UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 8-K

CURRENT REPORT Pursuant to Section 13 or 15(d) of The Securities Exchange Act of 1934

Date of Report (Date of earliest event reported) April 28, 2022

Sunrun Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation)

001-37511 (Commission File Number) 26-2841711 (IRS Employer Identification No.)

225 Bush Street, Suite 1400 San Francisco, California 94104 (Address of principal executive offices, including zip code)

(415) 580-6900

(Registrant's telephone number, including area code)

Not applicable

(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

□ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.0001 par value per share	RUN	Nasdaq Global Select Market

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02 Results of Operations and Financial Condition.

On May 4, 2022, Sunrun Inc. (the "Company") issued a press release announcing its financial results for the quarter ended March 31, 2022. In the press release, the Company also announced that it would be holding a conference call on May 4, 2022 to discuss its financial results for the quarter ended March 31, 2022. The full text of the press release is furnished herewith as Exhibit 99.1 and is incorporated herein by reference.

The information set forth in this Item 2.02, including Exhibit 99.1, shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

Item 5.02. Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

Departure of Chief Financial Officer

On April 28, 2022, Tom vonReichbauer, Chief Financial Officer of Sunrun Inc. (the "Company"), notified the Company of his intention to resign from the Company effective May 30, 2022. In connection with his resignation, Mr. vonReichbauer and the Company entered into a consulting agreement (the "Consulting Agreement") on May 4, 2022 pursuant to which Mr. vonReichbauer will provide certain consulting services to the Company through September 30, 2022. In consideration for Mr. vonReichbauer's equity awards outstanding as of May 4, 2022 shall continue to vest during the term of the Consulting Agreement.

Mr. vonReichbauer's departure from the Company is not as a result of any disagreement with the Company regarding the operations, policies or practices of the Company. A copy of the Consulting Agreement will be filed as an exhibit to the Company's quarterly report on Form 10-Q for the quarter ending June 30, 2022, and the foregoing descriptions are subject in all respects to the actual terms of the Consulting Agreement.

Appointment of Mr. Danny Abajian as Chief Financial Officer

On April 28, 2022, the Company's Board of Directors appointed Danny Abajian as the Company's Chief Financial Officer and Principal Financial Officer effective as of May 30, 2022.

Mr. Abajian, age 38, has served as the Company's Senior Vice President, Group Head, Project Finance since April 2020, the Company's Vice President, Project Finance from February 2016 to April 2020, the Company's Senior Director, Project Finance from August 2013 to February 2016, and joined the Company as Director, Project Finance in July 2010. From May 2008 to July 2010, Mr. Abajian served as Associate, Energy Structured Finance, at Barclays Capital. From July 2005 to July 2008, Mr. Abajian served in various roles including Analyst and Associate, Project Finance, at BNP Paribas. Mr. Abajian holds a Bachelor of Science degree from The New York University Leonard N. Stern School of Business.

Pursuant to Mr. Abajian's Employment Agreement, Mr. Abajian will receive an annual base salary of \$435,000.00 and will be eligible for a target bonus that is 75% of his base salary. Mr. Abajian will also be granted (i) an equity award of time-based vesting restricted stock units in respect of shares of common stock of the Company ("Common Stock") with a target value of \$1,500,000.00 (the "RSU Award"), (ii) an award of performance-based vesting restricted stock units in respect of shares of Common Stock with a target value of \$1,500,000.00 (the "PSU Award") and (iii) an option to purchase shares of Common Stock with a target value of \$1,500,000.00 (the "PSU Award") and (iii) an option to purchase shares of Common Stock with a target value of \$1,500,000.00 (the "PSU Award") and (iii) an option to purchase shares of Common Stock with a target value of \$1,500,000.00 (the "PSU Award") and (iii) an option to purchase shares of Common Stock with a target value of \$1,500,000.00 (the "Option Award"). Twenty-five percent of the shares of common stock covered by the RSU Award shall vest on the oneyear anniversary of June 6, 2022 ("Vesting Commencement Date") and the remaining shares of common stock covered by each such award shall vest in equal quarterly installments thereafter through the fourth anniversary of the Vesting Commencement Date, subject to Mr. Abajian remaining an employee of the Company. The PSU award will be a multi-year award tied to Company performance targets. Twenty-five percent of the shares subject to the Option Award shall vest in equal monthly installments thereafter until all shares are vested on the fourth anniversary of Vesting Commencement Date, subject to Mr. Abajian remaining an employee of the Company. Mr. Abajian shall be eligible to participate in the Company's Key Employee Change in Control Severance Plan.

Mr. Abajian's employment is at-will. There are no arrangements or understandings between Mr. Abajian and any other persons pursuant to which Mr. Abajian was appointed as Chief Financial Officer of the Company, effective May 30, 2022. There are also no family relationships between Mr. Abajian and any director or executive officer of the Company and she has no direct or indirect interest in any transaction or proposed transaction required to be disclosed pursuant to Item 404(a) of Regulation S-K.

The foregoing is a summary only and does not purport to be a complete description of all of the terms, provisions and agreements contained in Mr. Abajian's Employment Agreement, and is subject to and qualified in its entirety by reference to the complete text of Mr. Abajian's Employment Agreement, a copy of which is filed as exhibit 10.1 hereto.

Item 9.01 Financial Statements and Exhibits.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

SUNRUN INC.

By: /s/ Jeanna Steele

Jeanna Steele Chief Legal Officer and Chief People Officer

Date: May 4, 2022

EMPLOYMENT AGREEMENT

This **EMPLOYMENT AGREEMENT** (the "Agreement") is entered into as of April 28, 2022 (the "Effective Date") by and between Sunrun Inc. (the "Company"), and Danny Abajian ("Executive") (collectively the "Parties").

NOW, THEREFORE, in consideration of the promises and mutual covenants contained herein, the parties agree as follows:

1. <u>Employment Period</u>. Executive's employment with the Company pursuant to this Agreement shall continue to be "at will," and either the Company or Executive may terminate the employment relationship at any time. The period during which Executive is in fact employed by the Company pursuant to this Agreement shall constitute the "Employment Period" hereunder.

2. <u>Duties and Responsibilities</u>.

A. Commencing as of May 30, 2022 (the "Promotion Date"), Executive shall serve as the Company's Chief Financial Officer ("CFO"), with a principal office in the Company's location in San Francisco, California, and shall report to the Company's Chief Executive Officer ("CEO"). Executive agrees to perform in good faith and to the best of his ability all services that may be required of Executive hereunder and to be available to render such services at all reasonable times and places in accordance with such directions and requests as may be made from time to time by the Company.

