be continuing, each Lender and each of its Affiliates is hereby authorized at any time and from time to time, to the fullest extent permitted by applicable Law, to set off and apply any and all deposits (general or special, time or demand, provisional or final, in whatever currency) at any time held and other obligations (in whatever currency) at any time owing by such Lender or any such Affiliate to or for the credit or the account of the Borrower against any and all of the obligations of the Borrower now or hereafter existing under this Agreement or any other Loan Document to such Lender or its Affiliates, irrespective of whether or not such Lender or Affiliate shall have made any demand under this Agreement or any other Loan Document and although such obligations of the Borrower may be contingent or unmatured or are owed to a branch, office or Affiliate of such Lender different from the branch, office or Affiliate holding such deposit or obligated on such indebtedness. The rights of each Lender and its Affiliates under this Section 12.17 are in addition to other rights and remedies (including other rights of setoff) that such Lender or its Affiliates may have. Each Lender agrees to notify the Borrower and the Administrative Agent promptly after any such setoff and application; provided that the failure to give such notice shall not affect the validity of such setoff and application.

Section 12.18 Interest Rate Limitation. Notwithstanding anything to the contrary contained in any Loan Document, the interest paid or agreed to be paid under the Loan Documents shall not exceed the maximum rate of non-usurious interest permitted by applicable Law (the "Maximum Rate"). If the Administrative Agent or any Lender shall receive interest in an amount that exceeds the Maximum Rate, the excess interest shall be applied to the principal of the Loans or, if it exceeds such unpaid principal, refunded to the Borrower. In determining whether the interest contracted for, charged, or received by the Administrative Agent or a Lender exceeds the Maximum Rate, such Person may, to the extent permitted by applicable Law, (a) characterize any payment that is not principal as an expense, fee, or premium rather than interest, (b) exclude voluntary prepayments and the effects thereof, and (c) amortize, prorate, allocate, and spread in equal or unequal parts the total amount of interest throughout the contemplated term of the Obligations hereunder.

Section 12.19 Survival of Representations and Warranties. All representations and warranties made hereunder and in any document, certificate or statement delivered pursuant hereto or in connection herewith shall survive the making thereof and the termination of this Agreement.

Section 12.20 No Advisory or Fiduciary Responsibility. In connection with all aspects of each transaction contemplated hereby (including in connection with any amendment, waiver or other modification hereof or of any other Loan Document), the Borrower acknowledges and agrees, and acknowledges its Affiliates' understanding, that: (i) (A) the arranging and other services regarding this Agreement provided by the Joint Lead Arrangers, the Lender Parties and their Affiliates are arm's-length commercial transactions between the Borrower and their respective Affiliates, on the one hand, and the Joint Lead Arrangers, the Lender Parties and their Affiliates, on the other hand, (B) the Borrower

has consulted its own legal, accounting, regulatory and tax advisors to the extent it has deemed appropriate, and (C) the Borrower is capable of evaluating, and understand and accept, the terms, risks and conditions of the transactions contemplated hereby and by the other Loan Documents; (ii) (A) the Joint Lead Arrangers, the Lender Parties and their Affiliates are and have been acting solely as a principal and, except as expressly agreed in writing by the relevant parties, has not been, is not, and will not be acting as an advisor, Administrative Agent or fiduciary for the Borrower or any of its Affiliates, or any other Person and (B) neither the Joint Lead Arrangers, the Lender Parties nor their Affiliates have any obligation to the Borrower or any of its Affiliates with respect to the transactions contemplated hereby except those obligations expressly set forth herein and in the other Loan Documents; and (iii) the Joint Lead Arrangers, the Lender Parties and their respective Affiliates may be engaged in a broad range of transactions that involve interests that differ from those of the Borrower and their respective Affiliates, and neither the Joint Lead Arrangers, the Lender Parties nor their Affiliates have any obligation to disclose any of such interests to the Borrower or any of its Affiliates. To the fullest extent permitted by Law, the Borrower hereby waives and releases any claims that it may have against the Joint Lead Arrangers, the Lender Parties and their Affiliates with respect to any breach or alleged breach of agency or fiduciary duty in connection with any aspect of any transaction contemplated hereby.

Section 12.21 Electronic Execution of Assignments and Certain Other Documents. Litigation; Adverse Facts

1. In July 2012, the Department of Treasury and the Department of Justice (together, the “Government”) opened a civil investigation into the participation by residential solar developers in the Section 1603 grant program. The Government served subpoenas on several developers, including Sunrun, along with their investors and valuation firms. At Sunrun’s request, the Government later reduced substantially the scope of its subpoena and permitted Sunrun to produce a limited set of documents. Sunrun has completed its production of these documents. The Government asked few follow-up questions about Sunrun’s production and confirmed that it has made no decisions regarding Sunrun’s participation in the Section 1603 grant program. Sunrun presented its view of solar system valuation to the Government over the course of two meetings, on December 10, 2013 and March 7, 2014. At the conclusion of the March 7, 2014 meeting, and at a follow-up meeting the following week, the Government conceded that it does not currently have a theory of liability or damages. On June 23, 2014 the Government contacted Sunrun with additional requests for documents and information. Sunrun has completed its production of these documents. Sunrun is cooperating fully with the Government’s investigation by engaging in collaborative discussions regarding the appropriate methodology for valuing solar projects in Section 1603 grant applications. Sunrun notes that it was both transparent and collaborative with the Department of Treasury regarding its valuation methodology at the time it submitted its 1603 grant applications, and firmly believes the valuations it submitted to the Department of Treasury were correct.