B. Executive is expected and agrees to devote his full working time and attention to the business of the Company and will not render services to any other business without the prior approval of the Company (except as provided herein) or, directly or indirectly, engage or participate in any business that is competitive in any manner with the business of the Company. Notwithstanding, Executive may invest in up to one percent (1%) of the outstanding securities of any publicly held corporation without approval of the Company, subject to the Company's Insider Trading Policy and Related Party Transactions Policy.

C. Executive also understands and agrees that he must fully comply with the Company's standard operating policies, procedures, and practices that are in effect during the term of his employment.

3. <u>Compensation</u>.

A. **Base Pay.** Effective as of the Promotion Date and during the Employment Period thereafter, the Company shall pay Executive a base salary of \$18,125.00 per semi-monthly pay period (equivalent to \$435,000.00 annually), less applicable deductions and withholding (the "Base Salary").

B. **Target Bonus**. For the year 2022 and beyond, Executive will be eligible to participate in the Company's Amended and Restated Executive Incentive Compensation Plan ("EICP"), with an initial target of 75% of the Base Salary (the "Target Bonus"). Incentive payments pursuant to the EICP are discretionary and depend on both Company performance and Executive's individual performance. All EICP incentives are subject to the terms and conditions of the EICP plan, which will be provided to Executive separately. Incentive targets are prorated for any partial year in which Executive first becomes eligible to participate. Payment of any earned incentive shall be made as soon as practicable after being approved by the Compensation Committee ("Committee") of the Company's Board of Directors ("Board"). Unless otherwise determined by the Committee, to earn any portion of the Target Bonus for a given year, Executive must be employed by the Company on the date the associated Target Bonus is paid. In addition, amounts received pursuant to the EICP will be subject to the terms of the Company's

Policy for Recoupment of Incentive Compensation (the "Clawback Policy"), which will be provided to Executive separately.

4. <u>Equity Awards</u>.

A. Long-Term Incentive Equity Awards. On or around the Effective Date, the Company will recommend to the Board that Executive be granted time-based equity awards with an aggregate value of \$3,000,000 in the form of 50% in stock options ("Options") and 50% in RSUs. The number of Options granted will be determined using Black-Scholes valuation methods. The number of RSUs granted will be calculated by dividing the approved dollar amount by the average closing price of Sunrun common stock during the thirty (30) trading days prior to the date of grant, unless stated otherwise in the approval document.

(1) *RSU Vesting*. All RSUs referenced herein will vest over four (4) years, commencing on June 6, 2022 (the "Vesting Commencement Date"), with twenty-five percent (25%) of the RSUs vesting on the one-year anniversary of the Vesting Commencement Date, and the remaining RSUs vesting in equal quarterly installments (every three (3) months) thereafter on the same day of the month as the Vesting Commencement Date, contingent upon Executive's continuous employment at the Company through each such date. The RSUs will be subject to the terms and conditions of the Sunrun 2015 Equity Incentive Plan (the "Plan"), as described in the Plan and the applicable Plan equity award agreement. The Parties further acknowledge that Executive's RSU grants with the Company that are in effect as of the Effective Date shall continue to vest in the normal course, subject to the terms of the applicable stock plan(s) and award agreement(s).

(2) Option Vesting. The shares subject to the Option will vest over four (4) years, commencing on the Vesting Commencement Date, with twenty-five percent (25%) of such shares vesting on the one-year anniversary of the Vesting Commencement Date, and the remaining shares vesting in equal monthly installments thereafter contingent upon Executive's continuous employment at the Company through each such date. The shares subject to the Option will be subject to the terms and conditions of the Plan and the applicable equity award agreement. The Parties further acknowledge that Executive's Option grants with the Company that are in effect as of the Effective Date shall continue to vest in the normal course, subject to the terms of the applicable stock plans and agreements.

B. *Performance-Based Equity*. On or around the Effective Date, the Company will recommend to the Board that Executive be granted performance-based restricted stock unit ("PSU") awards with a target value of \$1,500,000. The PSU awards will be multi-year awards conditioned on the achievement of certain Company performance targets. The PSU awards will be subject to the terms and conditions of the Plan and the applicable equity award agreements, as well as the terms of the Company's Clawback Policy.

C. Compliance and Ethics Vesting Condition. Doing business ethically is a core Sunrun value. In furtherance of the Company's culture of compliance, Executive acknowledges and agrees that the vesting of his equity awards is also conditioned upon his full compliance with the terms of the Company's Code of Business Conduct and other Company compliance policies and his agreements with the Company (including, but not limited to, his confidentiality obligations and any applicable restrictive covenants) at the time of any applicable vesting event. As soon as practicable upon making any material modifications to its Code of Business Conduct or any other Company compliance policies, the Company shall provide notification of such changes to Executive. Failure to satisfy this condition will result in ineligibility for such vesting.

5. <u>Severance Benefits</u>. Subject to approval of the Board, Executive will be permitted to participate in the Company's Key Employee Change in Control Severance Plan (the "Severance Plan") applicable to Executive based on Executive's position with the Company. In order to participate in the Severance Plan, Executive shall be required to sign a participation

agreement that will set forth the severance payments and benefits to which Executive may be entitled in connection with certain terminations of employment, which would be in lieu of any other severance or other benefits Executive might otherwise be entitled to under any plan, program, previous agreement, or policy that the Company may have in effect from time to time.

6. <u>General Benefits</u>.

A. <u>Health and Welfare Benefits</u>. During the Employment Period, Executive shall be eligible to participate in all employee benefits and benefit plans generally made available to the Company's full-time executive employees, including, but not limited to, medical, dental, vision and long-term disability insurance benefits and arrangements, subject to the terms, conditions and relevant qualification criteria for such benefits and benefit plans. The Company, in its discretion, may change from time to time the employee benefits and benefit plans it generally makes available to its employees.

B. Vacation, Sick, and Holiday Pay. Executive shall be entitled to vacation, sick, and holiday pay pursuant to the terms of the Company's applicable employee policies, as may exist from time to time. This includes that Executive may participate in the Sunrun Freedom Policy, which currently provides full-time exempt employees an opportunity to take paid days out of the office, limited by such employee's managerial approval (in this case, the CEO), and subject to such individual's judgment that they will timely complete all job assignments and achieve all performance goals. Details on the Company's Freedom Policy can be found in the Employee Guidebook. The Company may modify benefits, including but not limited to the Sunrun Freedom Policy, from time to time as it deems necessary.

C. **Expense Reimbursement.** Executive shall be entitled to reimbursement for all reasonable and necessary expenses incurred by Executive associated with the conduct of the Company's business in accordance with the Company's policies. Such reimbursements shall be subject to the Company's then-existing policies and procedures for reimbursement of business expenses, but in any event shall include submission of written requests for reimbursement within thirty (30) days of incurring the expense, accompanied by vouchers, receipts or other details of such expenses in the form required by the Company, sufficient to substantiate a deduction for such business expenses under all applicable rules and regulations of federal and state taxing authorities. If such expense qualifies for reimbursement, then the Company will reimburse Executive for that expense in accordance with existing expense reimbursement policies and practices.

7. <u>Confidential Information and Inventions Agreement</u>. As a condition of Executive's continued employment and the benefits provided by this Agreement, Executive affirms that, prior to the Effective Date, he will sign the Executive/Senior Vice President Confidentiality, Inventions Assignment, and Restrictive Covenants Agreement and the Mutual Arbitration Agreement. Executive shall at all times remain subject to the terms and conditions of the Executive/Senior Vice President Confidentiality, Inventions Assignment, and Restrictive Covenants Agreement, and nothing in this Agreement shall supersede, modify or affect Executive's obligations, duties and responsibilities thereunder (including, but not limited to, his obligations regarding non-disclosure of Confidential Information; assignment of Inventions and other Intellectual Property Rights; Non-Solicitation; restriction on unfair competition; and agreement to arbitrate any disputes that might arise with the Company, or in relation to his employment relationship with the Company which shall equally extend to any disputes regarding the terms of this Agreement).

8. <u>Compliance with Section 409A</u>. It is the intent of the Company and Executive that the provisions of this Agreement (and all agreements and plans referenced herein) comply with all applicable requirements of Section 409A of the Internal Revenue Code of 1986, as amended ("Section 409A"), or an exemption thereto, and payments may only be made under this Agreement (and all agreements and plans referenced herein) upon an event and in a manner permitted by Section 409A, to the extent applicable, including the six (6)-month delay for

payments to "specified employees," if applicable. Accordingly, to the extent any provisions of this Agreement (or of any agreement or plan referenced herein) would otherwise contravene one or more requirements or limitations of Section 409A, then the Company and Executive shall, within the remedial amendment period provided under the Treasury Regulations issued under Section 409A, if available, effect through mutual agreement the appropriate amendments to those provisions which are necessary in order to bring the provisions of this Agreement into compliance with Section 409A. All payments to be made upon a termination of employment may only be made upon a "separation from service" under Section 409A, to the extent required by Section 409A. For purposes of Section 409A, each payment hereunder (or under any agreement or plan referenced herein) shall be treated as a separate payment, and the right to a series of installment payments shall be treated as a right to a series of separate payments. In no event may Executive, directly or indirectly, designate the taxable year of a payment. Notwithstanding anything in this Agreement (or of any agreement or plan referenced herein) to the contrary, Executive shall be solely responsible for the tax consequences of any payments under this Agreement or plan does not meet the applicable requirements of Section 409A, Although the Company intends to administer this Agreement (and any agreement or plan referenced herein) to prevent taxation under Section 409A, the Company does not represent or warrant that this Agreement (or any agreement or plan referenced herein) to prevent taxation under Section 409A, the Company does not represent or warrant that this Agreement (or any agreement or plan referenced herein) complies with any provision of federal, state, local or other tax law.

9. <u>Successors and Assigns</u>. This Agreement and all rights hereunder are personal to Executive and may not be transferred or assigned by Executive at any time. The Company may assign its rights, together with its obligations hereunder, to any parent, subsidiary, affiliate or successor, or in connection with any sale, transfer or other disposition of all or substantially all of its business and assets, provided, however, that any such assignee assumes the Company's obligations hereunder.

10. <u>Notices</u>.

A. Any and all notices, demands or other communications required or desired to be given hereunder by any party shall be in writing and shall be validly given or made to another party if delivered either personally or if deposited in the United States mail, certified or registered, postage prepaid, return receipt requested. Notice may also be provided in the form of email sent to the appropriate individual (e.g., to Executive and/or to the Company's Chief Legal Officer), but only to the extent that such individual confirms receipt of such email. If such notice, demand or other communication shall be delivered personally, then such notice shall be conclusively deemed given at the time of such personal delivery.

B. If such notice, demand or other communication is given by mail, such notice shall be conclusively deemed given fortyeight (48) hours after deposit in the United States mail addressed to the party to whom such notice, demand or other communication is to be given as hereinafter set forth:

To the Company:

Sunrun Inc. 225 Bush St., Suite 1400 San Francisco, CA 94104 Attn: Chief Legal Officer

To Executive:

To such personal address as the Company may have on file for Executive at the time of notice.

C. Any party hereto may change its address for the purpose of receiving notices, demands and other communications as herein provided by a written notice given in the manner aforesaid to the other party hereto.

11. <u>General Creditor Status</u>. The benefits to which Executive may become entitled under this Agreement shall be paid, when due, from the Company's general assets, and no trust fund, escrow arrangement or other segregated account shall be established as a funding vehicle for such payments. Accordingly, Executive's right (or the right of the executors or administrators of Executive's estate) to receive such benefits shall at all times be that of a general creditor of the Company and shall have no priority over the claims of other general creditors.

12. <u>Governing Documents</u>. This Agreement, together with (i) any equity or long-term equity incentive agreements duly executed by Executive and the Company, (ii) the Severance Plan, (iii) the Indemnification Agreement, (iv) the Executive/Senior Vice President Confidentiality, Inventions Assignment, and Restrictive Covenants Agreement, (v) the Mutual Arbitration Agreement, (vi) the Clawback Policy; and (vi) all other plans, policies, or agreements referenced herein, shall constitute the entire agreement and understanding of the Parties with respect to the terms and conditions of Executive's employment with the Company and the eligibility for any potential severance payments, and this Agreement shall supersede all prior and contemporaneous written or verbal agreements and understandings between the Parties relating to such subject matter. This Agreement, including but not limited to the at-will nature of the employment relationship as reflected herein, may be amended only by a written instrument signed by Executive and the Company's Chief Legal Officer.

13. Governing Law. The provisions of this Agreement shall be construed and interpreted under the laws of the State of California applicable to agreements executed and wholly performed within the State of California. If any provision of this Agreement as applied to any party or to any circumstance should be adjudged by a court of competent jurisdiction to be void or unenforceable for any reason, the invalidity of that provision shall in no way affect (to the maximum extent permissible by law) the application of such provision under circumstances different from those adjudicated by the court, the application of any other provision of this Agreement, or the enforceability or invalidity of this Agreement as a whole. Should any provision of this Agreement become or be deemed invalid, illegal or unenforceable in any jurisdiction by reason of the scope, extent or duration of its coverage, then such provision shall be deemed amended to the extent necessary to conform to applicable law so as to be valid and enforceable or, if such provision cannot be so amended without materially altering the intention of the parties, then such provision will be stricken, and the remainder of this Agreement shall continue in full force and effect.

14. <u>Counterparts</u>. This Agreement may be executed in more than one counterpart, each of which shall be deemed an original, but all of which together shall constitute but one and the same instrument.

15. <u>Construction</u>. The language of this Agreement shall be construed as to its fair meaning, and not strictly for or against either party. Any rule of construction that any ambiguities in a contract shall be construed against the drafter of a contract shall not apply.

[Signature Page Follows]

IN WITNESS WHEREOF, the parties have executed this Employment Agreement as of the day and year written above.

Sunrun Reports First Quarter 2022 Financial Results

27% growth in Solar Energy Capacity Installed in Q1, exceeding guidance

Strong customer order trends, increasing 39% year-over-year

Customer Additions of 29,463 in Q1, bringing total Customers to 689,774, 20% year-over-year growth in Customers

Increasing full-year guidance to over 25% growth in Solar Energy Capacity Installed

Annual Recurring Revenue of \$883 Million with Average Contract Life Remaining of 17.4 years

Net Earning Assets of \$4.5 billion, including \$863 million in Total Cash

Networked Solar Energy Capacity of 4.9 Gigawatts

SAN FRANCISCO, May 4, 2022 -- Sunrun (Nasdaq: RUN), the nation's leading provider of residential solar, storage and energy services, today announced financial results for the quarter ended March 31, 2022.

"Sunrun is in an enviable, market-leading position to become the chosen provider of clean energy across America," said Mary Powell, Sunrun's Chief Executive Officer. "We are seeing tremendous growth across our business, with customer orders increasing 39% compared to the prior year as more families demand clean, affordable and reliable energy."

"Over the last month we successfully implemented meaningful pricing changes to offset higher material and capital costs, and continue to see very strong demand as utility rate inflation exceeds 11% across the country," said Tom vonReichbauer, Sunrun's Chief Financial Officer. "Despite continuing to grow our backlog of customers, and the effects of Omicron early in the quarter, we generated sequentially higher Net Subscriber Values and expect margins to increase meaningfully throughout the year."

Growth & Market Leadership

The growth opportunity for the solar industry is massive. Today, only 4% of the 77 million addressable homes in the U.S. have solar. The U.S. residential electricity market is over \$194 billion per year and ongoing utility spending has resulted in escalating retail rates, increasing our value proposition and expanding our addressable market. Households that adopt electric vehicles consume approximately double the amount of electricity, increasing our market opportunity and value proposition even further. In addition to delivering a superior electricity service, we are increasingly working to network our dispatchable solar and battery systems to provide resources to the grid, such as virtual power plants, to also serve the \$125 billion annual market for utility capex. These virtual power plants offer greater potential for resiliency and precision than bulky centralized infrastructure.

Owing to network effects and density advantages, increasing operating scale efficiencies, growing brand strength, capital raising capabilities, and advanced product and service offerings, we believe Sunrun will continue to expand our leadership position. Here are a few highlights from the last quarter:

- Sunrun has now installed over 37,000 solar and battery systems nationwide, which offer homeowners the ability to power through multi-day outages with clean and reliable home energy. Solar and battery systems also optimize when power is purchased or supplied to the grid, helping manage constraints on the grid during peak times. Sunrun's battery installations increased by more than 100% in 2021 compared to the prior year despite battery supply and logistical constraints which lowered our battery volumes relative to our initial outlook. Sunrun expects battery installations to increase by more than twice the growth rate of overall installations in 2022.
- Channel partners are selecting Sunrun and deriving significant value from our platform. In Q1, we continued partner onboarding in tandem with exclusivity
 agreements which resulted in a record install quarter for many of our key channel partners. We continue to expect 2022 to be another record year for our
 channel partner business.
- Sunrun's new homes business continues to gain momentum and scale. Sunrun added multiple top-20 new home builders under exclusive partnerships during the first quarter. Installations grew at a record pace, growing at over 50% year over year in Q1, delivering all-time record installations. Sunrun currently works with over 80 top home

sunrun

builders throughout multiple regions, providing us with a high level of confidence that our positive growth trend will continue throughout 2022.

- Sunrun is in a strong position to navigate a dynamic supply chain environment, most recently compounded by the uncertainty of the potential retroactive tariffs arising from the anti-dumping and countervailing duty (AD/CVD) anti-circumvention matter being evaluated by the Department of Commerce against solar imports from Malaysia, Thailand, Vietnam and Cambodia using Chinese inputs. Sunrun has increased its inventory position by \$49 million in Q1 to \$556 million (an increase of \$273 million since the start of 2021) to maintain high levels of component supply, particularly solar modules. Sunrun had over 100 days of supply on hand of modules as of the end of Q1 and continues to procure modules from a diversified base of manufacturers. While Sunrun believes that the Department of Commerce's investigation is misplaced and contrary to the Administration's objectives to encourage the transition to clean energy and reduce imports from China, the company is taking steps to further diversify its supply chain and arrange procurement from unaffected countries. To that end, Sunrun has entered into several supply agreements in the coming months.
- Sunrun announced in January that the company retired its \$250 million recourse lending facility and arranged a larger \$425 million facility at enhanced terms and longer tenor than the company's prior term extensions. During Q1, Sunrun upsized the facility to \$600 million on the same terms. The new recourse lending facility reflects improved terms, including a higher valuation for operating assets, in conjunction with an increased advance rate against Sunrun's project backlog. In addition, the new facility expands the borrowing base to support more efficient inventory financing, also at a higher advance rate, while maintaining the same borrowing costs.

Innovation & Differentiation

The world has the technologies to move to a decentralized energy architecture today. Home solar and batteries can operate economically at small scale and can therefore be located where energy is consumed, leveraging the built environment instead of relying on expensive, centralized infrastructure whose design specifications do not meet today's weather reality. Sunrun is effectuating this transition through continued business model innovation and a superior customer experience. We provide fixed-rate solar-as-a-service subscriptions, whole-home backup power capabilities, and participation in virtual power plants. We are investing in efforts to further electrify the home, including electric vehicle charging infrastructure and converting gas appliances to electric. We expect these efforts will increase Sunrun's share of the home energy wallet and enhance our value to customers. The following recent developments highlight our innovation and innovation and innovation and innovation and innovation and environment interesting infrastructure and converting gas appliances to electric.

- Sunrun's partnership with Ford to serve as the preferred installer of Ford Intelligent Backup Power continues to accelerate. Ford launched production of the F-150 Lightning last week, and Sunrun is now in the process of connecting with initial customers to facilitate the installation of the Charge Station Pro and the Home Integration System, along with providing options for solar and battery systems. Sunrun expects to install thousands of bidirectional chargers over the next few months for these initial Ford F-150 Lightning customers and will provide an update on the initial results and realized benefits of the partnership later this summer. Earlier this year, Ford announced that they have exceeded 200,000 reservations and also announced plans to nearly double production of the all-electric F-150 Lightning to 150,000 units annually by 2023 due to high customer demand. Sumrun stands ready to assist Ford in meeting its ambitious new goals and is currently ramping its efforts to train qualified installers for installation of specific charging hardware that will enable the truck to provide backup power to homes during grid outages. Customers will need to equip their home with the 80-amp Ford Charge Station Pro and Home Integration System to unlock bidirectional power flow and future energy management solutions. The Home Integration System—designed and developed together with Ford—can be purchased exclusively through Sumrun. Customers interested in combining Ford Charge Station Pro and/or Home Integration System installation with clean solar power may be eligible to do so for as little as zero dollars down and reduced installation pricing.
 To demonstrate what is possible. Sumrun Ford and PulteGroup, one of the nation's largers thomebuilders. Howe model homes nearly us to build two model homes nearly.
- To demonstrate what is possible, Sunrun, Ford and PulteGroup, one of the nation's largest homebuilders, have teamed up to build two model homes near Fort Myers, Florida to showcase what an electrified future can look like that embraces electric vehicles with bidirectional charging capabilities. The homes were also built specifically to harness the capabilities of the F-150 Lightning and its Ford Intelligent Backup Power feature to create energy management solutions and serve as a critical lifeline to homeowners during power outages and to provide valuable resources to the grid.

sunrun

- In the first quarter, Sunrun invested an incremental \$75 million in equity into a venture co-established with SK E&S (and other companies affiliated with SK E&S), bringing the company's total investment in the venture to \$150 million (inclusive of contributed advisory services valued at \$10 million). The venture is making significant progress and expects to unveil a disruptive suite of products and services by the end of 2022 with commercialization expected this year or early 2023. Sunrun currently owns approximately 37% of the venture and has preferential access to the technology being developed. Sunrun expects the innovative and differentiated products and services will accelerate Sunrun's business and expand the customer value proposition considerably. The venture was initially established in July 2020 to conduct research and development activities to accelerate the adoption of renewables, the electrification of homes, and the transition to a connected and distributed energy system.
- Streamlining permitting and interconnection processes present an opportunity to accelerate the adoption of solar and storage by reducing 'soft costs' and improving a homeowner's experience. Sunrun was a founding member of a coalition to develop an industry-wide web-based solar permitting tool called SolarAPP+, which seeks to reduce these costs and deliver a better customer experience. Jurisdictions now have the opportunity to adopt SolarAPP+ to streamline the permitting process, save local residents thousands in costs per solar installation, and promote the growth of solar jobs. As of today, 5,600 PV permits and 395 PV and Battery permits have been processed through SolarAPP+ across the residential solar industry, which has saved an estimated 56,000 working days of permitting time.
- Our business development and policy teams are actively educating more utilities and grid operators on the valuable services that networked distributed energy resources can provide. Sunrun has already forged 12 virtual power plant opportunities and has continued growing our pipeline. We have over \$75 million in expected revenue from grid service opportunities that have been awarded or are in late-stage discussions. These opportunities provide incremental recurring revenue and offer an enhanced customer value proposition while also further differentiating Sunrun's offering from companies that lack the scale, network density, and technical capabilities to serve this market. We estimate that over 10% of geographies we serve today have beachhead virtual power plant opportunities in place, which is expected to expand to over 50% of our geographies in the coming years. Increasingly, utilities and their regulators are seeing the value in fast-to-market solar and battery systems to solve peak energy needs and to replace the void from retiring fossil fuel power plants. For instance, earlier this year Hawaiian Electric asked the state regulator to approve a program to compensate households upfront and on an ongoing basis for adding a battery to their rooftop solar systems if the systems export energy to the grid during peak times.

ESG Efforts: Embracing Sustainability & Investing in Communities

Sunrun's mission is to create a planet run by the sun and build an affordable energy system that combats climate change and provides energy access for all. We proactively serve all stakeholders: our customers, our employees, the communities in which we operate, and our business and financial partners. Investing in our people and providing meaningful career opportunities is critical to our success. As the country embarks on upgrading infrastructure and rewiring our buildings, the demand for skilled workers will increase substantially. We are focused on developing a differentiated talent brand and providing opportunities to train workers to be part of the clean energy economy. The following recent developments highlight our commitment to sustainability, investing in people, and investing in our communities:

In April, Sunrun released its fifth annual Impact Report. As part of its commitment to annual reporting, the 2021 Impact Report highlights Sunrun's progress towards its 2020 ESG goals to mitigate the impacts of anthropogenic climate change; building a diverse, fair and equitable workforce; and improving environmental equity and justice. Sunrun also announced three ambitious ESG updates: Decreasing transportation emissions by transitioning half of the company's vehicle fleet to either electric or hybrid by the end of 2025; achieving 100% equipment recycling at each operating facility by the end of 2023; and fostering a diverse workforce that represents the customers and communities in which the company's employees live and work by (i) increasing the representation of employees who identify as women in Director and above roles by 50% and the representation of Black, Indigenous, and People of Color (BIPOC) leaders in manager roles by 25% by the end of 2030. Sunrun also recently signed on to the United Nations Global Compact and committed to adopting science-

based emissions reduction targets with the Science Based Targets Initiative. This year's impact report includes reporting under the Task Force on Climate Financial Disclosures (TCFD) based on investor feedback.

- Lawrence Berkeley National Laboratory released the latest edition of its annual report, Residential Solar-Adopter Income and Demographic Trends, in March which describes income, demographic, and other socio-economic trends among U.S. residential rooftop solar adopters. The report is based on data for roughly 2.3 million residential rooftop solar systems installed through 2020, representing 82% of all U.S. systems. The report shows that rooftop solar is becoming increasingly equitable and that the residential solar market is deepening by reaching more middle and lower-income households. According to the report, median incomes of solar adopters have fallen from \$138,000 in 2010 to \$115,000 in 2020 as adoption becomes more proportionately distributed across the population while approximately one-third of household incomes of 2020 solar adopters were in the \$50,000 to \$100,000 range. The report also provided data showing that underrepresented communities are becoming a larger proportion of solar adopters with 42% identifying as Asian, Black or Hispanic.
- We remain committed to creating long term tenure value for our employees and building a differentiated talent brand. During Q1, we accelerated our
 efforts by partnering with a leading web-based provider of career development tools that focuses on helping women elevate in the workplace by providing
 intel via anonymous job reviews, sharing industry news and advice, posting jobs at companies that women love and providing a sounding board for
 women to share in conversation and support. Additionally, we expanded the educational resources available to our employees at no cost by partnering
 with a global non-profit to offer community led learning. We remain focused on building our electrician talent pipeline and overall 37% of eligible
 employees have initiated their upskilling learning pathways with our educational provider.
- The solar systems we deployed in Q1 are expected to prevent the emission of 4.6 million metric tons of CO2 over the next thirty years. Over the last
 twelve months, Sunrun's systems are estimated to have offset more than 2.7 million metric tons of CO2.

Key Operating Metrics

In the first quarter of 2022, Customer Additions were 29,463, including 21,197 Subscriber Additions. As of March 31, 2022, Sunrun had 689,774 Customers, including 588,941 Subscribers. Customers grew 20% in the first quarter of 2022 compared to the first quarter of 2021.

Annual Recurring Revenue from Subscribers was \$883 million as of March 31, 2022. The Average Contract Life Remaining of Subscribers was 17.4 years as of March 31, 2022.

Subscriber Value was \$37,004 in the first quarter of 2022 while Creation Cost was \$29,863. Net Subscriber Value was \$7,141 in the first quarter of 2022. Total Value Generated was \$151.4 million in the first quarter of 2022.

Gross Earning Assets as of March 31, 2022 were \$10.2 billion. Net Earning Assets were \$4.5 billion, which includes \$863 million in total cash, as of March 31, 2022.

Solar Energy Capacity Installed was 213 Megawatts in the first quarter of 2022. Solar Energy Capacity Installed for Subscribers was 154 Megawatts in the first quarter of 2022.

Networked Solar Energy Capacity was 4,890 Megawatts as of March 31, 2022. Networked Solar Energy Capacity for Subscribers was 4,204 Megawatts as of March 31, 2022.

Outlook

Management now expects Solar Energy Capacity Installed growth to be 25% or greater for the full-year 2022, an increase from the prior guidance of 20% or greater.

Total Value Generated is expected to grow meaningfully faster than Solar Energy Capacity Installed for the full-year 2022, with Net Subscriber Values of above \$10,000 in Q3.

For the second quarter, management expects Solar Energy Capacity Installed to be in a range between 235 and 245 megawatts.

First Quarter 2022 GAAP Results

Total revenue was \$495.8 million in the first quarter of 2022, up \$161.0 million, or 48%, from the first quarter of 2021. Customer agreements and incentives revenue was \$209.7 million, an increase of \$35.1 million, or 20%, compared to the first quarter of 2021. Solar energy systems and product sales revenue was \$286.1 million, an increase of \$125.9 million, or 79%, compared to the first quarter of 2021.

Total cost of revenue was \$451.6 million, an increase of 53% year-over-year. Total operating expenses were \$677.2 million, an increase of 32% year-over-year.

Included in operating costs for the first quarter of 2022 were \$7.3 million of non-recurring restructuring expenses related to the acquisition of Vivint Solar. Operating costs include stock-based compensation expenses of \$39.2 million in the first quarter of 2022.

Consistent with purchase accounting standards under GAAP, the fair value of outstanding equity awards for Vivint Solar employees was reevaluated upon the closing of the acquisition, which resulted in a step-up of the value of such awards, which will result in an increase to non-cash stock-based compensation expense until such awards have fully vested. Additionally, the value of Solar Energy Systems was recorded based on a fair value assessment, which was approximately \$1.1 billion higher than the book value at the date of the acquisition, and will result in additional non-cash depreciation expense over the estimated useful life of the assets, partially offset by a write-off of Vivint Solar's Cost to Obtain Customer Agreements.

Net loss attributable to common stockholders was \$87.8 million, or \$0.42 per share, in the first quarter of 2022.

Financing Activities

As of May 4, 2022, closed transactions and executed term sheets provide us expected tax equity and project debt capacity to fund over 400 megawatts of Solar Energy Capacity Installed for Subscribers beyond what was deployed through the end of the first quarter of 2022.

Appointment of New Chief Financial Officer

Today, Sunrun also announced that Tom vonReichbauer will be stepping down from his current position as Chief Financial Officer at the end of May to pursue an external opportunity. Following a search, and consistent with Sunrun's succession planning activities, Sunrun's Board of Directors has appointed Mr. Danny Abajian to act as the new Chief Financial Officer, effective May 30. Mr. Abajian, who is currently the Senior Vice President at Sunrun overseeing the Project Finance group, has been with the company for nearly 12 years and has helped facilitate the raising of more than \$10 billion in capital to support our rapid customer growth. Prior to joining Sunrun in 2010, Mr. Abajian worked at Barclays Capital and BNP Paribas, executing structured debt and commodities transactions for infrastructure, power generation and energy assets across North America. Mr. Abajian holds a Bachelor of Science degree in Finance and International Business from the New York University Stern School of Business. Mr. vonReichbauer has agreed to remain a consultant for four months to ensure a smooth transition of responsibilities. **Conference Call Information**

Sunrun is hosting a conference call for analysts and investors to discuss its first quarter 2022 results and business outlook at 1:30 p.m. Pacific Time today, May 4, 2022. A live audio webcast of the conference call along with supplemental financial information will be accessible via the "Investor Relations" section of Sunrun's website at https://investors.sunrun.com. The conference call can also be accessed live over the phone by dialing (877) 407-5989 (toll free) or (201) 689-8434 (toll). An audio replay will be available following the call on the Sunrun Investor Relations website for approximately one month.

About Sunrun

Sunrun Inc. (Nasdaq: RUN) is the nation's leading home solar, battery storage, and energy services company. Founded in 2007, Sunrun pioneered home solar service plans to make local clean energy more accessible to everyone for little to no upfront cost. Sunrun's innovative home battery solution brings families affordable, resilient, and reliable energy. The company can also manage and share stored solar energy from the batteries to provide benefits to households, utilities,

and the electric grid while reducing our reliance on polluting energy sources. For more information, please visit www.sunrun.com.

Forward Looking Statements

This communication contains forward-looking statements related to Sunrun (the "Company") within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, statements related to: the Company's leadership team and talent development; the Company's financial and operating guidance and expectations; the Company's business plan, trajectory and expectations in 2022 and beyond, market leadership, competitive advantages, operational and financial results and metrics (and the assumptions related to the calculation of such metrics); the Company's momentum in the company's business strategies, expectations regarding market share, total addressable market, customer value proposition, market penetration, financing activities, financing capacity, product mix, and ability to manage cash flow and liquidity; the growth of the solar industry; the Company's ability to manage suppliers, inventory, and workforce; supply chains and regulatory impacts affecting supply chains; factors outside of the Company's control such as macroeconomic trends, public health emergencies, natural disasters, act of war, terrorism, or armed conflict / invasion, and the impacts of climate change; the legislative and regulatory environment of the solar industry and the potential impacts of proposed, amended, and newly adopted legislation and regulation on the solar industry and our business; the ongoing, anticipated, or potential impacts of the COVID-19 pandemic and its variants; expectations regarding the Company's storage and energy services businesses, the Company's acquisition of Vivint Solar (including cost synergies), anticipated emissions reductions due to utilization of the Company's solar systems; the Company's ability to derive value from the anticipated benefits of partnerships, new technologies, and pilot programs; expectations regarding the growth of home electrification, electric vehicles, virtual power plants, and distributed energy resources. These statements are not guarantees of future performance; they reflect the Company's current views with respect to future events and are based on assumptions and estimates and are subject to known and unknown risks. uncertainties and other factors that may cause actual results, performance or achievements to be materially different from expectations or results projected or implied by forward-looking statements. The risks and uncertainties that could cause the Company's results to differ materially from those expressed or implied by such forward-looking statements include: the Company's continued ability to manage costs and compete effectively; the availability of additional financing on acceptable terms; worldwide economic conditions, including slow or negative growth rates; volatile or rising interest rates; changes in policies and regulations, including net metering and interconnection limits or caps and licensing restrictions; the Company's ability to attract and retain the Company's solar partners; supply chain risks and associated costs; the impact of COVID-19 and its variants on the Company's operations; the successful integration of Vivint Solar; realizing the anticipated benefits of past or future investments, strategic transactions, or acquisitions, and integrating those acquisitions; the Company's leadership team and ability to retract and retain key employees; changes in the retail prices of traditional utility generated electricity; the availability of rebates, tax credits and other incentives; the availability of solar panels, batteries, and other components and raw materials; the Company's business plan and the Company's ability to effectively manage the Company's growth and labor constraints; the Company's ability to meet the covenants in the Company's investment funds and debt facilities; factors impacting the solar industry generally, and such other risks and uncertainties identified in the reports that we file with the U.S. Securities and Exchange Commission from time to time. All forward-looking statements used herein are based on information available to us as of the date hereof, and we assume no obligation to update publicly these forward-looking statements for any reason, except as required by law.

Net cash provided by financing activities	770,694	647,923
Net change in cash and restricted cash	12,184	105,225
Cash and restricted cash, beginning of period	850.431	708,208
Cash and restricted cash, end of period	\$ 862,615 \$	813,433

Key Operating and Financial Metrics

The following operating metrics are used by management to evaluate the performance of the business. Management believes these metrics, when taken together with other information contained in our fillings with the SEC and within this press release, provide investors with helpful information to determine the economic performance of the business activities in a period that would otherwise not be observable from historic GAAP measures. Management believes that it is helpful to investors to evaluate the present value of cash flows expected from subscribers over the full expected relationship with such subscribers ("Subscriber Value", more fully defined in the definitions appendix below) in comparison to the costs associated with adding these customers, regardless of whether or not the costs are expensed or capitalized in the period ("Creation Cost", more fully defined in the definitions appendix below) in comparison to the costs associated with adding these customers, regardless of believes that Subscriber Value, Creation Costs, and Total Value Generated are useful metrics for investors because they present an unlevered view of all of the costs associated with new customers in a period compared to the expected future cash flows from these customers over a 30-year period, based on contracted pricing terms with its customers, which is not observable in any current or historic GAAP-derived metric. Management believes it is useful for investors to also evaluate the future expected cash flows from all customers that have been deployed through the respective measurement date, less estimated costs to maintain such systems and estimated distributions to tax equity partners in consolidated joint venture partnership flip structures, and distributions to project equity investors ("Gross Earning Assets", more fully defined in the definitions appendix below). The Company also believes ("Gross Earning Assets", more fully defined in the definitions appendix below). The Company also believes foress Earning Assets is useful for mana

Various assumptions are made when calculating these metrics. Both Subscriber Value and Gross Earning Assets utilize a 5% unlevered discount rate (weighted average cost of capital or "WACC") to discount future cash flows to the present period. Furthermore, these metrics assume that customers renew after the initial contract period at a rate equal to 90% of the rate in effect at the end of the initial contract term. For Customer Agreements with 25-year initial contract terms, a 5-year renewal period is assumed. For a 20-year initial contract term, a 10-year renewal period is assumed. In all instances, we assume a 30-year customer relationship, although the customer may renew for additional years, or purchase the system. Estimated cost of servicing assets has been deducted and is estimated based on the service agreements underlying each fund.

In-period volume metrics:	Three Months Ended March 31, 2022
Customer Additions	29,463
Subscriber Additions	21,197
Solar Energy Capacity Installed (in Megawatts)	213.2
Solar Energy Capacity Installed for Subscribers (in Megawatts)	153.9
In-period value creation metrics: ⁽¹⁾	Three Months Ended March 31, 2022
Subscriber Value Contracted Period	\$33,838
Subscriber Value Renewal Period	\$3,166
Subscriber Value	\$37,004
Creation Cost	\$29,863
Net Subscriber Value	\$7,141
Total Value Generated (in millions)	\$151.4

In-period environmental impact metrics: ⁽¹⁾	Three Months Ended March 31, 2022
Positive Environmental Impact from Customers (over trailing twelve months, in millions of metric tons of CO2 avoidance)	2.7
Positive Expected Lifetime Environmental Impact from Customer Additions (in millions of metric tons of CO2 avoidance)	4.6
10	

sunrun

Period-end metrics:	March 31, 2022
Customers	689,774
Subscribers	588,941
Networked Solar Energy Capacity (in megawatts)	4,890
Networked Solar Energy Capacity for Subscribers (in megawatts)	4,204
Annual Recurring Revenue (in millions)	\$883
Average Contract Life Remaining (in years)	17.4
Gross Earning Assets Contracted Period (in millions)	\$7,040
Gross Earning Assets Renewal Period (in millions)	\$3,116
Gross Earning Assets (in millions)	\$10,155
Net Earning Assets (in millions)	\$4,454

Note that figures presented above may not sum due to rounding. For adjustments related to Subscriber Value and Creation Cost, please see the supplemental Creation Cost Methodology memo for each applicable period, which is available on investors.sunrun.com.

Definitions

Deployments represent solar energy systems, whether sold directly to customers or subject to executed Customer Agreements (i) for which we have confirmation that the systems are installed on the roof, subject to final inspection, (ii) in the case of certain system installations by our partners, for which we have accrued at least 80% of the expected project cost (inclusive of acquisitions of installed systems), or (iii) for multi-family and any other systems that have reached our internal milestone signaling construction can commence following design completion, measured on the percentage of the system that has been completed based on expected system cost.

Customer Agreements refer to, collectively, solar power purchase agreements and solar leases.

Subscriber Additions represent the number of Deployments in the period that are subject to executed Customer Agreements.

Customer Additions represent the number of Deployments in the period.

Solar Energy Capacity Installed represents the aggregate megawatt production capacity of our solar energy systems that were recognized as Deployments in the period.

Solar Energy Capacity Installed for Subscribers represents the aggregate megawatt production capacity of our solar energy systems that were recognized as Deployments in the period that are subject to executed Customer Agreements.

Creation Cost represents the sum of certain operating expenses and capital expenditures incurred divided by applicable Customer Additions and Subscriber Additions in the period. Creation Cost is comprised of (i) installation costs, which includes the increase in gross solar energy system assets and the cost of customer agreement revenue, excluding depreciation expense of fixed solar assets, and operating and maintenance expenses associated with existing Subscribers, plus (ii) sales and marketing costs, including increases to the gross capitalized costs to obtain contracts, net of the amortization expense of the costs to obtain contracts, plus (iii) general and administrative costs, and less (iv) the gross profit derived from selling systems to customers under sale agreements and Sunrun's product distribution and lead generation businesses. Creation Cost excludes stock based compensation, amortization of intangibles, and research and development expenses, along with other items the company deems to be non-recurring or extraordinary in nature. The gross margin derived from solar energy systems and product sales is included as an offset to Creation Cost since these sales are ancillary to the overall business model and lowers our overall cost of business. The sales, marketing, general and administrative costs in Creation Cost since these sales. As such, by including the gross margin on solar energy system and product sales as a contra cost, the value of all activities of the Company's segment are represented in the Net Subscriber Value.

Subscriber Value represents the per subscriber value of upfront and future cash flows (discounted at 5%) from Subscriber Additions in the period, including expected payments from customers as set forth in Customer Agreements, net proceeds from tax equity finance partners, payments from utility incentive and state rebate programs, contracted net grid service program cash flows, projected future cash flows from solar energy renewable energy credit sales, less estimated operating and maintenance costs to service the systems and replace equipment, consistent with estimates by independent engineers, over the initial term of the Customer Agreements and estimated renewal period. For Customer Agreements with 25 year initial contract terms, a 5 year renewal period is assumed. For a 20 year initial contract term, a 10 year renewal period is assumed. In all instances, we assume a 30-year customer relationship, although the customer may renew for additional years, or purchase the system.

Net Subscriber Value represents Subscriber Value less Creation Cost.

Total Value Generated represents Net Subscriber Value multiplied by Subscriber Additions.

Customers represent the cumulative number of Deployments, from the company's inception through the measurement date.

Subscribers represent the cumulative number of Customer Agreements for systems that have been recognized as Deployments through the measurement date.

sunrun

Networked Solar Energy Capacity represents the aggregate megawatt production capacity of our solar energy systems that have been recognized as Deployments, from the company's inception through the measurement date.

Networked Solar Energy Capacity for Subscribers represents the aggregate megawatt production capacity of our solar energy systems that have been recognized as Deployments, from the company's inception through the measurement date, that have been subject to executed Customer Agreements.

Gross Earning Assets is calculated as Gross Earning Assets Contracted Period plus Gross Earning Assets Renewal Period.

Gross Earning Assets Contracted Period represents the present value of the remaining net cash flows (discounted at 5%) during the initial term of our Customer Agreements as of the measurement date. It is calculated as the present value of cash flows (discounted at 5%) that we would receive from Subscribers in future periods as set forth in Customer Agreements, after deducting expected operating and maintenance costs, equipment replacements costs, distributions to tax equity partners in consolidated joint venture partnership flip structures, and distributions to project equity investors. We include cash flows we expect to receive in future periods from state incentive and rebate programs, contracted sales of solar renewable energy credits, and awarded net cash flows from grid service programs with utilities or grid operators.

Gross Earning Assets Renewal Period is the forecasted net present value we would receive upon or following the expiration of the initial Customer Agreement term but before the 30th anniversary of the system's activation (either in the form of cash payments during any applicable renewal period or a system purchase at the end of the initial term), for Subscribers as of the measurement date. We calculate the Gross Earning Assets Renewal Period amount at the expiration of the initial contract term assuming either a system purchase or a renewal, forecasting only a 30-year customer relationship (although the customer may renew for additional years, or purchase the system), at a contract rate equal to 90% of the customer's contractual rate in effect at the end of the initial contract term. After the initial contract term, our Customer Agreements typically automatically renew on an annual basis and the rate is initially set at up to a 10% discount to then-prevailing utility power prices.

Net Earning Assets represents Gross Earning Assets, plus total cash, less adjusted debt and less pass-through financing obligations, as of the same measurement date. Debt is adjusted to exclude a pro-rata share of non-recourse debt associated with funds with project equity structures along with debt associated with the company's ITC safe harboring facility. Because estimated cash distributions to our project equity partners are deducted from Gross Earning Assets, a proportional share of the corresponding project level non-recourse debt is deducted from Net Earning Assets, as such debt would be serviced from cash flows already excluded from Gross Earning Assets.

Annual Recurring Revenue represents revenue arising from Customer Agreements over the following twelve months for Subscribers that have met initial revenue recognition criteria as of the measurement date.

Average Contract Life Remaining represents the average number of years remaining in the initial term of Customer Agreements for Subscribers that have met revenue recognition criteria as of the measurement date.

Positive Environmental Impact from Customers represents the estimated reduction in carbon emissions as a result of energy produced from our Networked Solar Energy Capacity over the trailing twelve months. The figure is presented in millions of metric tons of avoided carbon emissions and is calculated using the Environmental Protection Agency's AVERT tool. The figure is calculated using the most recent published tool from the EPA, using the current-year avoided emission factor for distributed resources on a state by state basis. The environmental impact is estimated based on the system, regardless of whether or not Sunrun continues to own the system or any associated renewable energy credits.

Positive Expected Lifetime Environmental Impact from Customer Additions represents the estimated reduction in carbon emissions over thirty years as a result of energy produced from solar energy systems that were recognized as Deployments in the period. The figure is presented in millions of metric tons of avoided carbon emissions and is calculated using the Environmental Protection Agency's AVERT tool. The figure is calculated using the most recent published tool from the EPA, using the current-year avoided emission factor for distributed resources on a state by state basis, leveraging our estimated production figures for such systems, which degrade over time, and is extrapolated for 30 years. The environmental impact is estimated based on the system, regardless of whether or not Sunrun continues to own the system or any associated renewable energy credits.
